

### Pulses Domestic Fundamentals:

- **With a view to ensure easy availability of dal and containing prices during festival season** cabinet secretary PK Sinha has reviewed availability and prices of essential commodities. states are being asked to impose stock limits and to carry de-hoarding drives to ensure easy availability at affordable price. PK Sinha has directed consumer affairs to consider all options to check the prices of all commodities. Besides, direction of distributing chana dal and other pulses through postal network too has been given.
- **Pulses import on JNPT port was reported 755 containers as on 19th, Oct-2016.** Out of total containers share of pigeon pea was 548, Chickpeas 118, green moong 60, yellow peas 29 containers. There was no import of green peas black kidney beans and black mape. Shipment from Australia is feared to be delayed by a month now.
- **As Chana prices are ruling higher due to short supply in local market govt. has decided** to import 90,000 T chana dal through MMTC. MMTC would soon float the tender for the same. The distribution of the chana dal and other pulses would be taken up through postal network as earlier decided. The centre had already decided to make a buffer stock of 2MMT pulses. Half out of total would be sourced from domestic market and half from overseas markets.
- **OATAM(Overseas Agro Traders Association Of Myanmar) has notified that all oatam members shall** henceforth offer and only sell Myanmar pulses to all buyers in south India basis payment terms: 10 % adv within 4 working days of contract date and balance DP at sight. This condition shall apply to all sales done to the ports of Chennai, Tuticorin, Krishanapatnam, Cochin, Vizag either directly with end buyers or through brokers.
- **This condition shall also apply to sales done through brokers located in places other than south India.** If the sale has option on discharge port like Nhava Sheva or Channai then the condition shall apply if chennai option is exercised by the buyers. Oatam members acknowledge that whilst a sale through the same broker or to the same buyers to NS port may not have the 10 % adv term as a condition it shall always apply for sales destined to south Indian ports.
- **Moong may trade stable at current level as other pulses prices are ruling higher.** Bulk consumers are turning to moong dal now. Import volume for pulses are lower except pea. lentil would continue to trade at current level. Overall outlook for pulses market remains stable except Chana and Urad. Australian Chana is expected in December now.
- **India imported 141844 tonne pulses during week ended 8th Oct-2016, higher by 26.61 %** from previous week. It had imported 112030 tonne pulses during week ended 02nd Oct. The highest quantity was of yellow peas out of total import during the week. India imported 117899 tonne yellow peas, 9750 tonne Tur and 4595 tonne chana. The rest were other pulses including kidney beans.
- **As per the latest notification if retail sale price of any essential commodity is** fixed and notified by the competent authority under the Essential Commodities Act, 1955, the same will be applied on essential commodities that are sold both in loose and packaged form in retail markets.
- **India imported 578 containers pulses at JNPT port on 11th October-2016.** Out of total major share was of pigeon pea. Around 456 containers of pigeon pea was landed. Canadian chickpeas contribution was registered at 25 containers. Lentil contribution was registered at 28 containers. Besides, yellow peas, green peas black mape contribution were registered at 7, 14 & black mape at 45 containers respectively. There was no import of green moong. 3 containers of red/black kidney beans. have been imported too.
- **The government has approved import of 1.7 lakh tonnes of pulses for buffer stock** in order to boost domestic supplies and keep prices in check. This quantity will include 80000 MT of Masoor and 90000 MT of Tur. Furthermore NCCF and NAFED have been asked by the Department of consumer affairs to sell Tur and Urad through their outlets in other cities other than Delhi. NCCF and NAFED are selling Tur at Rs. 105/Kg and Urad at Rs. 120/Kg.
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT (5 years ave) to 2.01 MMT.** It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.
- **The govt. extends stock limit on pulses by another one year till 30th Sep-2017.** The decision in this regard has been taken to control price rise and check hoarding. The union cabinet has given extension of

stock limit on pulses. Almost all states seem in favor of stock limit on pulses. State governments can issue control orders with the concurrence of the central government on importers, millers, wholesalers and retailers as per requirements needed.

#### **Pulses International Fundamental:**

- **Chickpea crop in Canada is said to be affected and concern over quality has increased now.** Firm tone continued in local market and market may trade steady in coming weeks too despite expectation of more arrival in coming weeks. India and Mexican crop is far ahead and till then Australia, Canada and Ukraine/Russia have to bridge the gap. By mid October only 25% chick pea crop in Canada has been harvested. So, quality concern has increased and major portion of crop may be used for feed purpose. Currently Chickpea is being quoted at 53 cent(Canadian \$) per lb in Canada.
- **According to Canadian Grain Commission Canada Exported 23,500 T peas and 5,900 T lentil** during the week ended 9th Oct.-2016. Export volume has decreased from previous week. Rains and higher moisture level in field of standing crop have affected normal harvesting activities. However, mostly harvested crops are off the field. Peas and lentil(10%) are still in the field. Chickpeas are still waiting for dry weather.
- **Chickpeas export from Russia increased around 19 percent to 72800 tonne** from July to Sept-2016. Russia had exported around 60200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India import flow of chickpeas from various origin would continue to flow in coming months.
- **Harvesting of chickpea and pea in Australia is being affected by wet weather** and if rains continue exporters may face problem in supplying both pulses on scheduled time frame. Nov delivery may get delayed by 15 days or three weeks and it may support chickpea price in India once again in the short term. Pressure on packers may increase as it would be difficult to fill supply gap in shorter time span. New Pea crop has started hitting Australian market in smaller quantity now.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87MMT** for 2016-17 season. It is lower than the estimate of 3.23MMT pegged in August-2016. For the latest updation satellite data and computer image has been used. Feedback received from farmers has been ignored to some extent.
- **As per latest updates by USA Lentil and dry pea council pulses yields in 2016** are extremely high with excellent quality. (0% of the crop looks like US# 1 grade. Both lentils green and red were seen with very good color and size. Green peas color is excellent and a good size. This year's US crop is one of the best crops both in quality and quantity. Official data is still awaited.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonne in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fell near \$45/tonne in June as compared to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.

**Outlook:** - Pulses prices are likely to trade steady to slightly weak except Chana and Urad. Pressure on moong, tur, and masoor might be seen in coming weeks. Chana may trade steady to slightly firm in the short to medium term. Australian chana is being offered at Rs 6000/6100 for Dec delivery in Mumbai. Imported chana may move up due to bad weather in Australia and delayed shipments.
