

### Pulses Domestic Fundamentals:

- **Chana coverage area has been recorded at 34.32 lakh ha against normal of 88.37 lakh ha this year till 11th November.** It is higher by 25.90 percent from last year so far. Lentil area has been recorded at 4.76 lakh ha, higher by 32.18 % from normal of 14.79 lakh ha. It was 2.09 lakh ha last year till date. Pea and Urad area has been reported at 3.75 and 1.91 lakh ha so far. India had covered 1.12 and 1.94 lakh ha last year till date. Moong is lagging behind marginally from last year at 0.48 lakh ha.
- **Total coverage under pulses has been recorded at 49.24 lakh ha against 37.25 last year in the corresponding time.** There is a fear in the market that rabi pulses area may decline due to cash crunch in the market. If flow of money increases in next 10 days, farmers can make up coverage area. So far, progressive sowing is on right track.
- **The Cabinet has set new new MSP for Rabi crops currently under planting phase.** As prices of pulses are ruling higher farmers have opted to increase area under Chana and Lentils this year. Despite disturbances on cash front due to demonetization they are managing fertilizers/other inputs at local level. They have retined seed and are using it as much as possible.
- **India produces around 18 MMT pulses against 22MMT domestic consumption.** The gap is filled with import. Chana MSP has been increased to Rs 4000 per qtl while Masur MSP has been raised to Rs 3950 per qtl. (previous Rs3400) The govt has raised Rs550 per qtl including bonus for Chana. It is almost 16 % hike for Chana and Masur.
- **Imported Tur in Mumbai Opened at Rs 5700/5750 per qtl. while Urad and Chana** quoted at Rs 7500 and 9500/9600 per qtl. respectively. Tur quoted in Burma At \$760 (CNF Mumbai) per tonne, FAQ \$1115 and SQ \$1175 per tonne. Lower quotes in forward delivery may pressurize Tur and Urad further. Arrival from domestic market too is bound to increase. So outlook remains weak for these pulses.
- **Price of yellow pea has plummeted to \$300 a tonne from \$380 a tonne in last three weeks.** Yellow peas from Canada, Russia and Ukraine as also new chickpea crop from Australia have begun to arrive on Indian shores says market experts. Yellow pea import in next three months including Nov may touch 15 lakh tonne. It will ease the tight supply side and augment availability. Australian chickpeas are offered at around \$850 a tonne.
- **India imported 244024 tonne pulses during 31Oct to 6<sup>th</sup> Nov-2016, higher by 65.55 % from previous week.** It had imported 147395 tonne pulses during week ended 30<sup>th</sup> Oct. The highest quantity was of yellow peas out of total import during the week. India imported 164472 tonne yellow peas, 24382 tonne Tur, 9964 tonne Urad and 10295 tonne Chana. During this period 28696 T Lentils has been imported. The rest were other pulses including kidney bean
- **According to IBIS (provisional data), import of pulses in Oct. (till 30<sup>th</sup>) was recorded** around 6.17 Lakh tonnes at major ports in India, around 108.44 % higher than Sept which was around 2.96 Lakh tonnes. Yellow Pea and Tur were imported in higher quantity during the month under review whereas, Moong, Urad and Chana were imported in lower volume. However, it was higher than Sept. Overall sentiments for pulses remains weak.
- **India imported 918 containers pulses at JNPT port** as on 28th October-2016. Out of total major share was of pigeon pea. Around 624 containers of pigeon pea were landed. Chickpeas contribution was registered at 88 containers. Lentil contribution was registered at 36 containers. Besides, yellow peas, green peas and black eye beans contribution were registered at 15, 30 and at 81 containers respectively. There was no import of green Black mapte.
- **As monsoon has been favorable so far, govt has fixed 207.5 lakh tonne production target for pulses this year.** It expects 135 lakh tonne pulses production from Rabi season while kharif pulses production is expected to touch 87 lakh tonne. Production of Moong, Urad and Tur has increased considerably due to higher area coverage and congenial weather condition.

**Pulses International Fundamental:**

- **USA has exported 189,436 MT pulses in the month of Sept.** Out of it pea contribution was recorded at 98,779 MT. It has exported total 62,400 MT Lentils, higher than record export of 41,961 MT recorded in April, 2013. Chickpea exports exploded for the month, hitting 28,257 MT, an amazing 130% higher than the prior one-month record of 12,290 MT set in October 2011.
- **India was the largest taker of green peas, yellow peas, and even split peas.** Overall, India accounted for 74,000 MT of the total of 98,000 MT exported. China was a distant second at 5,000 MT. At Lentil front India brought 19,000 MT from Canada. Canada has used US Lentil to upgrade its crop. India took 20,607 MT of US chickpeas for the month of September 2016, or 73% of our total chickpea exports.
- **This year production of Lentils in US is up by 136 % to 5.64 lakh tonne** due higher planted area that increased by 90 % to 9.35 lakh acres. Actual harvesting has been reported 9.17 lakh acres. States like Montana, North Dakota, and the United States have recorded record area. Average yield is expected to be 1,356 pounds per acre, up 248 pounds from 2015.
- **News Of crop damage (Lentil) in Australia and good export demand for Canadian Lentil** have lent support to red Lentil, Laird 1S despite better production estimates. Prices of Lentil in Canada have increased 3 to 4 cent per pound to 62/63 in last one week. However, Chickpeas traded steady at current level of 53 cents a pound. Yellow peas too traded steady at 8 cents per pound. Its impact on Indian market may be felt in the weeks ahead.
- **According to the latest update by market viewers in Australia, Lentil crop** in some pockets of western Australia has been affected by severe outbreaks of botrytis grey mould. Experts say that South Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.
- **Chickpeas export from Russia increased around 19 percent to 72,800 tonne** from July to Sept-2016. Russia had exported around 60,200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India import flow of chickpeas from various origin would continue to flow in coming months.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.

**Canada Lentil Production Estimate**

	<b>2014-2015</b>	<b>2015-2016[f]</b>	<b>2016-2017[f]</b>
<b>Area seeded (kha)</b>	1,263	1,597	2,080
