

Pulses Domestic Fundamentals:

- **Pressure on pulses market is likely to continue as demand from retailers end** weakened now. Govt. has a close eye on market developments and various steps are being taken to curb market including pulses sale(chana) from central pool through tender by FCI. Arhar, Urad, Moong, Lentil and chana including peas reeled under pressure and traded considerably down.
- **Sowing of Rabi crops started with sluggish note in comparison to last year.** It generally starts in Oct and ends in January. Lower coverage area under Chana and Lentil has impacted total Rabi planted area this season in the beginning of planting stages. Sowing of pulses was down at 24.16 lakh ha (30.07 lakh ha). However, planting process is likely to increase in coming weeks and area coverage, specially for chana is bound to increase due to higher prices and Likely Rs 4000 per qtl. MSP.
- **However, Chana and Lentil may trade steady as supply side is tight and import flow is lower.** Sowing of Chana and Lentil is likely to begin now. Lentil may trade up as Crop in Australia is said to be damaged by 50 percent in two states. It would reduce the size of crop by 10 to 15 percent and new crop in India would be available after four months. Imported chana from Australia would not be available before the end of this month. Other pulses too may trade steady to slightly weak.
- **Imported Tur in Mumbai Opened at Rs 5800/5850 per qtl. while Urad and Chana** quoted at Rs 7500 and 9900/10000 per qtl. respectively. Tur quoted in Burma At \$790 (CNF Mumbai) per tonne, FAQ \$1125 and SQ \$1185 per tonne. Lower quotes in forward delivery may pressurize Tur and Urad further. Arrival from domestic market too is bound to increase. So outlook remains weak for these pulses.
- **The empanelled buyers of FCI for wheat and rice, buyers of NAFED, SFAC and NCDEX** having necessary licenses of trading and statutory approvals for purchase of pulses as per pre requisites for bidding as mentioned in the contract note will be allowed to participate in the e-auction of pulses to be conducted by NeML for FCI. NeML shall also communicate the bidder's information to FCI as per the Annexure-I of the contract note of NAFED. NeML shall also give notice of e-auction to the above mentioned buyers as well as FCI HQ/Zos/ROs concerned by e-mail as well as upload it on its website.
- **India imported 147395 tonne pulses during 24 to 30th Oct-2016, higher by 12.19 %** from previous week. It had imported 131377 tonne pulses during week ended 23rd Oct. The highest quantity was of yellow peas out of total import during the week. India imported 74902 tonne yellow peas, 40192 tonne Tur, 10472 tonne Urad and 8050 tonne Chana. The rest were other pulses including kidney beans.
- **India imported 918 containers pulses at JNPT port** as on 28th October-2016. Out of total major share was of pigeon pea. Around 624 containers of pigeon pea were landed. Chickpeas contribution was registered at 88 containers. Lentil contribution was registered at 36 containers. Besides, yellow peas, green peas and black eye beans contribution were registered at 15, 30 and at 81 containers respectively. There was no import of green Black mapte.
- **As monsoon has been favorable so far, govt has fixed 207.5 lakh tonne production** target for pulses this year. It expects 135 lakh tonne pulses production from Rabi season while kharif pulses production is expected to touch 87 lakh tonne. Production of Moong, Urad and Tur has increased considerably due to higher area coverage and congenial weather condition.
- **MP Govt has decided to end stock limit on pulses. Notification regarding this is** expected in next two-three days. Till now big traders in state can't stock 2000 qtl. of pulses. It was 1000 qtl for small traders. Due to imposition of stock limit traders were unable to participate in tenders for imported pulses by MMTC and NCF. Now participation is expected to increase.
- **As per the latest notification if retail sale price of any essential commodity is** fixed and notified by the competent authority under the Essential Commodities Act, 1955, the same will be applied on essential commodities that are sold both in loose and packaged form in retail markets.

Pulses International Fundamental:

- **News Of crop damage (Lentil) in Australia and good export demand for Canadian** Lentil have lent support to red Lentil, Laird 1S despite better production estimates. Prices of Lentil in Canada have increased 3 to 4 cent per pound to 62/63 in last one week. However, Chickpeas traded steady at current level of 53 cents a pound. Yellow peas too traded steady at 8 cents per pound. Its impact on Indian market may be felt in the weeks ahead.
- **The Canadian Grain Commission latest report based on latest sample** result says that protein content in Lentil crop is higher by 0.9 % to 26.6 % this year against 25.7 last year. The result has been concluded by surveying green and red varieties collected from two major producing states like Saskatchewan and Alberta. Higher protein content found in Lentil is encouraging and the main reason for this is attributed to better weather conditions in growing regions. Despite higher protein content steady price trend may prevail as supply side is ample.
- **Canadian government has increased its forecast for dry beans and chickpea** prices as Indian government has stepped in to control prices. In case of chickpeas, prices to farmers are expected to rise between Can\$950-\$980 per tonne for 2016-17 compared to last month estimates of Can\$790-\$820 per tonne. This forecast is also higher by around Can\$135 per tonne compared to last year. The rise in forecast is mainly due to strong export demand.
- **According to the latest update by market viewers in Australia, Lentil** crop in some parts of western Australia has been affected by severe outbreaks of botrytis grey mould. Experts say that South Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.
- **Chickpea crop in Canada is said to be affected and concern over quality has** increased now. Firm tone continued in local market and market may trade steady in coming weeks too despite expectation of more arrival in coming weeks. India and Mexican crop is far ahead and till then Australia, Canada and Ukraine/Russia have to bridge the gap. By mid October only 25% chick pea crop in Canada has been harvested. So, quality concern has increased and major portion of crop may be used for feed purpose. Currently Chickpea is being quoted at 53 cent (Canadian \$) per lb in Canada.
- **According to Canadian Grain Commission Canada Exported 23,500 T peas and 5,900 T lentil** during the week ended 9th Oct.-2016. Export volume has decreased from previous week. Rains and higher moisture level in field of standing crop has affected normal harvesting activities. However, mostly harvested crops are off the field. Peas and lentil (10%) are still in the field. Chickpeas are still waiting for dry weather.
- **Chickpeas export from Russia increased around 19 percent to 72800 tonne** from July to Sept-2016. Russia had exported around 60200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India import flow of chickpeas from various origin would continue to flow in coming months.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonne in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fell near \$45/tonne in June as compared to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
Area seeded (kha)	1,263	1,597	2,080
