

### **Pulses Domestic Fundamentals:**

- **Tur opened at Rs 6100 per qtl. in Mumbai yesterday while Urad traded at Rs7500 per qtl.** Chana traded down to Rs 10700/10800 per qtl in Mumbai. Burmese Tur quoted at \$860 per qtl while faq variety was quoted at \$ 1150 per tonne. Trading activities remain sluggish due to nearing Diwali festival. Major markets will remain closed till Monday.
- **Govt agencies like FCI,NAFED & SFAC have been engaged in procuring kharif pulses this season and their target has been fixed at 50,000 tonne.** So far(as on October 25)involved agencies have procured 34,546.69 tonnes of Moong and Urad. It is around 71 % of the fixed target. Major portion have been brought by NAFED (23510.13 tonne, followed by FCI 8186.71 tonne and SFAC 2869.85 tonne. These agencies are procuring pulses through 200 procurement centers.
- **MP Govt has decided to end stock limit on pulses. Notification regarding this is** expected in next two-three days. Till now big traders in state can't stock 2000 qtl. of pulses. It was 1000 qtl for small traders. Due to imposition of stock limit traders were unable to participate in tenders for imported pulses by MMTC and NCF. Now participation is expected to increase.
- **With favorable season throughout the growing season and higher prices during** planting months area under kharif pulses increased by 25 to 30 percent and it has boosted production considerably. As per govt.'s estimate kharif pulses production may increase by 57 percent to 8.7 million tonne. It was 5.54 MMT last year. Higher production is expected to ease supply this MY. Besides, there is ample stock in global market and prices have decreased considerably in last two months. There is good rabi prospects too that would continue to restrict uptrend in cash pulses market.
- **India imported 703 containers pulses at Chennai port during 11th to 15th October-2016.** It had imported 337 containers during previous week. Major portion of imported pulses includes 341 containers Urad, 217 containers Tur White and 75 containers Lentil. Yellow pea and Chickpea contributed 29 and 13 containers respectively. Import increased over 100 % from previous week. higher volume of import is likely to continue as global price s have decreased considerably in last two months on the back of bumper production.
- **India imported 111030 tonne pulses during week ended 16th Oct-2016, lower by 21.72 %** from previous week .It had imported 141844 tonne pulses during week ended 08<sup>th</sup> Oct. The highest quantity was of yellow peas out of total import during the week. India imported 71991 tonne yellow peas, 15656 tonne Tur and 10119 tonne chana. The rest were other pulses including kidney beans.
- **Pulses import on JNPT port was reported 755 containers as on 19th, Oct-2016.** Out of total containers share of pigeon pea was 548, Chickpeas 118, green moong 60, yellow peas 29 containers. There was no import of green peas black kidney beans and black mapte. Shipment from Australia is feared to be delayed by a month now.
- **Moong may trade stable at current level as other pulses prices are ruling higher.** Bulk consumers are turing to moong dal now. Import volume for pulses is lower except pea. lentil would continue to trade at current level. Overall outlook for pulses market remains stable except Chana and Urad. Australian Chana is expected in December now.
- **As per the latest notification if retail sale price of any essential commodity is** fixed and notified by the competent authority under the Essential Commodities Act, 1955, the same will be applied on essential commodities that are sold both in loose and packaged form in retail markets.
- **India imported 578 containers pulses at JNPT port on 11th October-2016.** Out of total major share was of pigeon pea. Around 456 containers of pigeon pea was landed. Canadian chickpeas contribution was registered at 25 containers. Lentil contribution was registered at 28 containers. Besides, yellow peas, green peas black mapte contribution were registered at 7, 14 & black mapte at 45 containers respectively. There was no import of green moong. 3 containers of red/black kidney beans. have been imported too .
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT** (5 years ave) to 2.01 MMT. It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.

**Pulses International Fundamental:**

- **Canadian government has increased** its forecast for dry beans and chickpea prices as Indian government has stepped in to control prices. In case of chickpeas, prices to farmers are expected to rise between Can\$950-\$980 per tonne for 2016-17 compared to last month estimates of Can\$790-\$820 per tonne. This forecast is also higher by around Can\$135 per tonne compared to last year. The rise in forecast is mainly due to strong export demand.
- **Chickpea crop in Canada is said to be affected and concern over quality has increased** now. Firm tone continued in local market and market may trade steady in coming weeks too despite expectation of more arrival in coming weeks. India and Mexican crop is far ahead and till then Australia, Canada and Ukraine/Russia have to bridge the gap. By mid October only 25% chick pea crop in Canada has been harvested. So, quality concern has increased and major portion of crop may be used for feed purpose. Currently Chickpea is being quoted at 53 cent (Canadian \$) per lb in Canada.
- **According to Canadian Grain Commission Canada Exported 23,500 T peas and 5,900 T lentil** during the week ended 9th Oct.-2016. Export volume has decreased from previous week. Rains and higher moisture level in field of standing crop have affected normal harvesting activities. However, mostly harvested crops are off the field. Peas and lentil (10%) are still in the field. Chickpeas are still waiting for dry weather.
- **Chickpeas export from Russia increased around 19 percent to 72,800 tonne** from July to Sept-2016. Russia had exported around 60,200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia, Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India, import flow of chickpeas from various origin would continue to flow in coming months.
- **Harvesting of chickpea and pea in Australia is being affected by wet weather** and if rains continue, exporters may face problem in supplying both pulses on scheduled time frame. Nov delivery may get delayed by 15 days or three weeks and it may support chickpea price in India once again in the short term. Pressure on packers may increase as it would be difficult to fill supply gap in shorter time span. New Pea crop has started hitting Australian market in smaller quantity now.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87 MMT** for 2016-17 season. It is lower than the estimate of 3.23 MMT pegged in August-2016. For the latest updation, satellite data and computer imagery has been used. Feedback received from farmers has been ignored to some extent.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonne in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fell near \$45/tonne in June as compared to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.

### Canada Lentil Production Estimate

	<b>2014-2015</b>	<b>2015-2016[f]</b>	<b>2016-2017[f]</b>
<b>Area seeded (kha)</b>	1,263	1,597	2,080
<b>Area harvested (kha)</b>	1,217	1,589	2,050
<b>Yield (t/ha)</b>	1.63	1.49	1.59
<b>Production (kt)</b>	1,987	2,373	3,255
