

### Pulses Domestic Fundamentals:

- **Govt has procured around 14.66 lakh tonne pulses from domestic market and import** so far (till 8th March-2017) for creating approved buffer stock of 20 lakh tonne. Out of total 14.66 lakh tonne purchase through import has been reported at 4.06 lakh tonne. The government has approved engaging a professional Buffer Stock Management Agency for efficient management of procurement, storage, maintenance and liquidation of the stock as per directives of the govt. Govt may start selling pulses through tendering process. Pulses production is likely to touch at record 22.14 million tonnes in the 2016-17 crop year as against about 16.5 million tonnes in the previous year. Pulses annual demand in India is 240/245 lakh tonne.
- **Pressure continues on cash pulses market as buyers remained** sidelined. Inner tone for the short term remains weak. Govt. may opt to impose duty on pulses or open export to support declining prices. Decision over these options is expected by the end of this month. All pulses traded down except Tur in cash market. Price is expected to stabilize by the end of this month.
- **Canadian Lentils at Mumbai is being traded at Rs 4100/4150 per qtl. As stock is** at higher side in Canada at this point of time despite 33 % lower projected area coverage this year, prices of Lentils in Canada is bound to decrease. Import flow would continue and all these developments hint bearish tone for Lentils fundamentals in March-2017. It may trade in the range of Rs 3800 to Rs 4200 per qtl.
- **A Proposal regarding imposition of import duty on pulses is still under** consideration and govt. may take decision over it by the last week of this month. Internal assessment is still on. Sources say that govt is very keen to ensure MSP for farmers and maintain normal area coverage for incoming kharif season. There is a talk in the market that govt may impose around 10% duty on pulses or announce some other steps to encourage farmers to grow more pulses.
- **Urad FAQ traded Rs 100 up to Rs 5950/6000 and SQ at Rs 6650/6700 in Mumbai market.** Farmers have retained stock and higher quotes in forward deal at \$785 for FAQ variety and \$920/25 for SQ varieties supported Urad price in domestic market. Likely Imposition of duty on import is under consideration and it may support price in the short term.
- **Imported Chana in Mumbai traded down by Rs 100 to Rs 5100. Current firmness** is based on increasing fear of lower crop size and recent loss due to hail storm. Market expects Chana production not more than 82/83 lakh tonne against govt.'s estimate of 90 lakh tonne. Millers and stockiests are active to fulfill their immediate demand and it is supporting market. Rajasthan Chana in Delhi traded down by Rs 100 to Rs 5300 per qtl. while MP Chana quoted at Rs 5350 per qtl. Downward correction is expected this week as bulk buyers are unwilling to buy at this level.
- **Burma offers Lemon Tur at \$605 per tonne on CiF basis, up by \$20 from previous** week. Urad FAQ is being offered at \$780 and SQ at \$920 per tonne, Moong Pedisheva is being offered at \$970 per tonne While Pakakoi at \$720 per tonne. Tur and Urad CNF offer has been increased. But demand at higher level has decreased. CNF quotes in Burma may stay steady in coming weeks. Lower demand from India may restrict Burmese quotes to move further up.
- **Lentils production this year is expected to increase by 14 to 15 % to around 12 lakh tonne** this year. Higher area coverage (16.50 lakh ha) supported by good weather condition so far, have increased prospects for bigger crop size. Crop condition is very good so far and new crop started trickling in Bidisha and Rajgarh in small quantity. Around 5000 bags arrived in Rajgarh. Bihar crop is expected to hit market by 15<sup>th</sup> March. Crop is in good condition as of now.
- **Govt. has released its 2nd Adv. Est of pulses for 2016-17 on 15th Feb-2017 and** it shows higher production this year against target fixed for the year. Production of Tur has been estimated at 4.23 MMT, higher by 16.85 % from fixed target and 65.23 % from last year production (2.56 MMT).
- **The 2nd Adv. est. for gram released on 15th Feb-2017 shows that its production** may touch 9.12 MMT this year against the target of 9.6 MMT for 2016-17. It is lower by 5 % from set target. However, it is higher by 29.17 % from last year crop size (7.06 MMT). Higher area coverage has encouraged govt to up production estimate. Crop condition is good and arrival pressure is expected by the end of this month. Prices of Chana may decrease to Rs 4500 per qtl. in peak arrival season.

