

Pulses Domestic Fundamentals:

- **Pulses: At JNPT (Mumbai) Port Container Report on July 8:** 62 Container of Pigeon Pea, 10 Container of Green Mung, 67 Container of Chickpeas, 121 Container of Black Matpe, 07 Container of Masur, 70 Container of Yellow Pea, 14 Container of Black/Brown Eye Bean, 20 Container of Green Peas, 02 Container of Red Kidney Bean.
- According to latest sowing report release by Government of Agriculture as on 8th July, 2016, Pulses Kharif sowing reached to 45.9 Lakh hectares which is around 26% higher than at the corresponding time period last year. Last year it was 36.4 Lakh hectares. Tur, Urad and Moong sowing was recorded at 20.5, 9.8 and 11.8 Lakh hectares respectively as on 8th July 2016.
- As expected by Agriwatch Chana prices have shown firm movement in the last week. Surge in prices in Chana cash market is due to good demand from the millers and lower import from Australia. At present, importers are importing Chana from non regular countries like Ukraine, Argentina and Sudan etc to fulfill demand at higher import quotes making it costlier. Agriwatch expects Chana cash market to show steady to firm movement in coming days.
- Moong cash market had shown firm movement in few days due to expectation of crop loss in many parts of Madhya Pradesh. Sowing of moong is in progress but excessive rain and water logging in the fields may affect moong crop. Agriwatch expects moong prices to show steady to slightly firm movement in coming days due to expectation of crop loss due to rain. However, prices may not show steep northward movement due to higher imports and higher stock availability in the market.
- According to IBIS (provisional data), import of pulses in the week (27 June-03 July) was around 62.3 Thousand tonnes at major ports in India, around 3% lower than previous week's (20 June-26 June) import of 64.4 Thousand tonnes. Chickpea, Cow Pea, Black Matpe, Pigeon Pea and Yellow Pea were imported higher this week whereas Kidney Bean, Green Pea, Lentil and Green Gram were imported lower as compared to last week.
- According to IBIS (provisional data), India moth imports were around 0.05 Thousand MT tonnes in the week (27 June-03 July) which is around 29% lower than last week (20 June-26 June). Last week it was 0.07 Thousand MT. At present, moth price in Jaipur market is hovering around Rs 5500-5700 per quintal. Agriwatch expects moth prices to show steady to slightly firm movement in coming days.
- According to IBIS, India green pea imports were around 3.35 Thousand MT tonnes in the week (27 June-03 July) which is around 20% lower than last week (20 June-26 June). Last week it was 4.18 Thousand MT. Canada exported around 1 thousand MT at an average price of \$ 399.69 Cif per tonne. At present Green Pea price in Mumbai market is going around Rs 3100-3200 per quintal.
- Agriwatch expects Urad prices to show range bound to slightly weak movement as market participants will only do need based buying as they expect higher production this year and demand could fall at higher price. However, urad prices may not show steep fall due to empty pipeline.
- Tur sowing started in Gulbarga region of Karnataka and trade source expects higher sowing area of tur this year as compare to last year as cotton area may shift in tur. At present Tur demand is lower than normal and stockiest are sidelined. Agriwatch expects tur prices to show steady to slightly weak movement in coming days.

Pulses International Fundamental:

- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast** 2016-17 is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, pulses crop are developing faster than normal this year, with 20% of the crop ahead of normal and 76% at a normal state of development for the third week of June. The majority of the crops are in good-to-excellent condition though excess moisture is causing concerns in some areas. Harvesting of pulses generally begins in August and if the weather continues to be favorable hope for higher production of pulses increases this year.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.
- **According to the latest Statpub report, France pea export increased** by 210% to 42.16 Thousand MT in month of April from previous month of 13.60 Thousand MT and it is around 106% higher than 20.51 Thousand MT shipped during the same month last year. Total shipments clearance for ten months this year (July to April) is around 27.74 Lakh MT which is 105% higher than 12.06 Lakh MT shipped during the same month last year. Good demand from India and lower stock in domestic market due to lower production this year would continue to lend support to cash market in France and quotes are expected to remain stable to firm in the near term.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
