

Pulses Domestic Fundamentals:

- According to the local trader of Kekri region of Rajasthan, availability of moong is sufficient to cater the present demand .Stockiest has stored moong at higher levels that are unwilling to release their stock at current prices. At present, moong at kekri mandi is around Rs 6500-6600 per bag with arrival of 500-700 bags per day.
- According to the local trader of Jhansi region of Uttar Pradesh, Pea demand is good and traders and stockiest are buying at the current price for stock, in expectation of higher prices in medium to long term. Pea yield this year in the region has drop down to 65-70 % as compared to last year due to lower rainfall .At present, Pea prices in the local mandi is hovering around Rs 3150-3200 per bag with arrival of 350 bags per day.
- According to the local trader of Latur region of Maharashtra, Chana demand is lower than normal as buyers remains sidelined. Stockiest and traders are only doing need based buying. Arrivals have also declined due to marriage season and are supposed to pick pace after 1st week of May. At present, Chana mixed quality prices in Latur mandi is hovering around Rs 5350-5450 per quintal with arrival of 1500 bags per day.
- According to the trade source, Rajasthan mill association has decided to provide pulses at lower rate than ongoing market rate. Retail shops will be open, in which pulses dall will be provided at lower rate. Tur and Urad Dall will be at Rs 120/kg while Moong Chilka at Rs 82,Chana Dall at Rs 70/kg and Pea Dall at Rs 40/kg.
- In order to curb down the rising prices of pulses, government ask the states to put stock limit on all varieties of pulses. Further government has also asked the states to place their requirements for making allotment of tur and urad dals for retail distribution through their channels.
- As per local trader of Patna region of Bihar, arrival from new lentil crop is good and availability is normal against current weak demand. Amid this back ground government intention to pose stock limit on pulses has weakened inner tone in the market. Stockiest/millers are now unwilling to enhance stock of lentil at this point of time. It may restrict firmness in cash market in the days ahead. At present, prices of lentil in Patna mandi is around Rs 6600-6700 per quintal with arrival of 2000-2500 bags per day.
- According to IBIS (provisional data), import of pulses in the week (18 Apr-24 Apr) was around 94.8 Thousand tonnes at major ports in India, around 16% higher than previous week's (11 Apr-17 Apr) import of 81 Thousand tonnes. All pulses were imported higher as compare to last week.
- According to IBIS, India green pea imports were around 2.08 Thousand MT in last week (18 Apr-24 Apr) Canada exported around 1.14 thousand MT at an average price of \$ 414.52 Cif per tonne and USA exported 0.66 thousand MT at an average price of \$ 676.43 Cif per tonne. At present Green Pea price in Mumbai market is going around Rs 3100-3300 per quintal.
- Maharashtra government has issued a bill to fix the maximum selling price of pulses, though the bill is yet to be signed by the President. The price of pulses which will be fixed will vary in metro cities, towns and villages. This move is likely to pressurized cash market in the short term.
- With uncertainty in the market regarding government action to curb down tur prices, demand has lower down than normal. Millers and stockiest are only doing need based buying. Currently prices of tur in Gulbarga mandi is around Rs 9300-9400 per quintal with arrival of 1800-2000 bags per day.
- According to third advance estimate issued by Rajasthan agriculture department for lentils, the production is expected to be 78210 tonnes, which is higher by 14953 tonnes as compared to second advance estimate. Last year Rajasthan has produced 42500 tonnes of Lentil.
- According to the third advance estimate, Rajasthan agriculture Department lowers down chana production estimate to 9.99 Lakh tones which is 17% lower than targeted estimate. Targeted estimate was 12.07 Lakh tonnes. Lower production estimate and good demand has given support to chana cash market.

Pulses International Fundamental:

- **As per latest update, farmers in Canada are planning to shift their crop from wheat to peas and lentil** due to higher prices and demand in India. Farmers aim to plant 5 million acres of lentils and 4.6 million acres of peas, which will lead to a fall in wheat area to 23.2 million acres.
- **According to latest report by USDA, farmers in the US expect to plant Chickpeas in larger area** as compared to last year due to strong prices and demand. The area for small chickpeas is expected increase by 15% to 83000 acres and area for large chickpeas is expected to increase by 20% to 163000 acres in 2016.
- **According to latest update**, carry-out stocks for Canadian Chickpeas are expected to fall from 125 thousand MT in 2014-15 to 50 thousand MT 2015-16. This fall in carry-out stocks is mainly due to increased exports and decreased production
- **According to the latest Statpub report, France pea export increased by 66%** to 10.0 Thousand MT in January from previous month of 6.01 Thousand MT. However, it is 23% lower than 13,030 MT shipped during the same month last year. This year export of peas from France is expected to increase.
- **According to the latest report, Canadian Lentil production for 2015-16 increases by around 19%** to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- **According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent** to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT .Farmers bids are likely to increase from \$515 to \$685-715 per tonne.
- **According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent** to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- **According to the latest ABARES report, Australian Chickpea production forecast** 2015-16 is 1013 kilo tonnes which are around 82% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to latest Canadian update**, for 2016-17 sowing area for lentils in Canada is expected to increase up to 1.8Mha. Furthermore, higher yield is also expected which will lead to increase in production by 20% to 2.85 Mt which is up by 0.57Mt in 2015-16.
- **According to latest Canadian update**, exports for chickpeas are expected to increase from 2014-15 because of increase in demand from Pakistan and US. USDA has estimated US chickpea production at 114 kilotonnes, which is about 10% lower than 2014-15. The average prices can also increase due to higher local demand and higher quotes in international market.
