

Pulses Domestic Fundamentals:

- **Government has procured around 16.88 lakh tonnes including 3.79 lakh tonnes** of imports towards building the buffer stock of pulses of upto 20 lakh tonnes as on 28.03.2017. Government has approved creation of a buffer stock of upto 20 lakh tonnes of pulses under the Price Stabilization Fund (PSF). The domestic procurement of the pulses is from farmers/farmers' association at farm gate/Mandi through designated agencies viz., NAFED, FCI and SFAC. Government procured Arhar and Moong during KMS 2016-17 to extend MSP support to farmers and simultaneously build the buffer.
- **India relaxed the fumigation regulation for import of agriculture commodities for another three months to June -2017.** Circulation regarding this has been issued yesterday. Govt has decided that all imported agriculture commodities whose date of bill of lading in the country of export is 30th June -2017 or before and for which treatment with methyl bromide fumigation is stipulated in plant quarantine order,2003 will be allowed without offshore methyl bromide fumigation from those countries which certifies discontinuation of this chemical for phytosanitary measure.
- **Govt .has set Chana procurement target at 4 lakh tonne this year. However, it would be difficult to buy from domestic market as prices of Chana is ruling higher than MSP (Rs3800+ Rs200 as bonus) right now.** So maximum buying is expected from overseas market. As of now govt procurement agencies have procured around 16 lakh tonnes pulses. Govt may decide to buy Chana from domestic market above MSP later if situation arises.
- **State cabinet in Orissa anticipating implementation of GST from 1st July,2017 has** extended VAT concession on pulses for another three months till 30th June-2017. The State Government had reduced tax rate on pulses from 5 per cent to 1 per cent for a period of three months since July 2016 and subsequently the benefit was extended for subsequent three months till March 31.
- **South Indian millers imported 363 containers pulses at Chennai & Krishnapatnam ports during week ended 21st, March-2017.** Previous week (11-16, March) they had imported 407 containers pulses. Out of total 363 containers Black Maize share was 164 containers. It is lower by 12.30 percent from previous week. Besides, 67 containers Tur whole and 58 containers Chickpeas have been imported. Green Moong bean remained unchanged at 30 containers while lentils and Green Peas share were recorded at 17 containers each
- **Despite expectation of import duty on major pulses. Govt. finally imposed 10 % duty only on Tur from immediate effect.** It would help Tur price to recover from current level. Besides, govt. has decided to continue procurement of Tur beyond 15th April. Now procurement would continue till 30 April-2017. With imposition of import duty Myanmar may decrease CnF quotes for India by \$10 to neutralize its impact. Currently It is supplying Tur at \$625 per T.
- **Mumbai Tur Lemon(old) opened at Rs 4500 and Rs 4450 (new) per qtl. and traded firm** from previous close. Uptrend is likely to continue based on hope for imposition of duty in the 1st week of April. Urad FAQ traded up at Rs 6150/6200 and SQ at Rs 7100/7200. Imported Chana in Mumbai traded up by Rs200 to Rs 5750/5800. Uptrend is unlikely to continue as buyers have preferred to stay away from market due to suspicion over duty. Trading range of Chana may be Rs 5500 to Rs 5700 in Mumbai. It is being offered at Rs5800 at Mundra Port. Canadian Masur is being offered at Rs 4400/4450 per qtl. and Australian Lentils are being offered at Rs4500/4550 per Qtl. Steady to slightly weak tone may be seen during March-2017. Downward correction is expected this week.
- **Burma offers Lemon Tur at \$620/625 per tonne on CiF basis, up by \$10 from previous week.** Urad FAQ is being offered at \$850 and SQ at \$1100 per tonne, Moong Pedisheva is being offered at \$1000/1020 per tonne While Pakaois at \$760 per tonne. Tur and Urad CNF offer has been increased. But demand at higher level has decreased. CnF quotes in Burma may stay steady to firm in coming weeks. Demand from India may decrease due to higher availability in domestic market.
- **Lentils production this year is expected to increase by 14 to 15 % to around 12 lakh tonne this year.** Higher area coverage (16.50 lakh ha) supported by good weather condition so far, have increased prospects for bigger crop size. Crop condition is very good so far.

