

Pulses Domestic Fundamentals:

- **After Mung, Tur may trade below MSP (Rs5050 per qtl) it was Rs 4625 per qtl. in 2015-16.** Farmers did not get support price and are selling Mung below MSP now. The same case may be repeated with Tur as procurement on MSP is very limited. Will govt. procure 2MMT pulses this season. It has procured 6.95 lakh Tonne so far against the set target of 20MMT.
- **Farmers in Karnataka are not able to sell Tur at MSP. They receive MSP for superior grade only.** It is odd that the Indian government is undertaking assured procurement of pulses from countries like Mozambique (Africa) at support prices, incurring costs of carriage and technical assistance, while farmers at home are not able to recover costs. Weak procurement and stock limit are forcing farmers to sell their products below MSP. Tur is being sold at Rs 5000 per qtl.
- **Tur arrival pressure is yet to build up as arrival from Maharashtra, Gujarat and Madhya Pradesh would start in the first week of January.** For ensuring MSP for farmers govt. should speed up procurement in producing states. Tur production may cross 4 MMT this year against 2.4 MMT last year. Govt. estimate is even higher
- **Tur Lemon in Mumbai was quoted at Rs 4575-4600 per qtl. down by Rs 50 from previous day.** Urad FAQ was traded at Rs 6600/6700 per qtl. Chana was traded at Rs8800/9000 per qtl. Ethiopian chana was traded at Rs8200/8300 per qtl. Pea was traded at Rs2411/21 per qtl. Russian matar was quoted at Rs 2361/71 per qtl. Massor was trade at Rs 4550/4700 per qtl. Australian Masur was traded at Rs 4800 per qtl. Pressure on domestic market continues as arrival flow has eased amid good Rabi production prospects. Bearish tone may prevail in cash market.
- **Odisha state govt has extended VAT concession on pulses including dals for three months till march-2017.** It was extended for last quarter of 2016. The aim of this extension is to enable Commissioner of Commercial Taxes to analyze the real impact of tax reduction. Vat has been reduced from 5% to 1% on all pulses. If prices continue to cool down, state govt. may review the decision.
- **Pulses Rabi sowing has crossed 98.28% of normal area of 140.67lakh ha so far and is running ahead by 9.96% to 138.25 lakh ha from last year (125.73 lakh ha) as on 23.12.2016.** Chana, the main Rabi pulses, area coverage has been registered at 89.21 lakh ha, higher by 11.35 percent from last year till date. Its normal area is 88.37 lakh ha. Weather remains favorable and sowing is expected to be over by December end. Chana area has crossed its normal area of 88.37 lakh ha. So far. Higher MSP of Rs 4000 per qtl., including bonus, has encouraged farmers to grow more Chana this year.
- **Pulses Rabi sowing has crossed 94% of normal area of 140.67lakh ha so far and is running ahead by 12.60% to 131.8 lakh ha from last year as on 16.12.2016.** Chana, the main Rabi pulses, area coverage has been registered at 86.9 lakh ha, higher by 12.93 percent from last year till date. Its normal area is 88.37 lakh ha.
- **Weather remains favorable and sowing is expected to be over by December end.** Chana area may exceed normal as prices continue to rule higher. Higher MSP of Rs 4000 per qtl., including bonus, has encouraged farmers to grow more Chana this year. Large calibre (10mm) kabuli chickpeas are currently seeing prices top out at 70 cents per pound in Western Canada, according to Prairie Ag Hotwire data. Those are the highest prices of the crop-year-to-date.
- **Forward deals for Australian Chana for Jan end delivery has been reported at \$750/755 per tonne.** Import flow is higher and deals for around 1000 containers have been struck from Australia for Jan end. Besides, new crop will hit Indian market from end February and it would pressurize domestic market. Chana market is expected to decrease continuously and may stay around Rs 5500/6000 with arrival of new crop in India.
- **Around 19950 tonne is expected to land at Mumbai on 28.12.2016 from same destination.** Besides, 27277 tonne is likely to land Mundra port on 5th Jan-2017. All these imports are expected in bulk.
- **India imported 283426 tonne pulses during 21st to 26th Nov-2016, higher by 16.14% from previous week.** It had imported 244024 tonne pulses during week ended 20th Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043 tonne Urad and 11358 tonne Chana during this period. Besides, 32206 T Lentils has been imported. The rest were other pulses including kidney beans.

