

### Potato Fundamentals:

- In West Bengal, so far approximately 50% of cold storages have opened and rest is expected to open after 16 May only.
- All India potato production could be in the range of 40-42 million ton against last year's estimate of 45 million tons. This is mainly due to crop damage in UP because of unseasonal rains and blight disease in west Bengal.
- Across the country, prices of potatoes are higher than last year because of lower storage in cold storage of major producing regions, U.P and West Bengal.
- In Khandauli (Agra), modal prices are hovering in the range of Rs 1440/ quintal compared to last year price of Rs 1050/ quintal during same time. The reason for higher prices is due to less storage in cold stores.