Pulses International Fundamental:

- **Peas & Lentils exporters from Canada are worried a lot over crop fumigation policy in India.** Canada is currently enjoying exemption and exporters are allowed to fumigate pulses at destined port with methyl bromide, an insect-killing gas. Now it will expire on 31st March-2017. However, importers in India seem to have assurance from concerned minister for extension for three months upto June-2017. Actually govt has agreed to extend it for next three months to allow exporter/importers to find a substitute for it. Notification regarding this is awaited.
- **According to the Ukrainian Ag Ministry forecast Peas area coverage in Ukraine would increase by 15.5 % to 2.76 Lakh ha in 2017 from 2.39 lakh ha in 2016.** Farmers have decided to increase the proportion of crop rotation. Farmers had planted 31 % higher area from govt estimate of 1.82 lakh ha in 2016. Planting pace is higher by 32 % this year so far. Farmers in Odesa, Mykolaiv, Kherson, Zaporizhia regions too have planted 5 to 10 % higher area so far. This year total planted area may hit 7 years high.
- **The Canadian Grain Commission (CGC) reports 196,400 metric tons (MT) field pea** were loaded for export through licensed terminal and primary elevators which are required to report to it all grain movement in February. It is up 43% from the 250,900 MT shipped the same month last year and up 39% from the 137,800 MT loaded for export the previous month.
- **Lower area coverage under Chickpeas in Australia and** farmers shifting from Chickpeas to Canola, warmer weather in US Chickpeas growing area have helped kabuli Chana price moving up in national and international market. Nine millimetre varieties increased three cents per pound while 10 millimetres ended four cents higher than previous session. Indian pulses import may touch 6MMT in 2016-17. It too helped prices to trade firm. However, Indian import demand may decrease due to record local crop this year. So price of Kabuli Chana in global market may trade steady to slightly weak in April-May -2017.
- **Canada exported 87900 tonnes of peas and only 100 tonnes of lentil in the week ending 12th March'17.** The total pea and lentil exports are about 2.36 MMT and 607200 tonnes till date. Agriculture and Agri-Food Canada has forecasted that pea and lentil ending stocks are likely to increase to 1.1 MMT and 925000 tonnes in 2017/18.
- **As per latest update By Canadian Market experts Chickpeas production in Canada** in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha. This season Canada may end up with 1.15 lakh tonne export while export volume for 2017-18 has been trimmed to 90,000 MT. Domestic use may increase to 63,000 MT in coming MY. In the first week of March around 2000 MT export has been reported, lower 1600 MT from corresponding time. Chickpeas traded mixed in local market as Kabuli types get firmer. Desi type traded weak due to weak demand from India. However, Australian Chickpeas export for India remains strong. Australia has shipped 3.03 lakh tonne Chickpeas so far. Out of this 90 % shipped to Indian subcontinent.
- **Canada has just revised up adv. estimates of average pulses prices for 2016-17** despite some downward correction in prices in recent days. Agriculture and Agri-Food Canada (Govt. agency, AAFC). AAFC has estimated price for peas in between C\$290/310 per tonne while Lentils average price may hover C\$ 615 to 630 per tonne. Chana may hinge in between C\$910/ 930 per T. AAFC had estimated matar price to hover in between C\$ 280/310 per T. Chana and Lentils price projections were C4900/930 and 605/635 per tonne.
- **Canada Agriculture & Agro Foods has estimated 42.5 lakh tonne peas production** for 2017-18, lower by around 6 lakh to 48.36 lakh tonne in 2016-17. However, production estimates for Chana and Lentils has been revised up to 14.50 lakh tonne and 35 lakh tonne respectively. In 2016-17 Canada has produced 32.48 lakh tonne Lentils
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. The season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
Area seeded (kha)	1,263	1,597	2,080