Pulses International Fundamental:

- **The USDA National Agricultural Statistics Service (NASS) has released its crop production data** this week for acres planted, harvested, production and yield, including those for dry peas, lentils and chickpeas. NASS has estimated 1226027 T peas production in its latest report of December against 1255911 T of USADPLC estimate. In case of Lentils both estimation bodies estimated 564093 and 623307 T respectively. In case of Chickpeas USADPLC has estimated 226497 T production.
- **After the record-setting month for exports in September from US, October exports did in fact decrease** for the month, but the pace of exports still remained decidedly hot. Pea exports dropped from almost 100,000 MT in September to 38,600 MT in October and most of that decline came in shipments to India. Lentil exports also fell in October compared to September, but the monthly total was still good enough to be the 2nd largest monthly lentil export volume. After two months in the 2015-16 marketing year, exported volume of Lentils was 65,000 MT o, equivalent to 27% of the 2015 lentil harvest. In contrast, it was about 106,000 MT in the first two months of the 2016-17 marketing year.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.
- **Lentils production in Canada has been estimated at 32.48 lakh tonne for 2016-17.** It had produced 25.41 lakh tonne in 2015-16. the season started with 0.73 lakh tonne as opening stock while it was 3.65 lakh tonne in 2015-16. Import too have increased from 16 to 75 thousand tonne in 2016-17. Thus total supply has been pegged at 33.96 lakh tonne against 29.21 lakh tonne last year. Total demand for this year has been pegged at 27.96 lakh tonne against 28.49 lakh tonne last year. The season may end with 6 lakh tonne peas that hints ample supply to continue through out the year. Prices are ruling at \$585 to 615 per tonne, depending on quality. Last year its average was \$965 per tonne.
- **Laird 1 Lentils in Western Canada continued to inched up to 66 cents per pound,** almost 5 cents up from a fortnight ago. Light Kidney beans dropped a little bit and its average bid comes to 43.5 cents per pound. Despite bad weather farmers in Australia expects 2 T per ha yield this year. The main problems for them were ascochyta blight and water-logging issues. Delayed harvesting would delay shipment and New Indian crop would hit the market by end feb. This means they have two and a half months to ship their crop at higher prevailing price. India would not buy Chana from March. It is clear due to bumper production prospect this year. For Australia it would be very difficult to ship maximum marketable surplus in two months. So pressure on global domestic Chick peas market looms large.
- **Australia is exporting lentils to India at \$680/85 per tonne while Canada is offering lentils at \$750 per tonne.** Cheaper supply from Australia has put pressure on Canadian lentils quote. According to the Prairie Ag Hotwire, 1 Red Lentils in Western Canada decreased by one cent per pound last week. Bids ranged from 27 cents per pound at the lows to 34 cents at the highs. green pea is being offered in the range of C\$7.50 to as high as C\$9.00 per bushel in Western Canada. Pressure would continue as supply side has eased and buyers are in bargaining seat now.
- **Despite current uptrend Lentils price in Canada is unlikely to move northward in coming weeks.** Currently it is being traded at 66 cents (CND) per pound. Laird 1 lentils are being quoted in the range of 61 to 66 cents per pound. Kabuli Chana is being traded at 64 to 65 cents per pound. In Indian market there is a pressure on Lentils and Chana markets it may trade lower due to lower demand in local markets. Consumers are turning to green vegetables.
- **Farmers in Australia have been taking advantage of higher chickpea price.** Drought affected crop and tight supply side have temporarily lent support to chickpea price from AU\$800 per tonne to AU\$1,000 per tonne. However, firmness would not sustain in the medium term once Indian crop starts hitting the market in Feb this year.
- **According to the latest update by market viewers in Australia, Lentil crop in some parts of western Australia has been affected by severe outbreaks of botrytis grey mould.** Experts say that South Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this

botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
Area seeded (kha)	1,263	1,597	2,080
