

**Pulses Domestic Fundamentals:**

- **Govt of India may increase MSP for Tur and Moong by Rs 200 & Rs 475 per qtl for incoming kharif season 2017-17,** starting from July this year. The Commission for Agricultural Costs and Prices (CACP) has recommended it and sent it to ministry of Agriculture for examine the proposal. After examination Ministry would send it to cabinet for approval. Generally govt. accepts recommendation of CACP as we have seen in past years. In percentage terms, these would be around 4 and 9% for tur and moong and may be fixed at Rs 5,250 a quintal and Rs 5,700 a quintal. Bonus can also be offered as govt is keen to encourage production.
- **South Indian millers imported 345 containers pulses at Chennai & Krishnapatnam ports during week ended 27<sup>th</sup>, March-2017.** Previous week (17-12, March) they had imported 338 containers pulses. Out of total 345 containers Black Mapte share was 178 containers. It is higher by 8.54 percent from previous week. Besides, 70 containers Tur whole and 27 containers Chickpeas have been imported.
- **Pulses quotes in forward deals continued to increase and it hints domestic market to trade steady to firm in the near to medium term.** Ukraine yellow peas May shipment CnF quote was heard at \$345 for Tuticorin/Nhava Sheva. It was \$ 355 for Kolkata. Broken Red Lentils of Canadian origin was quoted at \$555 for Nhava Sheva in 25kg PP bags.
- **Australian Desi Chickpeas was quoted at \$920 for May delivery,** June \$930 and July \$960 per T. Australian green Moong was quoted at \$955 for April/May delivery. Australian Red Whole Lentils was quoted at \$665 per T for May delivery. Myanmar origin Urad was quoted at \$ 917 for FAQ and \$1118 for SQ variety for Chennai and Nhava Sheva port.
- **Indian govt. recent decisions regarding pulses are likely to benefit exporting countries as well as domestic farmers.** Import duty (10%) on Tur helped domestic market to move up from Rs 4200 to Rs 4500/4600 per qtl. in last three -four days. Besides, extension on agri fumigation policy for another three months till June -2017 has ensured exporting countries to continue export and find out the option for the same till June-2017. Govt has not brought other pulses in import net. However, all efforts are being made to increase production on domestic level. As 2017 is considered as balanced year at supply-demand side due to bumper production, dependence on import would decrease if weather in kharif season remains favorable. Pulses market is expected to stay steady to slightly firm in the month of April.
- **Government has procured around 16.88 lakh tonnes including 3.79 lakh tonnes of imports towards building the buffer stock of pulses of upto 20 lakh tonnes as on 28.03.2017.** Government has approved creation of a buffer stock of upto 20 lakh tonnes of pulses under the Price Stabilization Fund (PSF). The domestic procurement of the pulses is from farmers/farmers' association at farm gate/Mandi through designated agencies viz., NAFED, FCI and SFAC. Government procured Arhar and Moong during KMS 2016-17 to extend MSP support to farmers and simultaneously build the buffer.
- **India relaxed the fumigation regulation for import of agriculture commodities for another three months to June -2017.** Circulation regarding this has been issued yesterday. Govt has decided that all imported agriculture commodities whose date of bill of lading in the country of export is 30<sup>th</sup> June -2017 or before and for which treatment with methyl bromide fumigation is stipulated in plant quarantine order, 2003 will be allowed without offshore methyl bromide fumigation from those countries which certifies discontinuation of this chemical for phytosanitary measure.
- **Despite expectation of import duty on major pulses. Govt. finally imposed 10 % duty only on Tur from immediate effect.** It would help Tur price to recover from current level. Besides, govt. has decided to continue procurement of Tur beyond 15<sup>th</sup> April. Now procurement would continue till 30 April-2017. With imposition of import duty Myanmar may decrease CnF quotes for India by \$10/15 to neutralize its impact. Currently It is supplying Tur at \$625 per T.
- **Lentils production this year is expected to increase by 14 to 15 % to around 12 lakh tonne this year.** Higher area coverage (16.50 lakh ha) supported by good weather condition so far, have increased prospects for bigger crop size. Crop condition is very good so far.

