

Pulses Domestic Fundamentals:

- **Pressure continues on cash pulses market. Farmers may opt for retaining stock** of Tur, Moong and Peas. As Chana, Urad, Peas and Masur are due to hit market, recovery is unlikely in the short term. Prices of pulses are expected to stabilize in March-April. Even govt.'s procurement would not help market to move suddenly up.
- **South Indian millers have imported 155 containers pulses during 1st to 5th February-2017**, lower by 7.18 % from week ending 31st January. Highest volume was recorded for Black Mapte and Lentils. Out of total import Urad share was 69, Lentils share was 39 and Chickpeas share was 29 containers. The rest were green peas and Tur whole. Currently Burma sells Urad at \$830 per tonne on Cif basis. Tur is being quoted at \$625 per tonne, Moong is being quoted at \$665 per T. Australian Chana for Feb delivery has been finalized at \$770/775 per T.
- **Indian state agencies including FCI have procured around 10 lakh tonne pulses to build up buffer stock** of 2.0 MMT this year. Given the bumper incoming Rabi crop govt would be able to procure 75% of its requirement from domestic market as Moong, Tur are ruling lower than MSP and availability is increasing.
- **Govt. has recently nodded its head for engaging a professional pulses buffer management entity** for efficient management of the buffer stock. Right now FCI Nafed and small farmers Agriculture Business Consortium are engaged in procuring pulses for buffer stock on MSP.
- **Rabi sowing of pulses has crossed normal area of 140.67 lakh ha by 13.54 % till 3rd Feb-2017** and is running ahead by 11.15 % to 159.72 lakh ha from last year (143.7 lakh ha) so far. Chana, the main Rabi pulses, area coverage has been registered at 99.01 lakh ha, higher by 10.69 percent than last year. Its normal area is 88.37 lakh ha. Weather remains favorable and sowing is almost over now. New Chana started hitting Amrawati and Ujjain markets. Despite higher coverage, area in A.P. and Karnataka has decreased by 17.45 & 30.03 % respectively. It will not make any difference as area has increased considerably in major growing states. Chana production estimate is likely to be revised up by 5 to 6 % from preliminary estimate of 90 MMT.
- **Out of total Rabi coverage under pulses, Lentils is running ahead by 21.27 % from 13.73 lakh ha** (last year till 3rd Feb) to 16.65 lakh ha, Peas up by 17.41 % from 9.59 to 11.26 lakh ha and Lathyrus by 9.46 % from 3.91 to 4.28 lakh ha. However Kulthi lagged behind by 10.85 percent from coverage during corresponding period of last year. As sowing of Moong would continue in Feb too, normal area might be covered. As of now (3rd Feb-2017) it is 3.39% higher from last Rabi season. Urad area too increased last week and is up by 8.98 % to 8.74 lakh ha. After bumper kharif production, good Rabi production seems very much on the card now and it has started
- **According to AW estimate, Lentils production for MY 2017-18 is expected to be 11.87 Lakh**, higher by 14.13 % from last year. Last year it was 10.4 Lakh tonnes. As sowing has just over now, total area coverage might be finalized at 1650 thousand ha. Weather is good and crop condition is normal. At import front Lentils import from March 2016 up to Dec-2016 has been recorded at 6.71 lakh tonne, lower by 23.40 % from corresponding period last year due to higher prevailing price in global market. The Current MY may end up with 8 lakh tonne Lentils import.
- **AW preliminary production estimate for Chana for 2017-18 has been pegged at over 90 Lakh Tonne** this year based on normal weather condition, around 13 % higher area coverage from last year and normal to good crop condition so far. The new season will begin with 1.6 lakh tonne as carryin. Higher production would increase total supply from 85.62 (Current MY) to 96.81 lakh tonne in MY 2017-18. Import is likely to reduce by 50% from 10 lakh to 5 lakh tonne in 2017-18. The new season is likely to end with 3.95 lakh tonne as carryout. The new estimate is based on feedback received from farmers and initial field survey in some parts of major growing states. Emerging scenario hints bearish trend to continue in Chana market.
- **India imported 283426 tonne pulses during 21st to 26th Nov-2016, higher by 16.14 % from previous week**. It had imported 244024 tonne pulses during week ended 20th Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043 tonne Urad and 11358 tonne Chana during this period. Besides, 32206 T Lentils has been imported. The rest were other pulses including kidney beans.

