

### Pulses Domestic Fundamentals:

- According to latest sowing report released by Government as on 16<sup>th</sup> September, 2016, Kharif sowing of pulses touched 144.96 lakh hectares which is around 28.93% higher than the corresponding period last year. Last year it was 112.43 lakh hectares. Weather remains still crucial as higher rainfall may affect urad, moong and tur quality.
- Tur has been sown in 52.40 lakh ha. till 16<sup>th</sup> Sep, higher by 39.65 % from corresponding period last year. Normal area for whole kharif season is 40.05 lakh ha. Urad has been sown in 35.31 lakh ha., so far, higher by 25.16 % than corresponding time last year. Normal area for whole kharif season is 24.39 lakh ha. Moong has been sown in 33.87 lakh ha till 16<sup>th</sup> Sep, higher by 32.87 % from last year. Normal area under moong in kharif season is 23.59 lakh ha. Crop condition is good and bumper production is expected this year. Pressure on price might be seen by the end of Sept.
- The chief economic advisor led panel on pulses has advised govt. to announce higher MSP For chana to Rs 4000 per qtl. for rabi 2016. It has recommended to increase MSP for Urad and Tur to Rs 6000 per qtl for kharif 2017. Besides, it has suggested to procure pulses at war footing, create buffer stock of 20 MMT and direct states to delist pulses from APMC and provide subsidy to farmers. The report has insisted strongly that enhancing domestic productivity and production of pulses rapidly and sustainably is the only reliable way of minimizing volatility in pulse market. It has suggested elimination of export ban on pulses and stock limits also.
- The latest meeting of pulses importers and officials from central enforcement agencies including consumer affairs minister held at New Delhi concluded that importers of pulses will have to share their overseas contract details on monthly basis regularly from now. It includes schedule of import, quantity landing in India and release from warehouses. It would help govt to take necessary action to control market and intervene in any supply crisis situation. Govt. is trying to ensure sufficient supply at affordable price.
- Pulses importers have assured consumer affairs minister Ram Vilas Paswan that they would import entire quantity of pulses produced by Mozambique. India had signed an agreement regarding purchasing of pulses from this country in July this year. Importers have pointed out that the difference between wholesale and retail price should not be more than 10 to 12 percent. At present it is 20 to 32 % in many cities of India.
- New urad and moong started entering in Vidisha region of Ganjwasoda. Around 150 qtl. new Urad arrived and was traded in the range of Rs 6500 to Rs 7000 per qtl. Quality is normal. However, if rains continue it will affect quality. Moong is being traded at Rs 4500 to Rs 4800 per qtl. limited arrival was reported. Urad in Mumbai was traded at Rs 7500, up by Rs 100 per qtl. Steady to weak sentiment may prevail.
- Burmese CNF tur at Mumbai was quoted at \$975 per tonne, FAQ and SQ varieties were quoted at \$1210 & \$1240 per tonne. Lemon tur is being traded at Rs 7200 per qtl in Mumbai, up by Rs 100. Overall sentiment remains weak. Import of pulses has declined by 60.61 % from previous week (29 Aug to 4th Sep). Tur import has declined by 68.69 % to 3693 tonne. green pea import declined by 41.51 % to 2597 tonne. Total import during week ending 11th Sept declined from 130625 tonne to 51458 tonne.
- Australian chana at Mumbai traded at Rs 9000 per qtl, up by Rs 400 from previous day. Imported chana from Tanzania and Ethiopia were quoted at Rs 8800 and Rs 8400 per qtl. However, Oct/Nov delivery was being offered at Rs 5400 per qtl. Chickpeas production in Australia may touch 12.34 lakh tonne. It was around 10 lakh tonne last year. Field peas production would jump from 204,500 to 317,000 MT and lentils from 258,200 to 365,000 MT. It would put pressure on Indian market. difference is higher so price is bound to stay steady or decline.
- Sentiment remains weak for masoor too. It is being quoted at Rs 5200 to Rs 5400 per qtl in Mumbai market. Import has declined from 23259 to 4484 tonne during week ending 11 sept. Higher kharif production prospect too would restrict domestic masoor market in the weeks ahead.
- Canadian pea at Mumbai is being offered at Rs 2821 per qtl., higher by Rs 20 from previous day. China price reflects on matar. French origin matar is being offered at Rs 2701 and Russian origin matar is being offered at Rs 2610, almost unchanged from previous day. Sentiment remains steady to slightly weak. Overall sentiment for pulses market remains under pressure. Chana may rule steady while other pulses may trade weak in the short to medium term.

- Govt has decided to increase buffer stock limit from 8 lakh tonne to 20 lakh tonne to keep pulses price under control and encourage farmers. The C C E Affairs(Cabinet Committee on Economic Affairs) has approved the proposal of Department of Consumer Affairs on enhancing the buffer stock for pulses up to 20 lakh tonnes. Out of 20 lakh tonne, 10 lakh tonne would be sourced from domestic market and the rest 10 lakh tonne from import. The latest decision is very crucial as it would help to stabilize price in domestic market and ease tight supply side
- The State Trading Corporation of India Limited, New Delhi, has floated an Expression of Interest (EOI) for empanelment of foreign Suppliers of Pulses for supply to STC on long term basis. The EOI document is available on STC's website [www.stclimited.co.in](http://www.stclimited.co.in). The last date of submission of EOI documents to STC New Delhi is 1500 Hours of 19.09.2016.

#### **Pulses International Fundamental:**

- **As per latest update by Canadian grain commission**, season to date exports for chickpea total 600 MT, compared to 1500 MT during the previous marketing year. As on September 12, only 5 percent of the crop was in bin compared to 14 percent last year. In terms of quantity this represents almost 6000 MT of the new crop compared to 13000 MT at the same time last year. Commercial stock of chickpeas is around 8400 MT (3500 MT in Manitoba, 4600 MT in Saskatchewan, 300 MT in Alberta) and there are no chickpea in transit by rail to Canadian ports
- **Australia is heading towards bumper pulses production this year. ABARE has forecast 3.25 MMT pulses production higher by 7.4 lakh tonne from last year** Five year's average production in Australia is 24.3 lakh tonne. Chickpeas production may touch 12.34 lakh tonne. It was around 10 lakh tonne last year. Field peas production would jump from 204,500 to 317,000 MT and lentils from 258,200 to 365,000 MT.
- **As per latest updates by USA Lentil and dry pea council pulses yields in 2016** are extremely high with excellent quality. (0% of the crop looks like US# 1 grade. Both lentils green and red were seen with very good color and size. Green peas color is excellent and a good size. This year's US crop is one of the best crops both in quality and quantity. Official data is still awaited.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, 40 % Lentils and 64 % Peas has already been harvested. Harvesting activities is in full swing as rain has stopped. The majority of crop damage last week was due to prolonged flooding and disease. There are some reports of bleaching of pulses in the region.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast 2016-17** is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.

#### Canada Lentil Production Estimate

	<b>2014-2015</b>	<b>2015-2016[f]</b>	<b>2016-2017[f]</b>
<b>Area seeded (kha)</b>	1,263	1,597	2,080
