

Oilseeds Domestic Fundamentals:
Today's Update-

Today, the Indore Soybean plant prices went marginally up by 0.38% at INR 5,270/Qtl. as compared to the previous day amid decrease in arrivals and firm global cues.

The Department of Revenue under the Ministry of Finance has issued Notification No. 39/2023-Customs dated 14th June 2023 notifying the cut in import duty of refined soy oil and refined sunflower oil to match it with the import duty of RBD palm olein and RBD palm oil. India mainly imports crude soy oil and crude sunflower oil; however, it may shift the demand toward import of refined soft oils, weighing on edible oil basket prices.

International market update:

In June Crop Report, Conab increased the 2022/23 Brazil soybean estimate 0.92 million tons to 155.73 million.

According to National Oilseed Processors Association (NOPA), U.S. May soybean crush rose by 2.70 percent m-o-m to 177.915 million bushels from 173.232 million bushels last month. Soy oil stocks in the U.S. at the end of May declined by 4.34 percent m-o-m to 1.875 billion lbs compared to 1.957 billion lbs in previous month. Stocks of soy oil in May'23 is up by 6 percent y-o-y, which was reported at 1.765 million lbs. Soy oil stocks is in lower than trade expectation of 1.942 million lbs.

As of 11th June, 2023, the most recent report from the USDA reveals that the progress of soybean planting has reached a total of 96% completion vs 87% previous year same period. This surpasses the typical five-year average of 86% for this period in the year.

Currently, Indore Soybean plant prices is likely to remain subdued in the range of INR 5,200-5,500/Qtl in the short run.

RM seed

Today's Update-

The RM seed Jaipur prices went up by 1.9% at INR 5,325/Qtl. as compared to previous day amid decrease in arrivals. Across India, arrivals of RM seed were 7.5 lakh bags.

As per NAFED latest report, a total of 8,14,555 Metric tonnes of Mustard have been procured in five states, namely Haryana (3.47 Lakh tonnes), Rajasthan (2.09 Lakh tonnes), Madhya Pradesh (1.67 Lakh tonnes), Gujarat (0.73 Lakh tonnes) and Uttar Pradesh (0.16 Lakh tonnes).

International market update:

The canola area is projected to experience a slight increase to 8.8 million hectares in 2023-2024 due to favourable prices. However, this expansion is constrained by the similarly favourable prices of other crops like wheat and peas. If crop abandonment rates and yields continue to follow trends, the production is estimated to be around 18.5 million metric tons.

Both domestic crush and exports are forecasted to remain at similar levels as in 2022-23, with domestic crush predicted to be around 9.5 million metric tons and exports at 8.8 million metric tons. This projection is supported by the ongoing strong global demand for oilseeds, vegetable oils, and protein meals.

Assumptions for feed use, residue, and impurity levels are set at normal levels. Carry-out stocks are expected to slightly increase to 1.1 million metric tons, compared to 1.0 million metric tons in 2022-

23 and the five-year average of 2.3 million metric tons.

The Canadian canola supply for the 2022-23 period is projected to reach 19.1 million metric tonnes (Mt), which is 22% higher compared to the previous year. This increase is primarily due to the recovery in production following the drought in 2021-22, although it was somewhat balanced by existing stocks. Canola cultivation covered an area of 8.7 million hectares (Mha) in Canada, with 8.6 Mha successfully harvested. Yields returned to nearly normal levels, averaging 2.11 tonnes per hectare (t/ha). The estimated production for the year is 18.2 Mt.

Mustard outlook

Currently, RM seed is trading at three years low tracking weak demand from oil millers amid disparity due to weak mustard oil prices. As per Agriwatch primary sources, upon disparity, most of the expeller are shut and only few kacchi ghani are operational. Farmers are reluctant to offload their stock at current levels in anticipation of better prices in future. And millers are buying as per their daily need for crushing.

Jaipur mustard is likely to remain weak in the range of INR 5,000-5,500/Qtl in the short run.

Groundnut:

Groundnut bold Rajkot market remained closed due to cyclone. In upcoming days, Groundnut average prices is likely to trade range bound in the range of INR 7,400-8,000/Qtl in short run amid low availability and good export demand.

In contrast to the sharp decline in prices of other oilseeds, groundnut prices have remained robust due to increased export demand and low production. The weak performance of summer season crops, including groundnuts, further contributes to the sustained high prices. There has been a year-long increase of over 20 percent in groundnut prices, with a recent 2.5 percent surge within the past month. Despite a significant decrease in the prices of other oilseeds, groundnut prices have remained strong, primarily due to extensive exports to Gulf countries and Chin.

The groundnut production is estimated to be lower this year in Argentina due to lower yield. The market price reference has been steadily rising over the past few months due to the continuous decline in production expectations. While substantial volumes of Crop 2022 are still being exported from Argentina, the full impact on availability has yet to be observed. Determining when the market will fully comprehend the situation is challenging. However, it is highly likely that Argentina will experience a 40 to 50% reduction in exported volume compared to the past three years.
