

Pulses Domestic Fundamentals:

- **State govt's production figure of Chana in third adv. estimates seem to be very optimistic** and market experts express doubt over it as central govt may revise it up from 91.2 to 95 lakh tonne in 3rd adv estimate. If we add this figure with 8 lakh tonne import & around 1 lakh tonne carryout total figure goes up to 104/105 lakh tonne against consumption of 90/95 lakh tonne. If availability is higher Chana price should rule near MSP at this point of time. But it is not happening so. This indicates inflated fig at production front. At ground level chana price is bound to go up from current level beyond Rs 6000 soon. Agriwatch sees consumption of Chana is higher than govt.'s expectation.
- **Imported Chana is ruling around Rs 5700/5800 and there is no hope for coming it down.** Forward deals are being struck at \$980/1010 per T. Notably, Govt sees production of Chana in MP at 43.37 lakh tonne, in Maharashtra at 17.77 lakh tonne, in Rajasthan at 13.82 lakh tonne, in Uttar Pradesh at 6.32 lakh tonne & in Karnataka at 3.9 lakh tonne. It brings the total figure at 85 lakh tonne. If we include production in Bihar and others states fig goes up to 95 lakh tonne. If production fig is over 95 lakh tonne price should have been near Rs 4000/4500 against actual of Rs 5000/5500 per qtl. So price is not supporting the fig of higher production. It is the right time to buy Chana. After mid May it would start moving up once again.
- **Food Corporation of India has suspended purchase of pulses on MSP for the season** from 22nd April-2017 as it has crossed the purchase target set by the Ministry Of Consumer Affairs. As stock has accumulated, focus is now on distribution and selling them to open market. It will put up pressure on pulses farmers as they are now on mercy of private trades especially in case of Tur. Tur is available in market at around Rs 4200 per qtl. against MSP of Rs 5050 per qtl. including bonus of Rs 425. As stock is ample with FCI May slow down purchases in forthcoming rabi season too. Govt.'s agencies have procured almost 18 lakh tonne pulses including 4 lakh tonne import against target of 20 lakh tonne buffer stock. Sale auction has already begun.
- **Myanmar Offered FAQ Urad at \$842 per tonne and SQ at \$1014 per tonne at Nhava Sheva port** for May/June delivery. Tanzania offers Moong at \$ 700 per T and Mozambique at \$670 per t at Nhava Sheva port for May delivery. Myanmar Lemon tur is being offered at \$595 per T for same destination. Canadian red lentils are being offered at \$555 per tonne at Nhava Sheva port. Australian Kabuli Chickpeas at \$1010, Australian Chana at \$975 for June delivery have been reported. Australian red whole lentil is being offered at \$645 per tonne. Split Lentils have been reported at \$855 per tonne. Turkish white point of red split lentils are being offered at \$525 per tonne.
- **Around 70 containers Tur landed at Nhava Sheva port on 26th April-2017** from Myanmar origin. Besides 6 containers Australian Chickpeas, 10 containers Lentils and 4 containers US yellow peas too arrived on same port. 15 containers Tur from Sudan too landed on Nhava Sheva port. Total 163 containers landed yesterday on Nhava Sheva port.
- **India imported 9672 MT Chana in March-2017 against 9192 MT in February at Chennai port.** Import flow continues in April too despite higher forward quotes for Australian Chana. South Indian importers imported only 13 containers chickpeas during 9th to 12th April-2017 at Chennai port.
- **India imported around 296 containers of pulses at Krishnapatnam and Chennai port** during 28th March to 03rd April-2017 compared to 345 during 22nd to 27th March at the same ports. Of the total 296 containers share of Black mape was recorded at 158 containers. The second and third largest quantities were chickpeas and Toor Whole (44 & 36 containers). The rest were other pulses like Green Moong, yellow peas, lentils etc.
- **Pulses quotes in forward deals continued to increase and it hints domestic market** to trade steady to firm in the near to medium term. Ukraine yellow peas May shipment CnF quote was heard at \$345 for Tuticorin/Nhava Sheva. It was \$ 355 for Kolkata. Broken Red Lentils of Canadian origin was quoted at \$555 for Nhava Sheva in 25kg PP bags.
- **Indian govt. recent decisions regarding pulses are likely to benefit exporting** countries as well as domestic farmers. Import duty (10%) on Tur helped domestic market to move up from Rs 4200 to Rs 4350/4400 per qtl. in last three -four days. Besides, extension on agri fumigation policy for another three months till June -2017 has ensured exporting countries to continue export and find out the option for the same till June-2017. Govt has not brought other pulses in import net.

