

### Pulses Domestic Fundamentals:

- **Around 495 containers of pulses landed at JNPT during the week ended 29th Sep to 5th Oct-2015.** out of total pulses import chickpeas contributed 270 containers, followed by pigeon peas-126 containers, yellow peas contributed 50 containers. Also 23 containers lentil landed at port. As per market sources 16,500 tonne yellow peas is expected to arrive at Mumbai port in the beginning of second fortnight of October.
- **Rough weather in pulses producing states and festive demand continue to lend support to cash market.** Pressure from newly harvested crop is expected by the end of this month. Rains have delayed harvesting activities and arrivals in various markets and pushed price up. However, market may decrease when weather opens up. Current firmness would not sustain in coming weeks. Quality damage due to recent rains is being assessed in some parts of south India.
- **Govt. procurement agencies have procured 3740.47 tonne pulses during ongoing kharif season till 2nd Oct-2016.** The Central Government has directed FCI and NAFED to procure Kharif pulses from the farmers to ensure MSP for their crops. Moong and Urad are being procured by both agencies and more procurement centers have been planned in different producing states. So far, FCI has procured 1075.34 MT and NAFED 2665.13 MT pulses since the arrival of Kharif pulses during ongoing KMS 2016-17. The Government has set procurement target of 50,000 MT Kharif pulses during current KMS.
- **The government's advisory body on farm pricing CACP has recommended a sharp increase of up to Rs 475 per quintal in the minimum support price of pulses for the winter season.** It has suggested a sharp hike in the MSP of 'masoor' and gram (chana) by up to Rs 475 to Rs 3,800, and Rs 3900 per quintal respectively for the winter season.
- **The government has approved import of 1.7 lakh tonnes of pulses for buffer stock** in order to boost domestic supplies and keep prices in check. This quantity will include 80000 MT of Masoor and 90000 MT of Tur. Furthermore NCCF and NAFED have been asked by the Department of consumer affairs to sell Tur and Urad through their outlets in other cities other than Delhi. NCCF and NAFED are selling Tur at Rs. 105/Kg and Urad at Rs. 120/Kg.
- **According to SEBI, commodity derivatives exchange shall be allowed to introduce trading in options.** A total of 91 commodities will be added including Gram, Masoor, Moong and products, Moth, Peas, Tur/Arhar and Urad/Mash.
- **Continuous rains in chickpeas growing belts of Australia have started threatening** standing chana crop and its normal quality. Heavy rains in Australia are sparking fresh outbreaks of disease among chickpeas. Mumbai tur opened at Rs7100, BMP opened at Rs8200 and chana opened at Rs 9400 per qtl. Burmese tur cnf was quoted at \$995, faq \$1220 & sq \$1255 per tonne. Australian chana at Mumbai was quoted at Rs9750/9800 per qtl. Tanzanian and Ethiopian chana were quoted at Rs9600 and Rs 9400 per qtl. Chana prices may rule steady in domestic market.
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT (5 years ave) to 2.01 MMT.** It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.
- **Kharif moong production is expected to increase by 25.23 % from normal of 1.07 MMT (5 years ave) to 1.35 MMT this season.** It is higher by 10.66 % from the set target of 1.22 MMT. With increasing arrival pressure might be seen on cash market. However, procurement on MSP would continue to lend support if prices move down to Rs 5225 per qtl. Cash market may continue to trade near MSP in coming weeks.
- **The govt. extends stock limit on pulses by another one year till 30th Sep-2017.** The decision in this regard has been taken to control price rise and check hoarding. The union cabinet has given extension of stock limit on pulses. Almost all states seem in favor of stock limit on pulses. State governments can issue control orders with the concurrence of the central government on importers, millers, wholesalers and retailers as per requirements needed.

**Pulses International Fundamental:**

- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continues to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **According to Canadian grain commission (CGC) around 100MT of chickpeas were exported** in bulk through terminals and private elevators between September 12 and 18. Season to date exports total around 700 MT compared to 1600 MT in the previous marketing year. Around 10 percent of the crop is in the bin compared to 35 percent at the same time last year. This represents just 12000 MT of chickpeas compared to 32000 last year.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87MMT** for 2016-17 season. It is lower than the estimate of 3.23MMT pegged in August-2016. For the latest updation satellite data and computer image has been used. Feedback received from farmers has been ignored to some extent.
- **As per latest update by Canadian grain commission**, season to date exports for chickpea total 600 MT, compared to 1500 MT during the previous marketing year. As on September 12, only 5 percent of the crop was in bin compared to 14 percent last year. In terms of quantity this represents almost 6000 MT of the new crop compared to 13000 MT at the same time last year. Commercial stock of chickpeas is around 8400 MT (3500 MT in Manitoba, 4600 MT in Saskatchewan, 300 MT in Alberta) and there are no chickpea in transit by rail to Canadian ports
- **Australia is heading towards bumper pulses production this year. ABARE has forecast 3.25 MMT** pulses production higher by 7.4 lakh tonne from last year Five year's average production in Australia is 24.3 lakh tonne. Chickpeas production may touch 12.34 lakh tonne. It was around 10 lakh tonne last year. Field peas production would jump from 204,500 to 317,000 MT and lentils from 258,200 to 365,000MT.
- **As per latest updates by USA Lentil and dry pea council pulses yields in 2016** are extremely high with excellent quality. (0% of the crop looks like US# 1 grade. Both lentils green and red were seen with very good color and size. Green peas color is excellent and a good size. This years US crop is one of the best crops both in quality and quantity. Official data is still awaited.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, 40 % Lentils and 64 % Peas has already been harvested. Harvesting activities is in full swing as rain has stopped. The majority of crop damage last week was due to prolonged flooding and disease. There are some reports of bleaching of pulses in the region.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tones in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast 2016-17** is 1090 kilo tonnes which are around 8% higher than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.

- According to the apk-inform, Russia pea export during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.

**Outlook:** - Pulses prices are likely to trade steady to slightly weak except chana. Pressure on moong, tur and urad might be seen in coming weeks. Chana may trade steady to slightly firm in the short term. Australian chana is being offered at Rs 5350 for Oct/Nov delivery in Mumbai. Imported chana may move up due to bad weather in Australia.
