

Pulses Domestic Fundamentals:

- **Sowing of Rabi season is about to begin now. Farmers are engaged in field preparation** under congenial weather condition throughout the country. The cabinet is expected to pay heed on a proposal to hike MSP for Rabi pulses by Rs 600 per qtl. Including a bonus of Rs 200 per qtl over and above MSP. The concerned ministry has accepted all the recommendations of the CACP for the 2016-17 winter crops except pulses. MSP for chana including bonus may be RS 4000 per qtl. for ongoing season. The ministry had fixed MSP for Massor and Gram at Rs 3500 and RS 3400 per qtl. including a bonus of Rs 75 per qtl.
- **As monsoon has been favorable so far, govt has fixed 207.5 lakh tonne production target for pulses this year.** It expects 135 lakh tonne pulses production from Rabi season while kharif pulses production is expected to touch 87 lakh tonne. Production of Moong, Urad and Tur has increased considerably due to higher area coverage and congenial weather condition.
- **Cash pulses market traded weak due to sluggish trading activities after Diwali** and pressure on price continues. Chana traded below Rs 9500 in Delhi. Urad too traded lower despite hampered arrival in the mandis. Pea, Tur, Masur and Moong traded lower. Overall market sentiment remains weak. Fresh demand is expected from second week of Nov and it may support price once again at lower level. Overall outlook remains weak.
- **India imported 918 containers pulses at JNPT port** as on 28th October-2016. Out of total major share was of pigeon pea. Around 624 containers of pigeon pea were landed. Chickpeas contribution was registered at 88 containers. Lentil contribution was registered at 36 containers. Besides, yellow peas, green peas and black eye beans contribution were registered at 15, 30 and at 81 containers respectively. There was no import of green Black mape.
- **India imported 571 containers pulses at Chennai port during 17th to 20th October-2016.** It had imported 703 containers during previous week. Major portion of imported pulses includes 274 containers Urad, 162 containers Tur Whole and 43 containers Lentil. Yellow pea and Chickpea contributed 42 and 8 containers respectively. Import decreased by 18.77 % from previous week. Higher volume of import is likely to continue as global prices have decreased considerably in last two months on the back of bumper production.
- **India imported 131377 tonne pulses during 17 to 23rd Oct-2016, higher by 19.40 % from previous week.** It had imported 110030 tonne pulses during week ended 16th Oct. The highest quantity was of yellow peas out of total import during the week. India imported 80350 tonne yellow peas, 20766 tonne Tur and 7227 tonne chana. The rest were other pulses including kidney beans.
- **Tur opened at Rs 6100 per qtl. in Mumbai previous day while Urad traded at Rs 7500 per qtl.** Chana traded down to Rs 10700/10800 per qtl in Mumbai. Burmese Tur quoted at \$860 per qtl while faq variety was quoted at \$ 1150 per tonne. Trading activities remain sluggish due to nearing Diwali festival. Major markets will remain closed till Monday.
- **Govt agencies like FCI, NAFED & SFAC have been engaged in procuring kharif pulses this season** and their target has been fixed at 50,000 tonne. So far (as on October 25) involved agencies have procured 34,546.69 tonnes of Moong and Urad. It is around 71 % of the fixed target. Major portion have been brought by NAFED (23510.13 tonne, followed by FCI 8186.71 tonne and SFAC 2869.85 tonne. These agencies are procuring pulses through 200 procurement centers.
- **MP Govt has decided to end stock limit on pulses. Notification regarding this is** expected in next two-three days. Till now big traders in state can't stock 2000 qtl. of pulses. It was 1000 qtl for small traders. Due to imposition of stock limit traders were unable to participate in tenders for imported pulses by MMTC and NCF. Now participation is expected to increase.
- **As per the latest notification if retail sale price of any essential commodity is** fixed and notified by the competent authority under the Essential Commodities Act, 1955, the same will be applied on essential commodities that are sold both in loose and packaged form in retail markets.
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT (5 years ave) to 2.01 MMT.** It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.

Pulses International Fundamental:

- **Canadian government has increased its forecast for dry beans and chickpea** prices as Indian government has stepped in to control prices. In case of chickpeas, prices to farmers are expected to rise between Can\$950-\$980 per tonne for 2016-17 compared to last month estimates of Can\$790-\$820 per tonne. This forecast is also higher by around Can\$135 per tonne compared to last year. The rise in forecast is mainly due to strong export demand.
- **Chickpea crop in Canada is said to be affected and concern over quality has** increased now. Firm tone continued in local market and market may trade steady in coming weeks too despite expectation of more arrival in coming weeks. India and Mexican crop is far ahead and till then Australia, Canada and Ukraine/Russia have to bridge the gap. By mid October only 25% chick pea crop in Canada has been harvested. So, quality concern has increased and major portion of crop may be used for feed purpose. Currently Chickpea is being quoted at 53 cent (Canadian \$) per lb in Canada.
- **According to Canadian Grain Commission Canada Exported 23,500 T peas and 5,900 T lentil** during the week ended 9th Oct.-2016. Export volume has decreased from previous week. Rains and higher moisture level in field of standing crop have affected normal harvesting activities. However, mostly harvested crops are off the field. Peas and lentil (10%) are still in the field. Chickpeas are still waiting for dry weather.
- **Chickpeas export from Russia increased around 19 percent to 72,800 tonne** from July to Sept-2016. Russia had exported around 60,200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia, Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India, import flow of chickpeas from various origin would continue to flow in coming months.
- **Harvesting of chickpea and pea in Australia is being affected by wet weather** and if rains continue, exporters may face problem in supplying both pulses on scheduled time frame. Nov delivery may get delayed by 15 days or three weeks and it may support chickpea price in India once again in the short term. Pressure on packers may increase as it would be difficult to fill supply gap in shorter time span. New Pea crop has started hitting Australian market in smaller quantity now.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87 MMT** for 2016-17 season. It is lower than the estimate of 3.23 MMT pegged in August-2016. For the latest updation, satellite data and computer imagery has been used. Feedback received from farmers has been ignored to some extent.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonne in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fell near \$45/tonne in June as compared to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