Pulses International Fundamental:

- **Ukraine has exported around 3.33 lakh tonne peas so far in 2016-17 marketing year** started from July 2016. It had exported 1.82 lakh tonne during the same period last year. As export demand from Asia continues CnF quotes remain steady to slightly firm. **Lentils in Western Canada** hovers around 47 to 48 cent per pound. However, new crop bids hinge in range of 31 to 39 cents per pound. Red Lentils are being offered at 22 to 26 cents per pound. Canada offers Kabuli Chickpeas at 67 to 68 cent per pound. Against it Burmese CnF eased slightly in this week.
- **Experts differ on Canadian pulses acreage for the crop year 2017-18. Notably, Canada** had produced record Peas and Lentils last year on the back of record area coverage. Survey based estimates of statistics Canada see Lentils area may vary from 3.9 to 6.1 million acres against 5.9 million acres covered last year. In case of Peas area estimate varies from 3.6 to 4.8 million acres against last year coverage of 4.2 Million acres. The main reason behind a wide gap in acreage estimate is mainly attributed to uncertainty over Indian demand and quality issues seen in Canadian crop last year. These factors go in favour of lower acreage. However, good return per acre and low inputs cost go in favour of higher area coverage. Govt.'s estimate is yet to come. Lower price factor too may impact final size of the acreage.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year. Area coverage has increased from 2.39 lakh ha to 2.9 lakh ha and with expected 3.16 tonne per ha yield production may touch 9 lakh tonne this year. It has exported around 3 lakh tonne peas in first eight months of 2016-17. Higher acreage would compensate likely acreage loss in Canada.
- **Turkey has abolished 19.3 % import duty on Chickpeas with immediate effect and it** would continue till 1st of July-2017 for taming the inflation. Turkey produces 4 to 5 lakh tonne Chickpeas per year against consumption of 5 to 5.5 lakh tonne annually. It exports small quantity around 15/20 thousand tonne too. Lower production, weak local currency and higher prices in global market encouraged local chickpeas price by 100 % in a year.
- **Canada has revised its average price estimates for pulses for crop year 2016-17.** Canadian Govt agency has revised average price for Chickpeas, Peas and Lentils upto C\$ 910-930 per T, 290-310 & 610-615 per T. This shows strong demand in Canadian market continues. In Jan average prices estimate for the year were C\$900-930 for Chana, C\$280-310 for peas and C\$605 -635 for Lentils.
- **During 2016-17 crop year Canada is expected to produce 48.36 lakh tonne peas, 32.48 lakh T Lentils and 82,000 T Chana.** Against this in 2017-18 production of chickpeas, peas and Lentils is likely to increase to 1.45, 42.50 and 35 lakh tonne. Peas production would decrease due to lower prevailing price and weak demand from India. If demand continues average price estimate may be revised further up.
- **Australian Chickpeas farmers are expected to cover higher area under this crop in 2017** due to conducive weather and strong demand from India. Chickpeas prices in Australia jumped around \$125 to \$135 per tonne to \$915 in last one month. Demand for Chickpeas continues from India, Pakistan and B, desh. Exporters are trying to meet Indian growing demand. India has brought around 1 MMT Chickpeas from last year crop. As per ABS export data India imported 9.5 lakh tonne Chana from October to February-2017. Pakistan and B, desh have brought 325,000 and 60,000 tonne Chickpeas in same period. Ample rainfalls in March-2017 have provided the ideal start for another huge planting of chickpeas. Farmers in Queensland had planted 4.74 lakh ha last year. Higher price would encourage farmers to increase 20 to 25 % area under Chickpeas.
- **As per latest update By Canadian Market experts Chickpeas production in Canada in MY 2017-18** may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha. This season Canada may end up with 1.15 lakh tonne export while export volume for 2017-18 has been trimmed to 90,000 MT. Domestic use may increase to 63,000 MT in coming MY. In the first week of March around 2000 MT export has been reported, lower 1600 MT from corresponding time. Chickpeas traded mixed in local market as Kabuli types get firmer. Desi type traded weak due to weak demand from India. However, Australian Chickpeas export for India remains strong. Australia has shipped 3.03 lakh tonne Chickpeas so far. Out of this 90 % shipped to Indian subcontinent.
- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. The season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been

pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
Area seeded (kha)	1,263	1,597	2,080
