

Pulses Domestic Fundamentals:

- According to latest sowing report released by Government as on 02nd September, 2016, Kharif sowing of pulses reached 142.02 Lakh hectares which is around 33% higher than at the corresponding time period last year. Last year it was 106.92 Lakh hectares.
- Maharashtra Government has directed NAFED to procure Moong at MSP from farmers. At present moong is being traded lower than MSP in many mandis due to lower demand and higher production estimate for this year. The decision will help farmers to get at least MSP prices (Rs 5225) for their crop as they have switched to pulses due to increase in MSP. No procurement target has been set by government. This development has lent support to cash moong market.
- Chana cash market has shown firm movement in couple of days due to possibility of crop loss in Australia due to rain in chickpea growing region. Agriwatch expects prices to show steady to firm movement in coming days due to lower availability of chana in domestic market and higher demand. Australia September shipment is expected to reach in October therefore availability will be lower in coming days.
- The State Trading Corporation of India Limited, New Delhi, has floated an Expression of Interest (EOI) for empanelment of foreign Suppliers of Pulses for supply to STC on long term basis. The EOI document is available on STC's website www.stclimited.co.in. The last date of submission of EOI documents to STC New Delhi is 1500 Hours of 19.09.2016.
- **Pulses: At JNPT (Mumbai) Port Container Report on August 31:** 144 Container of Pigeon Pea, 3 Container of Black Matpe, 68 Container of Moong, 339 Container of Chickpeas, 61 Container of Lentils, 365 Container of Yellow Peas, 67 Container of Green Peas, 24 Container of Red/Black Kidney Bean and 25 Container of Brown/Black Eye Bean.
- According to IBIS (provisional data), import of pulses in the week (22 August-28 August) was around 74.1 Thousand tonnes at major ports in India, around 39% higher than previous week's (15 August-21 August) import of 53.5 Thousand tonnes. Chickpea, Cow Pea, Lentil, Yellow Pea and Pigeon Pea were imported higher this week whereas Black Matpe, Green Pea, Kidney Bean and Green Gram were imported lower as compared to last week.
- According to the local trader of Jalgaon region of Maharashtra, new urad crop hits mandi in small amount. Crop quality is good and moisture level is between 16-17 %. At present, Urad new crop prices in the mandi is in the range of Rs 5500-6000 per bag with arrival of 100 bags per day. Higher crop arrival is expected in the coming days.
- Indian government has decided to import 90 Thousand tonnes of pulses for buffer stock. It will consist of 40 Thousand tonnes of Masur, 20 Thousand tonnes of Tur, 20 Thousand tonnes of Desi Chana and 10 Thousand tonnes of Urad. This decision might put more pressure on downward moving prices of pulses in India.
- According to the local trader of Gulbarga region of Karnataka, new urad crop start hitting the mandi in small quantity. Crop quality is good and moisture level in between 12-15 %. Urad new crop price range in Gulbarga mandi is between Rs 7000-8000 per quintal with arrival of 70-80 bags per day. Higher arrivals are expected to come after few days.

Pulses International Fundamental:

- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, 40 % Lentils and 64 % Peas has already been harvested. Harvesting activities is in full swing as rain has stopped. The majority of crop damage last week was due to prolonged flooding and disease. There are some reports of bleaching of pulses in the region.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast** 2016-17 is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.
- **According to the latest Statpub report, France pea export increased** by 210% to 42.16 Thousand MT in month of April from previous month of 13.60 Thousand MT and it is around 106% higher than 20.51 Thousand MT shipped during the same month last year. Total shipments clearance for ten months this year (July to April) is around 27.74 Lakh MT which is 105% higher than 12.06 Lakh MT shipped during the same month last year. Good demand from India and lower stock in domestic market due to lower production this year would continue to lend support to cash market in France and quotes are expected to remain stable to firm in the near term.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
