

Potato Fundamentals:

- In W.B, Rabi acreage is expected to be approximately 5% lower compared to corresponding year area. Yield is expected to be lower which may result into lower production.
- In U.P, Rabi area is expected to be less by 5-10% compared to corresponding year's area 6.23 lakh hectares. Production is expected to be approx 15% lower compared to last year which may increase further dependent on weather for next one week.
- In major producing regions loading in cold storages is expected to start after 20th Feb 2016 and continues till mid of April depending upon the region.
- Fresh crop is arriving in market from Punjab, U.P, M.P and West Bengal. According to trade sources potato production is expected to be lower this year due to lesser area and unfavorable weather condition in producing regions.

Potato Wholesale Prices & Arrivals trend in Consumption Centers
