

### Pulses Domestic Fundamentals:

- *With favorable weather and higher kharif sowing coverage area(29.52 % to 143.95 lakh ha till 9th Sept)) under pulses Indian govt. expects over 22MMT pulses production in kharif and rabi collectively. According to agriculture department kharif production may reach 8.19 MMT. Peagion pea may jump to37 lakh tonne,46 % higher than last year. Urad production may increase by around 30 % to 18 lakh tonne. Moong production may reach14.5 lakh tonne. Australian Chana at mumbai port is being offered at Rs 5400/5500 per qtl. for Nov delivery. Importers have restricted import too. these developments would put downward pressure on pulses market in coming weeks.*
- *According to IBIS (provisional data), import of pulses in the week (29 August-04th Sept) was around 130.62 Thousand tonnes at major ports in India, around 76.19% higher than previous week's (16 August-28 August) import of 74.13 Thousand tones. Import of all pulses increased last week.*
- *According to IBIS, India imported 8520 tonne chana, 4440 tonne green pea,5134 tonne cow pea,2237 kidney bean,23259 tonne massor,1677 tonne urad,11796 tonne tur and 4054 tonne moong during week ended 4<sup>th</sup> Sept-2016.Besides ,69538 tonne yellow peas (matar) has been imported from Ukraine, France Myanmar and Canada.*
- *According to latest sowing report released by Government as on 09<sup>th</sup> September, 2016, Kharif sowing of pulses touched 143.95 lakh hectares which is around 29.12% higher than the corresponding period last year. Last year it was 111. 48 lakh hectares.*
- *Tur has been sown in 52.19 llakh ha. till 9<sup>th</sup> Sep, higher by 39.80 % from corresponding period last year. Normal area for whole kharif season is 40.05 lakh ha.Urad has been sown in 34.89 lakh ha,,so far,higher by 25.36 % than corresponding time last year. Normal area for whole kharif season is 24.39 lakh ha.Moong has been sown in 33.64 lakh ha till 9<sup>th</sup> Sep, higher by 32.70 % from last year. Normal area under moong in kharif season is 23.59 lakh ha. Crop condition is good and bumper production is expected this year. Pressure on price might be seen by the end of Sept.*
- *Govt has decided to increase buffer stock limit from 8 lakh tonne to 20 lakh tonne to keep pulses price under control and encourage farmers. The C C E Affairs(Cabinet Committee on Economic Affairs) has approved the proposal of Department of Consumer Affairs on enhancing the buffer stock for pulses up to 20 lakh tonnes. Out of 20 lakh tonne,10 lakh tonne would be sourced from domestic market and the rest 10 lakh tonne from import. The latest decision is very crucial as it would help to stabilize price in domestic market and ease tight supply side*
- *Chana cash market may stay steady to firm as demand in major bench mark markets improves. Besides, shipment from newly harvested crop in Australia is expected in second week of October. Weather condition in Australia has improved and smooth harvesting activities are expected now. However,quality issue is likely to emerge where crop is at maturity to harvesting stages Agriwatch expects prices to show steady to firm movement in coming days due to lower availability of chana in domestic market and higher demand. Australia September shipment is expected to reach in October therefore availability will be lower in coming days.*
- *Crop condition of moong in Rajasthan is in very good shape and traders expects bumper production this year.If govt. stays away from procurement, moong price may slip drastically-says traders. Arrival of moong may touch 25000 bags par day in Rajasthan. So pressure on price starts reflecting.*