### Pulses International Fundamental:

- **As per latest update By Canadian Market experts Chickpeas production in Canada** in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha. This season Canada may end up with 1.15 lakh tonne export while export volume for 2017-18 has been trimmed to 90,000 MT. Domestic use may increase to 63,000 MT in coming MY. In the first week of March around 2000 MT export has been reported, lower 1600 MT from corresponding time. Chickpeas traded mixed in local market as Kabuli types get firmer. Desi type traded weak due to weak demand from India. However, Australian Chickpeas export for India remains strong. Australia has shipped 3.03 lakh tonne Chickpeas so far. Out of this 90 % shipped to Indian subcontinent.
- **Pressure on Canadian Lentils Market continues due to slackening fresh export** demand from bulk buyers like Pakistan and India. Exporters are engaged only to fulfill their old export obligation. However, green Lentils market stayed steady to slightly firm due to quality and grades. Large green Laird (15/64) plant delivery average price is being quoted at 54 cents per pound, Laird one is being traded at 49.43 cent per pound while Laird -2 is being traded at 42 cent per pound in western Canada. Medium green (Richlea) is being traded at 38.50 to 39.60 cent per pound. Small green (estone variety) is being traded at 44.07 cent per pound. Small red is being traded at 22/23 cent per pound. Pressure is likely to continue despite acreage for new planting is likely to reduce by 33 percent this year.
- **As per latest Canadian Grain Commission data Canada has exported** around 43000 T peas during week ended 26th February-2017 and total figure for the year so far has reached at 21.9 lakh tonne, higher by 4.4 lakh tonne from last year till date. Farmers have supplied 28.5 lakh tonne so far against 20.6 lakh tonne last year. Number 2 Laird lentils currently top out at about 56 cents per pound in Western Canada, with new crop bids as high as 36 cents per pound. Red lentils are bid up to 25 cents per pound in the spot market and as high as 23 cents per pound for new crop. Large calibre (10mm) kabuli chickpeas are currently hovering around 47 cents per pound in Western Canada.
- **Canada has just revised up adv. estimates of average pulses prices for 2016-17** despite some downward correction in prices in recent days. Agriculture and Agro Food Canada (Govt. agency, AAFC). AAFC has estimated price for peas in between C\$290/310 per tonne while Lentils average price may hover C\$ 615 to 630 per tonne. Chana may hinge in between C\$910/ 930 per T. AAFC had estimated matar price to hover in between C\$ 280/310 per T. Chana and Lentils price projections were C4900/930 and 605/635 per tonne.
- **Canada Agriculture & Agro Foods has estimated 42.5 lakh tonne peas production** for 2017-18, lower by around 6 lakh to 48.36 lakh tonne in 2016-17. However, production estimates for Chana and Lentils has been revised up to 14.50 lakh tonne and 35 lakh tonne respectively. In 2016-17 Canada has produced 32.48 lakh tonne Lentils
- **The US latest report reveals that Chickpeas production in 2016 in US jumped** from 115350 tonne (2015) to 247,047 tonne. The reason behind higher production is said to be higher area coverage and above normal yield. Production of larger Chickpeas (8mm) increased from 72896 to 159,167 tonne. Smaller Chickpeas production too increased from 42457 to 87907 tonne. As production size has gone up, export volume too has gone up by 15 to 16 % this year.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. The season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.
- **Lentils production in Canada has been estimated at 32.48 lakh tonne for 2016-17.** It had produced 25.41 lakh tonne in 2015-16. The season started with 0.73 lakh tonne as opening stock while it was 3.65 lakh

tone in 2015-16. Import too have increased from 16 to 75 thousand tonne in 2016-17. Thus total supply has been pegged at 33.96 lakh tonne against 29.21 lakh tonne last year. Total demand for this year has been pegged at 27.96 lakh tonne against 28.49 lakh tonne last year. The season may end with 6 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$585 to 615 per tonne, depending on quality. Last year its average was \$965 per tonne.
