

Pulses Domestic Fundamentals:

- **Lemon Tur in Mumbai was traded at Rs 5550-75 while Urad was quoted at Rs7300 per qtl.** Chana was being traded at Rs 9300. Oct. 1st vessel chana was quoted at Rs9200 and from 2nd vessel at Rs8900/9000 per qtl. Tanzanian and Ethiopian Chana were being quoted at Rs 9100/7 Rs 8300 per qtl. Matar was traded at Rs 2311/21. Russian Matar was quoted at Rs2275 per qtl. Canadian Masoor was being traded at Rs4850 to 5100 while Australian was quoted at Rs5350 per qtl.
- **As expected pulses import flow continues to increase at various ports of India.** In the beginning of December 311 containers of Russian and 6 containers of US Chickpeas were landed on Nhava Sheva port in Mumbai. Besides, 49 containers of pigeon peas from Mozambique and 76 containers from Tanzania landed on Nhava Sheva on 1st Dec-2016. Around 53 containers of Lentils and 2 containers of green peas from Canada too landed in Mumbai during the period. 6 containers of yellow peas from US too landed. Total 536 containers were landed on Dec-1st at Nhava Sheva port. There was no container of Urad. The import flow would continue to increase as around 1.5 MMT pulses is expected to hit Indian ports in December. It would pressurize domestic price and ease supply side.
- **Pulses Rabi sowing has crossed half way so far from normal of 138.21 lakh ha** and is running ahead by 7.91 % to 95.08 lakh ha from last year. It was 88.11 lakh ha last year as on 25.11.2016. Chana, the main Rabi pulses, area coverage has been registered at 66.33 lakh ha, higher by 2.73 percent from last year till date. Its normal area is 88.37 lakh ha.
- **Tur lemon in Mumbai is being traded at Rs 5600/5700 per qtl.** Steady to slightly weak tone may prevail in coming days. Urad quote remained steady at Rs 7501 per qtl. and may continue to trade stable. Chana is being traded at Rs 9000/10000 per qtl. at various centres. Downward pressure continues as large volume of import is expected in Dec. Chana price may continue to dip. Matar Canada is being traded at Rs2325/26 while Masur is being quoted at Rs 5000 to Rs 5100 per qtl. in Mumbai. Overall, sentiment in pulses market remains weak. Australian desi Chana for February delivery is being reported at \$715/20 per tonne while Russian Chickpea for Dec delivery is being quoted at \$870/880 per tonne.
- **After 35000 T Australian Chana that landed at Mundra port on 13 Nov,** MV HALIL SAHIN carrying about 42000 T Australian Chana is expected to arrive on 24th Nov-2016. Other shipment from same origin carrying 23700 T Chana is expected to land Mumbai port on 7th December. These arrivals would ease supply side further and pressurize cash Chana market in India.
- **The second major Rabi pulses is Lentils and its planting too is running smooth.** Out of normal area of 14.79 lakh ha, farmers have covered 10.4 lakh ha so far. It is 43.65 percent higher from last year till date (25th Nov). M.P., Uttar Pradesh and Bihar are major producers of Lentils. Despite demonetization, farmers are engaged to finish planting in time as prices are higher, weather remains favorable and govt would procure Lentils if prices crash below MSP of Rs 3925 per qtl. in the season.
- **Peas planting too have increased considerably this year. Out of 8.37 lakh ha of normal area** farmers have planted 7.92 lakh ha so far, higher by 76.79 percent from last year till date. Given the pace of ongoing planting, peas area may cross from normal this year. The new crop would start hitting the market from Jan end and it would continue to build up pressure on price. Experts say that peas price may dip below Rs 2000 in the season. Currently, pea is being imported in highest volume from Ukraine, Canada and US.
- **Despite better progressive sowing status of Rabi season Urad lags behind** from last year by 9.19 percent to 2.57 lakh ha so far. Its normal Rabi area is 7.54 lakh ha. Farmers had planted 2.83 lakh ha last year till 25th Nov. The reason behind lower area under Urad is farmer's preference to other short duration crops in Rabi season. They have preferred to grow more spices and Chana this season. However, total coverage by the end of sowing season may reach near 7 lakh ha.
- **India imported 320012 tonne pulses during 14th to 20th Nov-2016, higher by 12 %** from previous week. It had imported 283426 tonne pulses during week ended 13th Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 212588 tonne yellow peas, 32530 tonne Tur, 2708 tonne Urad and 46012 tonne Chana. During this period, besides, 19834 T Lentils has been imported. The rest were other pulses including kidney beans.