Pulses International Fundamental:

- **The US latest report reveals that Chickpeas production in 2016 in US jumped** from 115350 tonne(2015) to 247,047 tonne. The reason behind higher production is said to be higher area coverage and above normal yield. Production of larger Chickpeas (8mm) increased from 72896 to 159,167 tonne. Smaller Chickpeas production too increased from 42457 to 87907 tonne. As production size has gone up, export volume too has gone up by 15 to 16 % this year.
- **The latest Grain Commission data shows that peas export volume from Canada** increased by 20 % so far this year to 2 MMT. Canada Peas exporters had exported 1.6MMT peas last year till January-2017. Higher crop size and good weather condition throughout the growing season including higher area coverage increased crop size this year. Besides, higher demand from India helped export volume growing up. Marketable surplus is still higher as farmers have supplied 28 % more peas into the market so far. Total supplied quantity has touched at 2.5MMT so far against 1.8 MMT last year by the end of January-2017. As Indian demand is likely to decrease due to new incoming domestic crop, Canadian peas quotes for forward months is likely to decline
- **Lentils export volume from Canada too has increased 5.18 % to 578100 metric tonne** till January-2017. Canada had exported 548100 tonne Lentils last year till Jan-2016 as per latest data published by Canada Grain Commission. Prices of Lentils are hovering 62 to 65 cents per pound in Western Canada. red Lentils are being quoted at 30 cents per pound. New crop (green Lentils) bids are lower at around 40 cents per pound while red lentils are being quoted at around 23 cents per pound. Availability is likely to increase against demand so quotes is expected to decrease in coming weeks.
- **No-1 Grade Kabuli Chickpeas (10mm) in Western Canada is being delivered** to plants in the range of 63 to 65 Canadian cents per pound. Chickpeas having size of 9 & 8 mm are being traded at 55 to 65 & 48 to 60 cents per pound. &mm price is hovering in between 30 to 47 cents per pound. No-2 grade Kabuli Chana (10mm) is being offered at 59/62 cents per pound and 9mm is being traded at 52 to 62.50 cents per pound.
- **Shipment of yellow peas from US To India decreased in November in comparison to Oct-2016.** However it increased for China, Pakistan and Mexico that nullified the impact of lower export to India. Green peas export from US increased in Nov and it exceeded yellow peas in Nov. It exported around 3.21 lakh tonne dry peas from June to Nov -2016.
- **Chickpea exports continued to rise from US. Export volumes for September to November** represent 28% of 2016 US chickpea production, which is double the absorption rate for exports a year ago. Pakistan was the largest chickpea export market for the month of November. Total Chickpeas export from last six months from June to Nov-2016 was recorded at 81,000 T. As demand from India is likely to decrease from global market, import volume from all countries is bound to decline in coming months.
- **Prairie Ag Hotwire data shows that Number 2 Laird lentils are currently being traded** at about 66 cents per pound in Western Canada. Yellow peas are being traded in the range of C\$47.83 to C\$9 per bushel. Kabuli Chana is currently traded at 70 cent per pound in western Canada. Agriwatch expects Indian import demand to decrease as new crop is in very good condition and would start hitting the market by Feb end. Chick peas and yellow peas demand from India would come down on the back of bumper crop prospects. Besides, Supply of Lentils and peas in US is higher by 1.27 and 2.50 lakh tonne and US exporters would continue to sell actively to consume the accumulated stock.
- **Canada Grain Association latest data shows that Canada has exported 56000 tonne peas** during second half of December and higher export pace is likely to continue. In current MY (till 30th December-2016) Canada has exported 18.8 lakh tonne peas, 5 lakh tonne higher by previous season till date. Green pea in western Canada is being quoted at C\$7.5 to 8.5 per bushel. Yellow pea quotes range between C\$6.85 to C\$8.00 per bushel. Kabuli Chana is being traded at 53 cent per pound.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.
