

Pulses Domestic Fundamentals:

- **According to AW estimate, lentil production for MY 2017-18 is expected to be 11.87 Lakh, higher by 14.13 % from last year.** Last year it was 10.4 Lakh tonnes. As sowing has just over now, total area coverage might be finalized at 1650 thousand ha. Weather is good and crop condition is normal. At import front Lentils import from March 2016 up to Dec-2016 has been recorded at 6.71 lakh tonne, lower by 23.40 % from corresponding period last year due to higher prevailing price in global market. The Current MY may end up with 8 lakh tonne Lentils import.
- **Madhya Pradesh has aimed to increase pulses production by 60% in next three years.** Madhya Pradesh produces around 5 MMT pulses right now and with concentrated efforts it can be raised to 8 MMT in span of 3 years. Chickpeas, Black Gram and Pigeon peas are main pulses crop in MP. However, size of production depends on rainfall in coming years. In the 2015/16 fiscal year, India imported a record 5.8 million tonnes Pulses. India had produced 167 lakh tonne last year against normal demand of 23/24 MMT per year.
- **Nafed has procured 1,56,434 tonnes pulses so far on MSP. It has procured 1,03,011 tonne Mung and 46160 tonne Urad on MSP till 5th Jan-2017.** It has brought 7263 tonne Tur so far. It has procured 3211 Tonne from Telangana, 2274 tonne from Karnataka and 1711 tonne from Maharashtra. It has just started buying from M.P. and only 260 tonne has been procured so far. It is procuring Urad from market price.
- **Pulses Rabi sowing has crossed over normal area of 140.67lakh ha by 8.50 % so far** and is running ahead by 13.45 % to 152.63 lakh ha from last year (134.54 lakh ha) as on 06.01.2017. Chana, the main Rabi pulses, area coverage has been registered at 96.83 lakh ha, higher by 15.11 percent than last year. Its normal area is 88.37 lakh ha. Weather remains favorable and sowing is almost over now. Higher MSP of Rs 4000 per qtl., including bonus, and attractive market price have encouraged farmers to grow more Chana this season. However, area in A.P. and Karnataka has decreased by 21 & 30 % respectively. It will not make any difference as area has increased considerably in major growing states.
- **Out of total Rabi coverage under pulses, Lentils is running ahead by 18.11 % from 13.86 lakh ha** (last year till 06th Jan -2016) to 16.37 lakh ha, Peas up by 19.55 % from 9.26 to 11.07 lakh ha and Lathyrus by 5.93 % from 3.88 to 4.11 lakh ha. However, Kulthi lagged behind by 10.41 percent from coverage during corresponding period of last year. As sowing of Moong would continue in January too, normal area might be covered. Urad area too increased sharply from last week and is up by 6.59 % to 7.6 lakh ha. After kharif bumper Rabi production seems very much on the card now and its started reflecting on price now.
- **South Indian pulses importers imported 326 containers pulses in the last week of December.** Out of total import lentils share was 171 containers. Urad and Chana contribution were 86 & 65 containers respectively. Tur and Mung shares were 25 and 18 containers. One container of yellow peas too was landed at Chennai & Krishnapatnam ports. These pulses have been imported from 26 to 31st December-2016. Besides, 237 containers, mostly Chickpeas from Australia landed at Nhavasheva port at 6th Jan-2017. Out of total 14 containers Urad and 2 containers of Mung were recorded.
- **AW preliminary production estimate for Chana for 2017-18 has been pegged at over 90 Lakh Tonne** this year based on normal weather condition, around 13 % higher area coverage from last year and normal to good crop condition so far. The new season will begin with 1.6 lakh tonne as carryin. Higher production would increase total supply from 85.62 (Current MY) to 96.81 lakh tonne in MY 2017-18. Import is likely to reduce by 50% from 10 lakh to 5 lakh tonne in 2017-18. The new season is likely to end with 3.95 lakh tonne as carryout. The new estimate is based on feedback received from farmers and initial field survey in some parts of major growing states. Emerging scenario hints bearish trend to continue in Chana market.
- **Forward deals for Australian Chana for Jan end delivery has been reported at \$750/755 per tonne.** Import flow is higher and deals for around 1000 containers have been struck from Australia for Jan end. Besides, new crop will hit Indian market from end February and it would pressurize domestic market. Chana market is expected to decrease continuously and may stay around Rs 5500/6000 with arrival of new crop in India.
- **India imported 283426 tonne pulses during 21st to 26th Nov-2016, higher by 16.14 % from previous week.** It had imported 244024 tonne pulses during week ended 20th Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043 tonne Urad and 11358 tonne Chana during this period. Besides, 32206 T Lentils has been imported. The rest were other pulses including kidney beans.

