

Potato Fundamentals:

- In West Bengal so far 60% sowing is completed and remaining area is expected to be sown in next 10 days. Normally by 10th of December sowing is completed but this year it's delayed by 10-15 days due to unfavorable weather conditions during sowing time.
- In West Bengal, Hybrid potato or "Kachha Aloo" is sown less this year due to lower prices during sowing time. "Kachha Aloo" is expected to arrive in market from December last.
- In U.P, Rabi sowing is almost similar to previous year but climatic conditions are not at par and may affect the production but situation is expected to be cleared after mid January.
- In M.P, approximately 80% crop of the total production is of processing variety. Fresh crop has started arriving in market and varieties arriving in market are Atlanta, FC3 and 1533.

Potato Wholesale Prices & Arrivals trend in Consumption Centers
