

### **Domestic Fundamentals:**

- Mostly weak sentiments featured in various edible oils on dull trade activity for Gururnanak Jayanti, bank holiday and new currency cash crunch after demonetisation of Rs. 500 and 1000 currently notes, by the government.
- USDA decrease India's palm oil imports for both 2015/16 and 2016/17 due to lower demand of palm oil. However,
  USDA increased imports of soy oil from India in both 2015/16 and 2016/17 due to higher demand on lower premium of
  soy oil over palm oil.
- Expectation of weak production of palm oil in Malaysia in November and lower fall in stocks of palm oil in Malaysia in October will support prices in near term. Production fell on lagged effect of El Nino. Palm oil end stocks fell less than expected in October in Malaysia in November. Fall in exports were lower than estimated. Ringgit depreciation will provide support prices in near term.

Exports in first ten days of November 13-17 percent in Malaysia indicate weak demand from India and China. India and China is buying less due higher prices of palm oil. Weak demand has capped gains of palm oil in near term.

Prices are in range

- Lower than expected soybean crop in Argentina due to lower area has supported prices in near term. USDA left soybean crop estimate of Argentina unchanged in November estimate. USDA increased US soybean crop to record levels on higher yields. It also increased export estimate of US in 2015/16 and 2016/17. Brazil's soybean crop estimate was left unchanged. USDA reported lower stocks of soy oil in US due to lower opening stocks and lower production partially set off by fall in food, feed and industrial use and lower exports.
  - Strong exports of soybean to China and lower crush of soybean in US due to weak demand of soy meal is supporting soy oil prices in near term. Hogs margins are very good in China and herd expansion ahead of Chinese New Year has imploded demand from China.

Firm crude oil prices will support soy oil prices in near term. Prices are in a range.

- According to Indonesia Palm Oil Association (GAPKI), Indonesia's September palm oil exports fell 16.4 percent to 1.73
   MMT compared to 2.07 MMT exported in August. Palm oil stocks rose 28 percent in September to 2.17 MMT from 1.695 MMT in August. Palm stocks rose due to lower stocks and higher production.
- Argentina's 2016 area under soybean is expected lower by 2.5% to 19.6 million hectares from last year. This fall is
  primarily due to the rising cultivation cost and lower bean prices, said Buenos Aires Grains Exchange. About 11% of
  the Argentina's soybean planting is complete. Argentina's 2016/17 soybean production is projected at 52.5 million tons
  by Rosario grains exchange in its first soy crop estimate of new season.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's November 1-10 palm oil exports fell 13.8 percent to 347,760 tons compared to 403,650 tons in corresponding period last month. Top buyers were European Union at 95,000 tons (83,172 tons), China at 30,500 tons (74,780 tons), India at 8,300 tons (43,024 tons) and United States at 1,800 tons (6,050 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature firm soy and palm with weak rapeseed oil in the spot market, in near-term.
