

### Pulses Domestic Fundamentals:

- **Mostly markets remained closed due to Mahashivratri on Friday.**
- **South Indian importers imported 321 containers at Chennai port in the week ended 15th Feb-2017,** lower by 15 % (382 containers) from previous week. Import flow is likely to decrease with commencement of arrival from Rabi crop likely to be bumper one after kharif crop. Major decrease was seen in Chickpeas import. It decreased from 105 to 29 containers. Lentils import too decreased from 39 to 29 containers. However, Black Mapte import increased slightly by 1.09 % to 185 containers. The rest were other pulses.
- **Lentils production this year is expected to increase by 14 to 15 % to around 12 lakh tonne this year.** Higher area coverage (16.50 lakh ha) supported by good weather condition so far have increased prospects for bigger crop size. Crop condition is very good so far and new crop started trickling in Bidisha and Rajgarh in small quantity. Around 3500 bags arrived in Rajgarh.
- **The new Lentil crop is being traded at Rs 3650 in Bidisha and At Rs 3950 in Rajgarh.** Lentils MSP has been fixed Rs 3950 per qtl. including bonus of Rs 100 for RMS 2017-18. As arrival pressure is yet to build up, Lentils price may decrease below MSP by Mid March. Imported Masur container price in Mumbai hovers at Rs 4100 while for vessel it stands at Rs 4000 per qtl. Overall outlook remains weak for Lentils. New crop in Bihar may start hitting market from 15th March.
- **Pressure continues on pulses market and it drifted down further from previous trading session.** Arrival is increasing and would continue to increase. Stabilization in market is expected by mid March. Lemon Tur in Mumbai was quoted unchanged at Rs 4000/4050 per qtl. Urad FAQ was quoted at Rs 4900 and SQ at Rs 5800. Australian Chana traded down by Rs 100 to Rs 4800 in Mumbai and Rs 4850 at Mundra. In Latur mandi arrival of Chana touched 45000 bags. Masur was quoted at Rs 4000/4050 per qtl. Matar quoted lower at Rs 2321 per qtl. Inner tone remains weak in pulses market.
- **Govt. has released its 2nd Adv. Est of pulses for 2016-17 on 15th Feb-2017 and it shows higher production this year against target fixed for the year.** Production of Tur has been estimated at 4.23 MMT, higher by 16.85 % from fixed target and 65.23 % from last year production (2.56 MMT).
- **The 2nd Adv. est. for gram released on 15th Feb-2017 shows that its production may touch 9.12 MMT this year against the target of 9.6 MMT for 2016-17.** It is lower by 5 % from set target. However, it is higher by 29.17 % from last year crop size (7.06 MMT). Higher area coverage has encouraged govt to up production estimate. Crop condition is good and arrival pressure is expected by the end of this month. Prices of Chana may decrease to Rs 4500 per qtl. in peak arrival season.
- **Govt. has estimated 7.41 % higher production of Moong to 2.13 MMT this year from set target of 1.87 MMT.** It is higher by 18.18 % from actual of last year. Higher area coverage and congenial weather condition with higher MSP encouraged farmers to grow more moong this year. However, ample crop size has depressed market considerably and it is being traded below MSP. Inner tone remains weak in the market.
- **Rabi sowing of pulses has crossed normal area of 140.67 lakh ha by 13.54 % till 3rd Feb-2017 and is running ahead by 11.15 % to 159.72 lakh ha from last year (143.7 lakh ha) so far.** Chana, the main Rabi pulses, area coverage has been registered at 99.01 lakh ha, higher by 10.69 percent than last year. Its normal area is 88.37 lakh ha. Weather remains favorable. New Chana started hitting various mandis. Chana production estimate is likely to be revised up by 5 to 6 % from preliminary estimate of 90 MMT.
- **AW preliminary production estimate for Chana for 2017-18 has been pegged at over 90 Lakh Tonne this year based on normal weather condition, around 13 % higher area coverage from last year and normal to good crop condition so far.** The new season will begin with 1.6 lakh tonne as carryin. Higher production would increase total supply from 85.62 (Current MY) to 96.81 lakh tonne in MY 2017-18. Import is likely to reduce by 50% from 10 lakh to 5 lakh tonne in 2017-18. The new season is likely to end with 3.95 lakh tonne as carryout.
- **India imported 283426 tonne pulses during 21<sup>st</sup> to 26<sup>th</sup> Nov-2016, higher by 16.14 % from previous week.** It had imported 244024 tonne pulses during week ended 20<sup>th</sup> Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043 tonne Urad and 11358 tonne Chana during this period. Besides, 32206 T Lentils has been imported. The rest were other pulses including kidney beans.

