

Pulses Domestic Fundamentals:

- **Pulses Rabi sowing has crossed over normal area of 140.67lakh ha by 5.28% so far** and is running ahead by 12.95 % to 148.1 lakh ha from last year(131.12 lakh ha) as on 30.12.2016. Chana, the main Rabi pulses, area coverage has been registered at 94.82 lakh ha, higher by 14.41 percent than last year. Its normal area is 88.37 lakh ha. Weather remains favorable and sowing is almost over now. Higher MSP of Rs 4000 per qtl., including bonus, and attractive market price have encouraged farmers to grow more Chana this season. However, area in A.P. and Karnataka has decreased by 25 & 35 % respectively. It will not make any difference as area has increased considerably in major growing states.
- **Out of total Rabi coverage under pulses, Lentils is running ahead by 18.95 % from 13.51 lakh ha**(last year till 30th Dec-2015) to 16.07 lakh ha, Peas up by 19.56 % from 9.15 to 10.94 lakh ha and Lathyrus by 8.82 % from 3.74 to 4.07 lakh ha. However, Kulthi lagged behind by 15.84 percent from coverage during corresponding period of last year. As sowing of Moong would continue in January too, normal area might be covered. Urad area too increased sharply from last week and is up by 5.57 % to 7.01 lakh ha. After kharif bumper Rabi production seems very much on the card now and it started reflecting on price now.
- **Pulses cash market continues to reel under pressure on good rabi production** prospect and increasing arrival from kharif Tur. Besides, import flow continues. Mumbai Tur lemon traded at Rs 4800 per qtl. in Mumbai, slightly up from previous trading session. Urad FAQ traded up by Rs 500 to Rs 6400 per qtl. prices of Urad is unlikely to sustain at higher level as other pulses trades lower, especially Mung and Tur. Current firmness is considered to be a correction. Urad SQ traded at Rs 7100 per qtl.
- **Chana traded at Rs 8000 per qtl., up by Rs 200. Chana sourced from Ethiopia and Tanzania** were traded at Rs 7900 and Rs 8600 per qtl. in Mumbai. Overall tone remains weak as area has increased by 11.35 % to 89.21 lakh ha. New crop is expected from mid February. So, any spike is unlikely now. In Delhi market, Rajasthan Chana is being traded at Rs 9000/9100 per qtl. Overall outlook remains bearish in new year.
- **Peas in Mumbai is being traded at Rs 2411 taking clue from Chana. More upside revision** is unlikely. Russian and Hazira peas are being quoted at Rs 2361/71 and Rs 2451/61 per qtl. in Mumbai. As new crop in domestic market will start flowing from Jan end, any spike in pea market is unlikely. Given the production prospects, pea may trade around Rs 2000/2100 in Feb-March-2017. Russian wheat Cif quote comes to total \$197.95 a tonne c&f (\$10.20 Ocean Shipping charge). Ukraine origin wheat has been sold at \$ 187 per T on Cif basis.
- **At Masur market too bearish tone prevails. Higher production prospects, better import** flow of Canadian and Australian Masoor restrict uptrend. It is being traded at Rs 5000/5100 per qtl. in various markets while Canadian Masur in Mumbai is being traded at Rs 4650/4750 per qtl. Australian Masur is being traded at Rs 4850/4900. As normal trading has been affected due to demonetization, demand has weakened and it would pressurize market further.
- **Tur arrival pressure is yet to build up as arrival from Maharashtra, Gujarat and Madhya Pradesh** would start in the first week of January. For ensuring MSP for farmers, govt. should speed up procurement in producing states. Tur production may cross 4 MMT this year against 2.4 MMT last year. Govt. estimate is even higher.
- **Odisha state govt has extended VAT concession on pulses including dals** for three months till March-2017. It was extended for last quarter of 2016. The aim of this extension is to enable Commissioner of Commercial Taxes to analyze the real impact of tax reduction. VAT has been reduced from 5% to 1 % on all pulses. If prices continue to cool down, state govt. may review the decision.
- **Forward deals for Australian Chana for Jan end delivery has been** reported at \$750/755 per tonne. Import flow is higher and deals for around 1000 containers have been struck from Australia for Jan end. Besides, new crop will hit Indian market from end February and it would pressurize domestic market. Chana market is expected to decrease continuously and may stay around Rs 5500/6000 with arrival of new crop in India.
- **Around 19950 tonne is expected to land at Mumbai on 28.12.2016 from same destination.** Besides, 27277 tonne is likely to land Mundra port on 5th Jan-2017. All these imports are expected in bulk.
- **India imported 283426 tonne pulses during 21st to 26th Nov-2016, higher by 16.14 %** from previous week. It had imported 244024 tonne pulses during week ended 20th Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043

tonne Urad and 11358 tonne Chana during this period. Besides, 32206 T Lentils has been imported. The rest were other pulses including kidney beans.

