

Pulses Domestic Fundamentals:

- According to the trade source, area of tur may increase this year as comparison to last year in Maharashtra due to expected favorable condition and higher market prevailing prices. Sowing in Maharashtra will begin in June after initial rain. At present, Tur prices in Hinganghat mandi of Maharashtra is in the range of Rs 8790-8800 per bag with arrival of 2000-2300 bags per day.
- According to local trader of Ahmednagar region of Maharashtra, Chana stock is 75% less than the average years whereas arrival is also lower than the last year. At present chana price in mandi is hovering around Rs 5800-5900 per bag with arrival of 600 bags per day. Agriwatch expects prices of chana to show steady to firm movement in coming days due to good demand from millers/stockiest and lower arrival. However, prices may take some downward movement due to profit booking and demand could lower at higher price.
- There is a burning gossip in the market that area under guar and castor seed is bound to decline this year due to increased possibility of good rainfall in monsoon season and lower prevailing prices of these commodities in cash market. It may shift to pulses and other spices. Around 2 to 4 % area in Maharashtra, Rajasthan and MP under soybean may shift to other lucrative crops as soybean price is ruling 10 % lower in comparison to last year. Guar and castor farmers too would prefer to shift some area to other cash crop due to lower price.
- According to IBIS (provisional data), import of pulses in the week (16 May-22 May) was around 49.6 Thousand tonnes at major ports in India, around 12% lower than previous week's (09 May-15 May) import of 56.6 Thousand tonnes. Green Pea and Yellow Pea were imported lower this week whereas Masoor, Urad, Chana, Cow Pea, Kidney Bean, Pigeon Pea and Moong were imported higher as compared to last week.
- According to IBIS, India green pea imports were around 1.45 Thousand MT tones in the week (16 May- 22 May) which is around 31% lower than last week (09 May- 15 May). Last week it was 2.11 Thousand MT. Canada exported around 1.26 thousand MT at an average price of \$ 403.03 Cif per tonne. At present Green Pea price in Mumbai market is going around Rs 3200-3400 per quintal.
- According to IBIS (provisional data), India moth imports were around 0.77 Thousand MT tonnes in the week (16 May- 22 May) which is around 40% higher than last week (09 May- 15 May). Last week it was 0.55 Thousand MT. Moth was generally imported from Afghanistan at JNPT port at an average price of \$838.36 CiF per tonne. At present, moth price in Jaipur market is hovering around Rs 5300-5400 per quintal.
- Central Government suggests the states government not to levy taxes such as mandi tax, Vat etc in order to curb down rising prices of pulses. Beside this, central government also asked governments to establish their own Price Stabilization Fund that can be utilized to check prices of pulses and to fix stock limits for pulse importers, millers and traders.
- According to the local trader of Jhansi region of Uttar Pradesh, new urad start hitting the mandi in small amount. Moisture level is higher around 15-20% but grain quality is good. This urad is smaller crop and arrival may continue till 1-2 months. At present, prices of urad in Jhansi mandi is hovering around Rs10100-10500 per quintal with arrival of 20-40 bags per day.
- According to the third advance estimate, India Urad production has increased to 1.88 MMT which is around 8% higher than the second advance estimate. Second advance estimate was 1.74 MMT. At present Urad from Burma in Chennai is coming at \$1560 for FAQ and \$1650 for SQ per tonne. Future contract is being made at Rs 11200-11300 per tones for June shipment. Agriwatch expects range bound movement in coming days.
- According to the Third advance estimate, Chana production has been lowered down to 7.48 MMT which is around 7.5 lower than previous estimate. Second production estimate of chana was of 8.09 MMT. Lower production is due to lower rainfall in major producing states.

Pulses International Fundamental:

- **As per latest update, farmers in Canada are planning to shift their crop from wheat to peas and lentil** due to higher prices and demand in India. Farmers aim to plant 5 million acres of lentils and 4.6 million acres of peas, which will lead to a fall in wheat area to 23.2 million acres.
- **According to latest report by USDA, farmers in the US expect to plant Chickpeas in larger area** as compared to last year due to strong prices and demand. The area for small chickpeas is expected increase by 15% to 83000 acres and area for large chickpeas is expected to increase by 20% to 163000 acres in 2016.
- **According to latest update**, carry-out stocks for Canadian Chickpeas are expected to fall from 125 thousand MT in 2014-15 to 50 thousand MT 2015-16. This fall in carry-out stocks is mainly due to increased exports and decreased production
- **According to the latest Statpub report, France pea export increased by 66%** to 10.0 Thousand MT in January from previous month of 6.01 Thousand MT. However, it is 23% lower than 13,030 MT shipped during the same month last year. This year export of peas from France is expected to increase.
- **According to the latest report, Canadian Lentil production for 2015-16 increases by around 19%** to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.
- **According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent** to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers bids are likely to increase from \$515 to \$685-715 per tonne.
- **According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent** to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.
- **According to the latest ABARES report, Australian Chickpea production forecast 2015-16** is 1013 kilo tonnes which are around 82% greater than 2014-15 estimate which was 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to latest Canadian update**, for 2016-17 sowing area for lentils in Canada is expected to increase up to 1.8Mha. Furthermore, higher yield is also expected which will lead to increase in production by 20% to 2.85 Mt which is up by 0.57Mt in 2015-16.
- **According to latest Canadian update**, exports for chickpeas are expected to increase from 2014-15 because of increase in demand from Pakistan and US. USDA has estimated US chickpea production at 114 kilotonnes, which is about 10% lower than 2014-15. The average prices can also increase due to higher local demand and higher quotes in international market.
