

Pulses Domestic Fundamentals:

- **Steady to slightly sentiment may prevail in cash pulses market except chana** in the short term. Bad weather in south India have affected arrivals and have lent support to cash market to some extent at current level. Arrivals from new crops are expected to pick up from second week of October. Overall inner tone remains weak.
- **Kharif pulses area has increased by 29.14 percent to 145.84 lakh ha till 23.09.2016.** Kharif sowing has entered in last phase now. Tur area increased by 40.21 percent to 52.89 lakh ha from last year. Urad area was registered at 35.48 lakh ha, higher by 25.33 percent this year. Moong area increased by 32.77 percent to 33.99 lakh ha. Kulthi and other pulses area increased by 10.14 & 10.35 percent respectively to 0.76 and 22.82 lakh ha. Higher area and normal crop condition ensure bumper kharif production this year.
- **Rains in Australian chana growing region and higher moisture level in field** have affected crop quality and damaged crop in some pockets there. It has increased price of chana by 30 to 50 Australian dollar. Myanmar local Urad FAQ is being quoted at \$1440/50 per tonne, Tur \$1108/15 per tonne. Mumbai tur opened at Rs 7000, BMP opened at Rs 8000 and chana opened at Rs 9200 per qtl. Burma CnF for tur was reported \$965, FAQ \$120 and SQ \$1255 per tonne.
- **Kharif pulses production is likely to recover smartly this season due to favorable weather and unexpected higher price level during sowing to harvesting season.** Harvesting of tur, urad and moong has already commenced and quality of the crop coming into mandis is normal to good. As per 1st advance estimate tur production would be higher by 47.83 % to 4.29 MMT from normal of 2.9 MMT (5 years ave). It would be 18.51 % higher than fixed target of 3.62 MMT for the year. Good production prospects in domestic and global level would continue to put pressure on Tur market in coming weeks.
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT (5 years ave) to 2.01 MMT.** It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.
- **Kharif moong production is expected to increase by 25.23 % from normal of 1.07 MMT (5 years ave) to 1.35 MMT this season.** It is higher by 10.66 % from the set target of 1.22 MMT. With increasing arrival pressure might be seen on cash market. However, procurement on MSP would continue to lend support if prices move down to Rs 5225 per qtl. Cash market may continue to trade near MSP in coming weeks.
- **Other kharif pulses including peas production too are expected to increase by 21.56 % to 1.06 MMT.** It would be higher by 40.63 % from the kharif production (0.67 MMT) of last year. Overall condition for other pulses seems under pressure. Production over 1 MMT would help easing supply side in the market.
- **The govt. extends stock limit on pulses by another one year till 30th Sep-2017.** The decision in this regard has been taken to control price rise and check hoarding. The union cabinet has given extension of stock limit on pulses. Almost all states seem in favor of stock limit on pulses. State governments can issue control orders with the concurrence of the central government on importers, millers, wholesalers and retailers as per requirements needed.
- **Chief economic advisor Arbind Subramaniam has recommended to adopt gm pulses as soon as possible.** It can boost yield to fill the gap of supply and demand in the country. After gm mustard, gm pulses can be produced at a large scale. Pulses production target set for 2020 is 23.5 million tonne (mt) and 27.5 mt by 2025.
- **The chief economic advisor led panel on pulses has advised govt. to announce higher MSP for chana to Rs 4000 per qtl. for rabi 2016.** It has recommended to increase MSP for Urad and Tur to Rs 6000 per qtl for kharif 2017. Besides, it has suggested to procure pulses at war footing, create buffer stock of 20 MMT.
- **The latest meeting of pulses importers and officials from central enforcement agencies including consumer affairs minister held at New Delhi concluded that importers of pulses will have to share their overseas contract details on monthly basis regularly from now.** It includes schedule of import, quantity landing in India and release from warehouses. It would help govt to take necessary action to control market and intervene in any supply crisis situation. Govt. is trying to ensure sufficient supply at affordable price.

Pulses International Fundamental:

- **According to Canadian grain commission (CGC) around 100MT of chickpeas were exported** in bulk through terminals and private elevators between September 12 and 18. Season to date exports total around 700 MT compared to 1600 MT in the previous marketing year. Around 10 percent of the crop is in the bin compared to 35 percent at the same time last year. This represents just 12000 MT of chickpeas compared to 32000 last year.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87MMT** for 2016-17 season. It is lower than the estimate of 3.23MMT pegged in August-2016. For the latest updation satellite data and computer image has been used. Feedback received from farmers has been ignored to some extent.
- **As per latest update by Canadian grain commission**, season to date exports for chickpea total 600 MT, compared to 1500 MT during the previous marketing year. As on September 12, only 5 percent of the crop was in bin compared to 14 percent last year. In terms of quantity this represents almost 6000 MT of the new crop compared to 13000 MT at the same time last year. Commercial stock of chickpeas is around 8400 MT (3500 MT in Manitoba, 4600 MT in Saskatchewan, 300 MT in Alberta) and there are no chickpea in transit by rail to Canadian ports
- **Australia is heading towards bumper pulses production this year. ABARE has forecast 3.25 MMT** pulses production higher by 7.4 lakh tonne from last year. Five year's average production in Australia is 24.3 lakh tonne. Chickpeas production may touch 12.34 lakh tonne. It was around 10 lakh tonne last year. Field peas production would jump from 204,500 to 317,000 MT and lentils from 258,200 to 365,000 MT.
- **As per latest updates by USA Lentil and dry pea council pulses yields in 2016** are extremely high with excellent quality. (0% of the crop looks like US# 1 grade. Both lentils green and red were seen with very good color and size. Green peas color is excellent and a good size. This year's US crop is one of the best crops both in quality and quantity. Official data is still awaited.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, 40 % Lentils and 64 % Peas has already been harvested. Harvesting activities are in full swing as rain has stopped. The majority of crop damage last week was due to prolonged flooding and disease. There are some reports of bleaching of pulses in the region.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fell near \$45/tonne in June as compared to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast 2016-17** is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.

Canada Lentil Production Estimate

Outlook: - Pulses prices are likely to trade steady to slightly weak. Pressure on moong, tur and urad might be seen in coming weeks. Chana may trade steady to slightly firm in the short term. Australian chana is being offered at Rs 5350 for Oct/Nov delivery in Mumbai. Imported chana may move up due to bad weather in Australia.