Pulses International Fundamental:

- **The USDA National Agricultural Statistics Service (NASS) has released its crop production data** this week for acres planted, harvested, production and yield, including those for dry peas, lentils and chickpeas. NASS has estimated 1226027 T peas production in its latest report of December against 1255911 T of USADPLC estimate. In case of Lentils both estimation bodies estimated 564093 and 623307 T respectively. In case of Chickpeas USADPLC has estimated 226497 T production.
- **After the record-setting month for exports in September from US, October exports did in fact decrease** for the month, but the pace of exports still remained decidedly hot. Pea exports dropped from almost 100,000 MT in September to 38,600 MT in October and most of that decline came in shipments to India. Lentil exports also fell in October compared to September, but the monthly total was still good enough to be the 2nd largest monthly lentil export volume. After two months in the 2015-16 marketing year, exported volume of Lentils was 65,000 MT o, equivalent to 27% of the 2015 lentil harvest. In contrast, it was about 106,000 MT in the first two months of the 2016-17 marketing year.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tone in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.
- **Lentils production in Canada has been estimated at 32.48 lakh tonne for 2016-17.** It had produced 25.41 lakh tonne in 2015-16. the season started with 0.73 lakh tonne as opening stock while it was 3.65 lakh tone in 2015-16. Import too have increased from 16 to 75 thousand tonne in 2016-17. Thus total supply has been pegged at 33.96 lakh tonne against 29.21 lakh tonne last year. Total demand for this year has been pegged at 27.96 lakh tonne against 28.49 lakh tonne last year. The season may end with 6 lakh tonne peas that hints ample supply to continue through out the year. Prices are ruling at \$585 to 615 per tonne, depending on quality. Last year its average was \$965 per tonne.
- **Laird 1 Lentils in Western Canada continued to inched up to 66 cents per pound,** almost 5 cents up from a fortnight ago. Light Kidney beans dropped a little bit and its average bid comes to 43.5 cents per pound. Despite bad weather farmers in Australia expects 2 T per ha yield this year. The main problems for them were ascochyta blight and water-logging issues. Delayed harvesting would delay shipment and New Indian crop would hit the market by end feb. This means they have two and a half months to ship their crop at higher prevailing price. India would not buy Chana from March. It is clear due to bumper production prospect this year. For Australia it would be very difficult to ship maximum marketable surplus in two months. So pressure on global domestic Chick peas market looms large.
- **Australia is exporting lentils to India at \$680/85 per tonne while Canada is** offering lentils at \$750 per tonne. Cheaper supply from Australia has put pressure on Canadian lentils quote. According to the Prairie Ag Hotwire, 1 Red Lentils in Western Canada decreased by one cent per pound last week. Bids ranged from 27 cents per pound at the lows to 34 cents at the highs. green pea is being offered in the range of C\$7.50 to as high as C\$9.00 per bushel in Western Canada. Pressure would continue as supply side has eased and buyers are in bargaining seat now.
- **Despite current uptrend Lentils price in Canada is unlikely to** move northward in coming weeks. Currently it is being traded at 66 cents (CND) per pound. Laird 1 lentils are being quoted in the range of 61 to 66 cents per pound. Kabuli Chana is being traded at 64 to 65 cents per pound. In Indian market there is a pressure on Lentils and Chana markets it may trade lower due to lower demand in local markets. Consumers are turning to green vegetables.
- **Farmers in Australia have been taking advantage of higher chickpea price.** Drought affected crop and tight supply side have temporarily lent support to chickpea price from AU\$800 per tonne to AU\$1,000 per tonne. However, firmness would not sustain in the medium term once Indian crop starts hitting the market in Feb this year.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
Area seeded (kha)	1,263	1,597	2,080
