

### Pulses Domestic Fundamentals:

- **Australian chana in Mumbai is being quoted at Rs 10200/10300 per qtl.** Nov delivery is being quoted at Rs5600 per qtl. Tanzanian chana is being traded at Rs9500 per qtl. in Mumbai. Chana from Ethiopia is being quoted at Rs 9300. As there is a tight supply in domestic market chana price may move up once again. Loading for Australian chana may be delayed by 10 to 15 days as harvesting activities have been affected in Australia due to wet weather. So delivery is expected by end October/ November. It would influence chana price in domestic market.
- **Burma cnf tur quoted for Mumbai at \$865 per tonne while faq quoted at \$1180 per tonne.** sq variety was quoted at \$1230 per tonne. Black mapte opened at Rs 7500 per qtl in Mumbai. As new crop is coming into the mandi, pressure on price continues and cash market may decrease further in coming weeks.
- **Govt. is very keen to control essential commodities (pulses & sugar) prices** and has taken step to monitor retailers too. It has amended rules related to retail prices of Essential Commodities Act. In abnormal condition govt can fix retail prices of pulses and sugar now. Under prevailing system retail prices are directed directly from market forces and govt. has no room for intervening undue spikes. Consumer affair ministry has already notified amendments to the Legal Metrology (Packaged Commodities) Rules, 2011, to include a provision to fix retail price of any essential commodity.
- **As per the latest notification if retail sale price of any essential commodity is fixed** and notified by the competent authority under the Essential Commodities Act, 1955, the same will be applied on essential commodities that are sold both in loose and packaged form in retail markets.
- **India imported 578 containers pulses at JNPT port on 11th October-2016.** Out of total major share was of pigeon pea. Around 456 containers of pigeon pea was landed. Canadian chickpeas contribution was registered at 25 containers. Lentil contribution was registered at 28 containers. Besides, yellow peas, green peas black mapte contribution were registered at 7, 14 & black mapte at 45 containers respectively. There was no import of green moong. 3 containers of red/black kidney beans. have been imported too.
- **India imported around 195 containers pulses at Chennai & Krishnapatnam port from 26 to 29th Sept.- 2016.** Out of 195 containers share of black mapte was 67 containers, Tur white 72 containers, yellow peas 30, green moong beans 14, cow peas-3 black eye peas-9 containers. Container size is 20\*8.6'.
- **The government's advisory body on farm pricing CACP has recommended a sharp increase** of up to Rs 475 per quintal in the minimum support price of pulses for the winter season. It has suggested a sharp hike in the MSP of 'masoor' and gram (chana) by up to Rs 475 to Rs 3,800, and Rs 3900 per quintal respectively for the winter season.
- **The government has approved import of 1.7 lakh tonnes of pulses for buffer stock** in order to boost domestic supplies and keep prices in check. This quantity will include 80000 MT of Masoor and 90000 MT of Tur. Furthermore NCCF and NAFED have been asked by the Department of consumer affairs to sell Tur and Urad through their outlets in other cities other than Delhi. NCCF and NAFED are selling Tur at Rs. 105/Kg and Urad at Rs. 120/Kg.
- **According to SEBI, commodity derivatives exchange shall be allowed to introduce trading in options.** A total of 91 commodities will be added including Gram, Masoor, Moong and products, Moth, Peas, Tur/Arhar and Urad/Mash.
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT** (5 years ave) to 2.01 MMT. It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.
- **Kharif moong production is expected to increase by 25.23 % from normal of 1.07 MMT** (5 years ave) to 1.35 MMT this season. It is higher by 10.66 % from the set target of 1.22 MMT. With increasing arrival pressure might be seen on cash market. However, procurement on MSP would continue to lend support if prices move down to Rs 5225 per qtl. Cash market may continue to trade near MSP in coming weeks.
- **The govt. extends stock limit on pulses by another one year till 30th Sep-2017.** The decision in this regard has been taken to control price rise and check hoarding. The union cabinet has given extension of stock limit on pulses. Almost all states seem in favor of stock limit on pulses. State governments can issue control orders with the concurrence of the central government on importers, millers, wholesalers and retailers as per requirements needed.

**Pulses International Fundamental:**

- **Chickpeas export from Russia increased around 19 percent to 72800 tonne** from July to Sept-2016. Russia had exported around 60200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India import flow of chickpeas from various origin would continue to flow in coming months.
- **Harvesting of chickpea and pea in Australia is being affected by wet weather** and if rains continues exporters may face problem in supplying both pulses on scheduled time frame. Nov delivery may get delayed by 15 days or three weeks and it may support chickpea price in India once again in the short term. Pressure on packers may increase as it would be difficult to fill supply gap in shorter time span. New Pea crop has started hitting Australian market in smaller quantity now.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87MMT** for 2016-17 season. It is lower than the estimate of 3.23MMT pegged in August-2016. For the latest updation satellite data and computer image has been used. Feedback received from farmers has been ignored to some extent.
- **Australia is heading towards bumper pulses production this year. ABARE has forecast 3.25 MMT pulses** production higher by 7.4 lakh tonne from last year. Five year's average production in Australia is 24.3 lakh tonne. Chickpeas production may touch 12.34 lakh tonne. It was around 10 lakh tonne last year. Field peas production would jump from 204,500 to 317,000 MT and lentils from 258,200 to 365,000 MT.
- **As per latest updates by USA Lentil and dry pea council pulses yields in 2016** are extremely high with excellent quality. (0% of the crop looks like US# 1 grade. Both lentils green and red were seen with very good color and size. Green peas color is excellent and a good size. This year's US crop is one of the best crops both in quality and quantity. Official data is still awaited.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, 40 % Lentils and 64 % Peas has already been harvested. Harvesting activities are in full swing as rain has stopped. The majority of crop damage last week was due to prolonged flooding and disease. There are some reports of bleaching of pulses in the region.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonne in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fell near \$45/tonne in June as compared to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.

**Canada Lentil Production Estimate**

**Outlook:** - Pulses prices are likely to trade steady to slightly weak except chana. Pressure on moong, tur, masoor and urad might be seen in coming weeks. Chana may trade steady to slightly firm in the short term. Australian chana is being offered at Rs 5450 for Oct/Nov delivery in Mumbai. Imported chana may move up due to bad weather in Australia.