Pulses International Fundamental:

- **Laird 1 Lentils in Western Canada continued to inched up to 66 cents per pound**, almost 5 cents up from a fortnight ago. Light Kidney beans dropped a little bit and its average bid comes to 43.5 cents per pound. Despite bad weather farmers in Australia expects 2 T per ha yield this year. The main problems for them were ascochyta blight and water-logging issues. Delayed harvesting would delay shipment and New Indian crop would hit the market by end feb. This means they have two and a half months to ship their crop at higher prevailing price. India would not buy Chana from March. It is clear due to bumper production prospect this year. For Australia it would be very difficult to ship maximum marketable surplus in two months. So pressure on global domestic Chick peas market looms large.
- **Australia is exporting lentils to India at \$680/85 per tonne while Canada is offering lentils at \$750 per tonne.** Cheaper supply from Australia has put pressure on Canadian lentils quote. According to the Prairie Ag Hotwire, 1 Red Lentils in Western Canada decreased by one cent per pound last week. Bids ranged from 27 cents per pound at the lows to 34 cents at the highs. green pea is being offered in the range of C\$7.50 to as high as C\$9.00 per bushel in Western Canada. Pressure would continue as supply side has eased and buyers are in bargaining seat now.
- **Despite current uptrend Lentils price in Canada is unlikely to move north way in coming weeks.** Currently it is being traded at 66 cents (CND) per pound. Laird 1 lentils are being quoted in the range of 61 to 66 cents per pound. Kabuli Chana is being traded at 64 to 65 cents per pound. In Indian market there is a pressure on Lentils and Chana markets it may trade lower due to lower demand in local markets. Consumers are turning to green vegetables.
- **Chickpeas import from US In India is increasing fast. India imported 20607 MT Chickpeas in Sept and Volume is expected to be higher in Oct.** Data is awaited. Surprisingly, it is 73 % of total Chickpeas export from US in a month. Turkey and Spain brought the rest volume. The reason behind higher import from US is said to be crop loss around 70 % in Canada due to wet condition.
- **Lentils import volume from US too increased to 19326 T, around 30.9 % of total lentil export in a month.** India imported 74526 tonne dry peas from US too, 75.4 % of total dry peas export in a month. India imported 1.14 lakh tonne pulses from US out of total export of 1.9 lakh tonne. Higher import volume is likely to continue as prices in India still rules higher despite decreased price.
- **Pulses prices in Canada have moved up in recent weeks. Lentils local quotes for Number 2 Laird varieties** are currently hovering in the range of 48 to 61 cents per pound in Western Canada. Green pea prices range from C\$7.50 to as high as C\$9.00 per bushel.
- **Farmers in Australia have been taking advantage of higher chickpea price. Drought affected crop and tight supply side have temporarily lent support to chickpea price from AU\$800 per tonne to AU\$1,000 per tonne.** However, firmness would not sustain in the medium term once Indian crop starts hitting the market in Feb this year.
- **This year production of Lentils in US is up by 136 % to 5.64 lakh tonne due** higher planted area that increased by 90 % to 9.35 lakh acres. Actual harvesting has been reported 9.17 lakh acres. States like Montana, North Dakota, and the United States have recorded record area. Average yield is expected to be 1,356 pounds per acre, up 248 pounds from 2015.
- **According to the latest update by market viewers in Australia, Lentil crop in some parts of western Australia** has been affected by severe outbreaks of botrytis grey mould. Experts say that South Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.

- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
