

Pulses Domestic Fundamentals:

- **Pulses: At JNPT (Mumbai) Port Container Report on July 12:** 81 Container of Pigeon Pea, 179 Container of Green Mung, 73 Container of Chickpeas, 52 Container of Black Matpe, 61 Container of Masur, 06 Container of Black/Brown Eye Bean, 85 Container of Green Peas, 32 Container of Red Kidney Bean.
- According to IBIS (provisional data), import of pulses in the week (04 July-10 July) was around 65.8 Thousand tonnes at major ports in India, around 6% higher than previous week's (27 June-03 July) import of 62.3 Thousand tonnes. Green Pea and Yellow Pea were imported higher this week whereas Chickpea, Cow Pea, Black Matpe, Pigeon Pea Kidney Bean, Lentil and Green Gram were imported lower as compared to last week.
- According to IBIS (provisional data), India moth imports were around 0.05 Thousand MT tonnes in the week (04 July-10 July) which is same as last week (27 June-03 July). Last week it was 0.05 Thousand MT. At present, moth price in Jaipur market is hovering around Rs 5600-5700 per quintal. Agriwatch expects moth prices to show range bound movement in coming days.
- According to IBIS, India green pea imports were around 9.00 Thousand MT tonnes in the week (04 July-10 July) which is around 169% higher than last week (27 June-03 July). Last week it was 3.35 Thousand MT. Canada exported around 6 thousand MT at an average price of \$ 409.40 Cif per tonne. At present Green Pea price in Mumbai market is going around Rs 3100-3200 per quintal.
- For providing regular supply and in anticipation of higher production this year, Government is planning to increase buffer stock of pulses from 0.80 Million tonnes to 1.2 Million tonnes. Government has also constituted a panel which will review MSP and bonus mechanism of pulses and would submit report in the next two weeks.
- According to the trade source, at present future Peas contract has been offered at Rs 2841/quintal for August month and Rs 2631/quintal for September/October month at Mumbai port. At present, Canada pea crop is in good condition and they are expecting higher production this year as compare to last year.
- According to latest sowing report release by Government of Agriculture as on 8th July, 2016, Pulses Kharif sowing reached to 45.9 Lakh hectares which is around 26% higher than at the corresponding time period last year. Last year it was 36.4 Lakh hectares. Tur, Urad and Moong sowing was recorded at 20.5, 9.8 and 11.8 Lakh hectares respectively as on 8th July 2016.
- As expected by Agriwatch Chana prices have shown firm movement in the last week. Surge in prices in Chana cash market is due to good demand from the millers and lower import from Australia. At present, importers are importing Chana from non regular countries like Ukraine, Argentina and Sudan etc to fulfill demand at higher import quotes making it costlier. Agriwatch expects Chana cash market to show steady to firm movement in coming days.
- Moong cash market had shown firm movement in few days due to expectation of crop loss in many parts of Madhya Pradesh. Sowing of moong is in progress but excessive rain and water logging in the fields may affect moong crop. Agriwatch expects moong prices to show steady to slightly firm movement in coming days due to expectation of crop loss due to rain. However, prices may not show steep northward movement due to higher imports and higher stock availability in the market.

Pulses International Fundamental:

- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast** 2016-17 is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, pulses crop are developing faster than normal this year, with 20% of the crop ahead of normal and 76% at a normal state of development for the third week of June. The majority of the crops are in good-to-excellent condition though excess moisture is causing concerns in some areas. Harvesting of pulses generally begins in August and if the weather continues to be favorable hope for higher production of pulses increases this year.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.
- **According to the latest Statpub report, France pea export increased** by 210% to 42.16 Thousand MT in month of April from previous month of 13.60 Thousand MT and it is around 106% higher than 20.51 Thousand MT shipped during the same month last year. Total shipments clearance for ten months this year (July to April) is around 27.74 Lakh MT which is 105% higher than 12.06 Lakh MT shipped during the same month last year. Good demand from India and lower stock in domestic market due to lower production this year would continue to lend support to cash market in France and quotes are expected to remain stable to firm in the near term.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