### Pulses International Fundamental:

- **Canada has just revised up adv. estimates of average pulses prices for 2016-17** despite some downward correction in prices in recent days. Agriculture and Agro Food Canada (Govt. agency, AAFC). AAFC has estimated price for peas in between C\$290/310 per tonne while Lentils average price may hover C\$ 615 to 630 per tonne. Chana may hinge in between C\$910/ 930 per T. AAFC had estimated matar price to hever in between C\$ 280/310 per T. Chana and Lentils price projections were C4900/930 and 605/635 per tonne.
- **Canada Agriculture & Agro Foods has estimated 42.5 lakh tonne peas production for 2017-18**, lower by around 6 lakh to 48.36 lakh tonne in 2016-17. However, production estimates for Chana and Lentils has been revised up to 14.50 lakh tonne and 35 lakh tonne respectively. In 2016-17 Canada has produced 32.48 lakh tonne Lentils
- **The shipping firms in Canada has started refusing loading of pulses for India** because policy regarding fumigation requirements is about to change from 1st of April-2017. As of now exporters are allowed to fumigate pulses with methyl bromide after shipping. If it is fumigated at Indian ports, there is a concern related to environment. However, Canada Agriculture Ministry is trying to solve this issue with Indian govt. It remains to be seen whether it find s any solution to the problem by next month.
- **Lentils export volume from Canada too has increased 5.18 % to 578100 metric tonne till January-2017.** Canada had exported 548100 tonne Lentils last year till Jan-2016 as per latest data published by Canada Grain Commission. Prices of Lentils are hovering 62 to 65 cents per pound in Western Canada. red Lentils are being quoted at 30 cents per pound. New crop(green Lentils) bids are lower at around 40 cents per pound while red lentils are being quoted at around 23 cents per pound. Availability is likely to increase against demand so quotes is expected to decrease in coming weeks.
- **The US latest report reveals that Chickpeas production in 2016 in US jumped** from 115350 tonne(2015) to 247,047 tonne. The reason behind higher production is said to be higher area coverage and above normal yield. Production of larger Chickpeas (8mm) increased from 72896 to 159,167 tonne. Smaller Chickpeas production too increased from 42457 to 87907 tonne. As production size has gone up, export volume too has gone up by 15 to 16 % this year.
- **The latest Grain Commission data shows that peas export volume from Canada** increased by 20 % so far this year to 2 MMT. Canada Peas exporters had exported 1.6MMT peas last year till January-2017. Higher crop size and good weather condition throughout the growing season including higher area coverage increased crop size this year. Besides, higher demand from India helped export volume growing up. Marketable surplus is still higher as farmers have supplied 28 % more peas into the market so far. Total supplied quantity has touched at 2.5MMT so far against 1.8 MMT last year by the end of January-2017. As Indian demand is likely to decrease due to new incoming domestic crop, Canadian peas quotes for forward months is likely to decline
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tone in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.
- **Lentils production in Canada has been estimated at 32.48 lakh tonne for 2016-17.** It had produced 25.41 lakh tonne in 2015-16. the season started with 0.73 lakh tonne as opening stock while it was 3.65 lakh tone in 2015-16. Import too have increased from 16 to 75 thousand tonne in 2016-17. Thus total supply has been pegged at 33.96 lakh tonne against 29.21 lakh tonne last year. Total demand for this year has been pegged at 27.96 lakh tonne against 28.49 lakh tonne last year. The season may end with 6 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$585 to 615 per tonne, depending on quality. Last year its average was \$965 per tonne.