**Pulses International Fundamental:**

- **Peas & Lentils exporters from Canada are worried a lot over crop fumigation policy in India.** Canada is currently enjoying exemption and exporters are allowed to fumigate pulses at destined port with methyl bromide, an insect-killing gas. Now it will expire on 31st March-2017. However, importers in India seem to have assurance from concerned minister for extension for three months upto June-2017. Actually govt has agreed to extend it for next three months to allow exporter/importers to find a substitute for it. Notification regarding this is awaited.
- **According to the Ukrainian Ag Ministry forecast Peas area coverage in Ukraine would increase by 15.5 % to 2.76 Lakh ha in 2017 from 2.39 lakh ha in 2016.** Farmers have decided to increase the proportion of crop rotation. Farmers had planted 31 % higher area from govt estimate of 1.82 lakh ha in 2016. Planting pace is higher by 32 % this year so far. Farmers in Odesa, Mykolaiv, Kherson, Zaporizhia regions too have planted 5 to 10 % higher area so far. This year total planted area may hit 7 years high.
- **The Canadian Grain Commission (CGC) reports 196,400 metric tons (MT) field pea** were loaded for export through licensed terminal and primary elevators which are required to report to it all grain movement in February. It is up 43% from the 250,900 MT shipped the same month last year and up 39% from the 137,800 MT loaded for export the previous month.
- **Lower area coverage under Chickpeas in Australia and** farmers shifting from Chickpeas to Canola, warmer weather in US Chickpeas growing area have helped kabuli Chana price moving up in national and international market. Nine millimetre varieties increased three cents per pound while 10 millimetres ended four cents higher than previous session. Indian pulses import may touch 6MMT in 2016-17. It too helped prices to trade firm. However, Indian import demand may decrease due to record local crop this year. So price of Kabuli Chana in global market may trade steady to slightly weak in April-May -2017.
- **Canada exported 87900 tonnes of peas and only 100 tonnes of lentil in the week ending 12th March'17.** The total pea and lentil exports are about 2.36 MMT and 607200 tonnes till date. Agriculture and Agri-Food Canada has forecasted that pea and lentil ending stocks are likely to increase to 1.1 MMT and 925000 tonnes in 2017/18.
- **As per latest update By Canadian Market experts Chickpeas production in Canada** in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha. This season Canada may end up with 1.15 lakh tonne export while export volume for 2017-18 has been trimmed to 90,000 MT. Domestic use may increase to 63,000 MT in coming MY. In the first week of March around 2000 MT export has been reported, lower 1600 MT from corresponding time. Chickpeas traded mixed in local market as Kabuli types get firmer. Desi type traded weak due to weak demand from India. However, Australian Chickpeas export for India remains strong. Australia has shipped 3.03 lakh tonne Chickpeas so far. Out of this 90 % shipped to Indian subcontinent.
- **Canada has just revised up adv. estimates of average pulses prices for 2016-17** despite some downward correction in prices in recent days. Agriculture and Agri-Food Canada (Govt. agency, AAFC). AAFC has estimated price for peas in between C\$290/310 per tonne while Lentils average price may hover C\$ 615 to 630 per tonne. Chana may hinge in between C\$910/ 930 per T. AAFC had estimated matar price to hover in between C\$ 280/310 per T. Chana and Lentils price projections were C4900/930 and 605/635 per tonne.
- **Canada Agriculture & Agro Foods has estimated 42.5 lakh tonne peas production** for 2017-18, lower by around 6 lakh to 48.36 lakh tonne in 2016-17. However, production estimates for Chana and Lentils has been revised up to 14.50 lakh tonne and 35 lakh tonne respectively. In 2016-17 Canada has produced 32.48 lakh tonne Lentils
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. The season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

**Canada Lentil Production Estimate**

	<b>2014-2015</b>	<b>2015-2016[f]</b>	<b>2016-2017[f]</b>
<b>Area seeded (kha)</b>	1,263	1,597	2,080
