

### Pulses Domestic Fundamentals:

- **Overall sentiments in cash pulses market remains weak as higher volume** of import (around 1.5 to 2 MMT is due to arrive at various Indian ports by December end. Besides, There is good prospects for rabi production after bumper kharif. It would pressurize pulses market further. Moong and Lentil may trade steady while other pulses including peas may decrease from current level. There is no buyers for bulk volume due to cash crunch. So weak demand is expected to prevail in coming weeks.
- **Chana area coverage is running ahead by 1.97 % from last year on all India basis** to 53.73 lakh ha as on 18.11.2016. Major increase has been seen in Rajasthan, Uttar Pradesh and Madhya Pradesh. It is running behind in AP, Karnataka and Maharashtra by 41.44 and 33 % respectively so far. Sowing activities are expected to increase this week as farmers can buy seed from old note now.
- **At Lentils sowing front progressive coverage area has been reported at 6.49 lakh ha till 18<sup>th</sup> November-2016.** It is 33.26 % higher from last year till date. Normal area under Lentils is 14.79 lakh ha. In Bihar sowing is lagging behind by 52 % so far. This shortfall has been covered by other states like Uttar Pradesh and Madhya Pradesh.
- **India imported 283426 tonne pulses during 6<sup>th</sup> to 13 Nov-2016, higher by 16.14 %** from previous week. It had imported 244024 tonne pulses during week ended 6<sup>th</sup> Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043 tonne Urad and 11358 tonne Chana. During this period. Besides, 33206 T Lentils has been imported. The rest were other pulses including kidney beans.
- **India imported 1002 containers pulses at JNPT port** as on 21<sup>st</sup> Nov-2016. Out of total major share was of pigeon pea. Around 874 containers of pigeon pea were landed. Chickpeas contribution was registered at 92 containers. Lentil contribution was registered at 20 containers. Besides black eye beans contribution was only 3 containers.
- India imported 254 containers pulses at Chennai and Krishnapatnam ports from 7 to 10<sup>th</sup> Nov-2016. Out of total share of Urad was 57 containers, Tur 52 containers, Lentils 42 containers, Yellow peas -25 and Chana -6 containers. Import flow has increased and higher volume would continue till December.
- **As per latest update by consumer affair ministry govt. will try to procure 2MMT pulses** by June next year for buffer stock and sell it in domestic market in case prices rise and supply situation gets tight. Govt has procured 6 lakh tonne pulses so far and the rest will be procured in next 6/7 months including one MMT from global markets. Pulses production is estimated to cross 20 MMT in 2016-17. In current MY India has imported around 3.5 MMT pulses in which PSU contribution is around 4 Lakh tonne so far. Likely Bumper production in ongoing Rabi season would ease pressure at supply front and import volume may decrease in the medium term.
- **By December end Prices are expected to decrease more as around 20-22 lakh tonnes** of Chana, Masur and Tur would reach at Indian ports from Australia, Canada, Myanmar and Africa. Prevailing market conditions have increased fears of importers regarding sale of imported pulses in domestic market. New arrivals, imported large volume and sluggish demand would put more pressure on domestic dal market and prices may dip 10 to 15 % more from current level. Besides after bumper kharif crop Rabi sowing is running ahead by 6 percent and there is good production prospect so far.
- **India produces around 18 MMT pulses against 22MMT domestic consumption.** The gap is filled with import. Chana MSP has been increased to Rs 4000 per qtl while Masur MSP has been raised to Rs 3950 per qtl. (previous Rs 3400) The govt has raised Rs 550 per qtl including bonus for Chana. It is almost 16 % hike for Chana and Masur.
- **Imported Tur in Mumbai Opened at Rs 5700/5750 per qtl. while Urad and Chana** quoted at Rs 7500 and 9500/9600 per qtl. respectively. Tur quoted in Burma At \$760 (CNF Mumbai) per tonne, FAQ \$1115 and SQ \$1175 per tonne. Lower quotes in forward delivery may pressurize Tur and Urad further. Arrival from domestic market too is bound to increase. So outlook remains weak for these pulses.

### Pulses International Fundamental:

- **Chickpeas import from US In India is increasing fast. India imported 20607 MT Chickpeas in Sept and Volume is expected to be higher in Oct. Data is awaited. Surprisingly, it is 73 % of total Chickpeas export from US in a month. Turkey and Spain brought the rest volume. The reason behind higher import from US is said to be crop loss around 70 % in Canada due to wet condition.**
- **Lentils import volume from US too increased to 19326 T, around 30.9 % of total lentil export in a month. India imported 74526 tonne dry peas from US too, 75.4 % of total dry peas export in a month. India imported 1.14 lakh tonne pulses from US out of total export of 1.9 lakh tonne. Higher import volume is likely to continue as prices in India still rules higher despite decreased price.**
- **Pulses prices in Canada have moved up in recent weeks. Lentils local quotes for Number 2 Laird varieties are currently hovering in the range of 48 to 61 cents per pound in Western Canada. Green pea prices range from C\$7.50 to as high as C\$9.00 per bushel.**
- **Farmers in Australia have been taking advantage of higher chickpea price. Drought affected crop and tight supply side have temporarily lent support to chickpea price from AU\$800 per tonne to AU\$1,000 per tonne. However, firmness would not sustain in the medium term once Indian crop starts hitting the market in Feb this year.**
- **This year production of Lentils in US is up by 136 % to 5.64 lakh tonne due higher planted area that increased by 90 % to 9.35 lakh acres. Actual harvesting has been reported 9.17 lakh acres. States like Montana, North Dakota, and the United States have recorded record area. Average yield is expected to be 1,356 pounds per acre, up 248 pounds from 2015.**
- **According to the latest update by market viewers in Australia, Lentil crop in some parts of western Australia has been affected by severe outbreaks of botrytis grey mould. Experts say that South Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.**
- **As per the latest ABARE update chickpeas production in Australia may increase to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.**
- **According to the latest report, Canada Pea Production estimate for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.**

**Canada Lentil Production Estimate**

	<b>2014-2015</b>	<b>2015-2016[f]</b>	<b>2016-2017[f]</b>
<b>Area seeded (kha)</b>	1,263	1,597	2,080
<b>Area harvested (kha)</b>	1,217	1,589	2,050
