

Pulses Domestic Fundamentals:

- According to IBIS (provisional data), import of pulses in the week (18 Apr-24 Apr) was around 94.8 Thousand tonnes at major ports in India, around 16% higher than previous week's (11 Apr-17 Apr) import of 81 Thousand tonnes. All pulses were imported higher as compare to last week.
- According to IBIS, India green pea imports were around 2.08 Thousand MT in last week (18 Apr-24 Apr) Canada exported around 1.14 thousand MT at an average price of \$ 414.52 Cif per tonne and USA exported 0.66 thousand MT at an average price of \$ 676.43 Cif per tonne. At present Green Pea price in Mumbai market is going around Rs 3100-3300 per quintal.
- Maharashtra government has issued a bill to fix the maximum selling price of pulses, though the bill is yet to be signed by the President. The price of pulses which will be fixed will vary in metro cities, towns and villages. This move is likely to pressurized cash market in the short term.
- With uncertainty in the market regarding government action to curb down tur prices, demand has lower down than normal. Millers and stockiest are only doing need based buying. Currently prices of tur in Gulbarga mandi is around Rs 9300-9400 per quintal with arrival of 1800-2000 bags per day.
- In order to boost domestic supply and check for any price rise the government will release 10000 tonnes of Tur and urad from its buffer stock. The centre has directed state governments to keep a close watch on prices and take strict actions against any hoarding of pulses. Last week, the wholesale prices of tur dal were in range of Rs 145-150 per kg and wholesale prices of urad were Rs 175 per kg.
- According to third advance estimate issued by Rajasthan agriculture department for lentils, the production is expected to be 78210 tonnes, which is higher by 14953 tonnes as compared to second advance estimate. Last year Rajasthan has produced 42500 tonnes of Lentil.
- According to latest market update, the import of pulses have increased by around 20 percent from 45.84 lakh tonnes for F.Y. 2014-15 to 55 lakh tonnes for F.Y. 2015-16. As compared to F.Y. 2013-14 the imports have increased by 18.46 lakh tonnes from 2015-16.
- Private traders have imported 55 lakh metric tonnes of pulses which is around 22 percent higher as compared to last year. Furthermore, to uplift production the MSP for Tur as well as Urad has been increased by Rs. 275 per quintal and by Rs. 250 per quintal for Moong. Government agencies have procured 50000 tonnes of pulses and have contracted for 25000 tonnes for import.
- The WPI has fallen from 356.4 in February 2016 to 346.6 in March 2016 for pulses. There has been a fall in WPI of Lentil (337.2 for February 2016 to 325.5 in March 2016), Moong (397.4 for February 2016 to 390.5 in March 2016) and urad (507.1 for February 2016 to 495.6 in March 2016)
- Chana wholesale prices have risen by 15%-20% in the last ten days. Even after expectation of good monsoon this year consumers might have to pay higher prices till the new Kharif crop arrives. Furthermore, arrivals in chana producing states like Rajasthan and UP have not been satisfactory. This rise in prices of chana can lead to an increase in prices of imported yellow peas, as it replaces chana in varying degree in besan.
- According to the local trader of Kanpur region of Uttar Pradesh, new pea crop has increased due to higher prices in the cash market. Demand of pea is higher than normal and crop quality is good. At present arrival in the mandi is around 3000-4000 bags per day with price range of Rs 3340-3370 per bag.
- According to the third advance estimate, Rajasthan agriculture Department lowers down chana production estimate to 9.99 Lakh tones which is 17% lower than targeted estimate. Targeted estimate was 12.07 Lakh tonnes. Lower production estimate and good demand has given support to chana cash market.

Pulses International Fundamental:

- **As per latest update, farmers in Canada are planning to shift their crop from wheat to peas and lentil** due to higher prices and demand in India. Farmers aim to plant 5 million acres of lentils and 4.6 million acres of peas, which will lead to a fall in wheat area to 23.2 million acres.
- **According to latest report by USDA, farmers in the US expect to plant Chickpeas in larger area** as compared to last year due to strong prices and demand. The area for small chickpeas is expected increase by 15% to 83000 acres and area for large chickpeas is expected to increase by 20% to 163000 acres in 2016.
- **According to latest update**, carry-out stocks for Canadian Chickpeas are expected to fall from 125 thousand MT in 2014-15 to 50 thousand MT 2015-16. This fall in carry-out stocks is mainly due to increased exports and decreased production
- **According to the latest Statpub report, France pea export increased by 66%** to 10.0 Thousand MT in January from previous month of 6.01 Thousand MT. However, it is 23% lower than 13,030 MT shipped during the same month last year. This year export of peas from France is expected to increase.
- **According to the latest report, Canadian Lentil production for 2015-16 increases by around 19%** to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- **According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent** to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers bids are likely to increase from \$515 to \$685-715 per tonne.
- **According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent** to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- **According to the latest ABARES report, Australian Chickpea production forecast 2015-16** is 1013 kilo tonnes which are around 82% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to latest Canadian update**, for 2016-17 sowing area for lentils in Canada is expected to increase up to 1.8Mha. Furthermore, higher yield is also expected which will lead to increase in production by 20% to 2.85 Mt which is up by 0.57Mt in 2015-16.
- **According to latest Canadian update**, exports for chickpeas are expected to increase from 2014-15 because of increase in demand from Pakistan and US. USDA has estimated US chickpea production at 114 kilotonnes, which is about 10% lower than 2014-15. The average prices can also increase due to higher local demand and higher quotes in international market.