Pulses International Fundamental:

- **The USDA National Agricultural Statistics Service (NASS) has released its crop production data** this week for acres planted, harvested, production and yield, including those for dry peas, lentils and chickpeas. NASS has estimated 1226027 T peas production in its latest report of December against 1255911 T of USADPLC estimate. In case of Lentils both estimation bodies estimated 564093 and 623307 T respectively. In case of Chickpeas USADPLC has estimated 226497 T production.
- **After the record-setting month for exports in September from US, October exports** did in fact decrease for the month, but the pace of exports still remained decidedly hot. Pea exports dropped from almost 100,000 MT in September to 38,600 MT in October and most of that decline came in shipments to India. Lentil exports also fell in October compared to September, but the monthly total was still good enough to be the 2nd largest monthly lentil export volume. After two months in the 2015-16 marketing year, exported volume of Lentils was 65,000 MT o, equivalent to 27% of the 2015 lentil harvest. In contrast, it was about 106,000 MT in the first two months of the 2016-17 marketing year.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tone in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.
- **Lentils production in Canada has been estimated at 32.48 lakh tonne for 2016-17.** It had produced 25.41 lakh tonne in 2015-16. the season started with 0.73 lakh tonne as opening stock while it was 3.65 lakh tone in 2015-16. Import too have increased from 16 to 75 thousand tonne in 2016-17. Thus total supply has been pegged at 33.96 lakh tonne against 29.21 lakh tonne last year. Total demand for this year has been pegged at 27.96 lakh tonne against 28.49 lakh tonne last year. The season may end with 6 lakh tonne peas that hints ample supply to continue through out the year. Prices are ruling at \$585 to 615 per tonne, depending on quality. Last year its average was \$965 per tonne.
- **Laird 1 Lentils in Western Canada continued to inched up to 66 cents per pound,** almost 5 cents up from a fortnight ago. Light Kidney beans dropped a little bit and its average bid comes to 43.5 cents per pound. Despite bad weather farmers in Australia expects 2 T per ha yield this year. The main problems for them were ascochyta blight and water-logging issues. Delayed harvesting would delay shipment and New Indian crop would hit the market by end feb. This means they have two and a half months to ship their crop at higher prevailing price. India would not buy Chana from March. It is clear due to bumper production prospect this year. For Australia it would be very difficult to ship maximum marketable surplus in two months. So pressure on global domestic Chick peas market looms large.
- **Australia is exporting lentils to India at \$680/85 per tonne while Canada is** offering lentils at \$750 per tonne. Cheaper supply from Australia has put pressure on Canadian lentils quote. According to the Prairie Ag Hotwire, 1 Red Lentils in Western Canada decreased by one cent per pound last week. Bids ranged from 27 cents per pound at the lows to 34 cents at the highs. green pea is being offered in the range of C\$7.50 to as high as C\$9.00 per bushel in Western Canada. Pressure would continue as supply side has eased and buyers are in bargaining seat now.
- **Despite current uptrend Lentils price in Canada is unlikely to** move northward in coming weeks. Currently it is being traded at 66 cents(CND) per pound. Laird 1 lentils are being quoted in the range of 61 to 66 cents per pound. Kabuli Chana is being traded at 64 to 65 cents per pound. In Indian market there is a pressure on Lentils and Chana markets it may trade lower due to lower demand in local markets. Consumers are turning to green vegetables.
- **Farmers in Australia have been taking advantage of higher chickpea price.** Drought affected crop and tight supply side have temporarily lent support to chickpea price from AU\$800 per tonne to AU\$1,000 per

- **According to the latest update by market viewers in Australia,**Lentil crop in some pocts of western Australia has been affected by severe outbreaks of botrytis grey mould.Experts say thatSouth Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.
