

Pulses Domestic Fundamentals

- **Progressive planting of Pulses is running smooth on the back of good monsoon rains in major producing States.** Indian farmers have covered 44.41 lakh ha under kharif pulses till 07th July-2017. Till date, it is higher by 22.94 % (35.88 lakh ha last year) than area covered last year. Normal area under kharif pulses is 105.58 lakh ha. However, area under Tur has declined by 5.63 % to 14.25 lakh ha (last year 15.10 lakh ha) so far. Normal area under Tur is 39.24 lakh ha. Urad and Moong area is running ahead by 36.89 and 23.91 % to 10.13 lakh ha (last year 7.40 lakh ha) and 12.49 lakh ha (last year 10.08 lakh ha) respectively. Kulthi area is lags behind by 60 % to 0.04 lakh ha so far.
- **PQ Department has extended the permission for MBR Fumigation at port** of arrival for agri-commodities from Canada, USA and France. While the extension given to Canada is applicable on all consignments with BL Date of Sept. 30th, 2017 or before; the extension given to USA and France is for all consignments with BL Date of Dec. 31st, 2017 or before.
- **Bulgarian yellow peas Quoted at \$390 per tonne on CnF basis at Nhava Sheva port.** Ukraine origin quoted at \$288 for same destination and for Tuticorin it was quoted at \$295 per tonne. Bulgarian Chickpeas (8mm) was quoted at \$1335 per tonne for same destination. Australian Chickpeas July /Aug delivery was quoted at \$855 per ton. Australian white Chick peas was offered at 4870 per tonne. Red Whole Lentils was offered at 4585 per tonne for July /Aug delivery. Green Moong Bean was offered at \$840 per tonne. Urad FAQ was offered at \$693 and SQ was at 699 per tonne.. Myanmar Lemon Tur was offered at 527 per T. Australian red whole Lentils was offered at \$595 per T..
- **Pulses progressive planting is running smooth on the back of good monsoon rains in major producing states.** Indian farmers have covered 18.80 lakh ha under kharif pulses till 30th June-2017. It is higher by 44.13 % (13.05 lakh ha) from last year till date. Normal area under kharif pulses is 105.58 lakh ha. However, area under Tur has declined by 11.22 % to 5.69 lakh ha (last year 6.41 lakh ha) so far. Normal area under Tur is 39.24 lakh ha. Urad and Moong area is running ahead by 71.09 and 88.39 % to 2.92 lakh ha (last year 1.71 lakh ha) and 6.26 lakh ha (last year 3.32 lakh ha) respectively. Kulthi area is running behind by 33 % to 0.02 lakh ha so far.
- **Despite extension of deadline for fumigation with methyl bromite for all pulses** import in India up to 31st December-2017, additional charges applicable on pulses import may increase costing of pulses import and its not a good new for Canada and other exporting countries. Extension has been given with condition that exporters who export pulses and grains to India without fumigation, would have to pay 5 times of normal fees for fumigation at Indian ports. With this condition exporters can ship pulses and other grains till 31st December-2017.
- **Before 30th June India used to charge Rs 3600 per 20" containers, the charges would** be now Rs 18000 per 20" containers. India imports around 20,000 containers yearly from Canada. It would increase the cost of import. Besides, due to GST importers are hesitant to book new orders in forward months. So import flow would decrease and it would push up pulses prices in coming weeks. It remains to be seen whether Canada gets any relaxation
- **Chana prices are unlikely to decrease from current level and it may move up by Rs 1000 per qtl.** in next two months despite bearish tone in other pulses. Among other pulses Chana is still ruling above MSP of Rs 4000 including bonus of Rs 200 for 2017-18 MY. Farmers are not releasing stock and import flow has decreased comparatively in recent weeks. Govt.'s production fig is 9 MMT, while market sees it at 8.6 MMT. In private hands there is negligible stock. Against this consumption is over 10 MMT. This means availability is not more than 10 MMT including 0.7 lakh tonne likely import.
- **The Center govt. has hiked the MSP of pulses for the 2017-18 crop year** and instructed states to procure it on MSP so that farmers could be able to receive minimum support price. The maximum hike in the MSP is fixed for pulses. The MSP of tur (arhar) is increased from Rs 5,050 per quintal (including bonus) in 2016-17 to Rs 5,450 per quintal (including Rs 200 bonus) in 2017-18 -- a hike of 400 per quintal. Similarly, the support price of Urad increased from Rs 5,000 (including bonus) per quintal in 2016-17 to Rs 5,400 (including bonus) per quintal in 2017-18. In case of Moong, it is increased from Rs 5,225 (including bonus) per quintal in 2016-17 to Rs 5,575 (including bonus) in 2017-18.

Pulses International Fundamental:

- **Global Green lentils markets traded up on the back of growing worries about** moisture conditions in key lentil producing areas in North America. Drought like condition in Montana and North Dakota has increased worries among processors in the United States about the yield potential of Lentils. Montana accounting for 620,000 of the 1.015 million acres sown this year. North Dakota has sowed 300,000 acres of lentils this year.
- **The latest pulses crop report from Canada hints towards normal condition** for pulses plant growth. Dry peas, dry beans and Lentil plants condition is good. Till the last week of June-2017 rating agencies rated 81.2 % dry peas condition was excellent. Around 91 % dry beans and 83.8 % Lentils crops were found in good to excellent condition. In Alberta 38 % field peas are in pre-flowering stage. however long term average is 63 % at this point of time. Overall plant condition is considered to be normal so far.
- **Agriculture Food Canada has projected 24 lakh tonne Lentils export in crop year 2016-17.** It is up by 1lakh tonne from previous estimate. Premium large green lentil bids have decreased slightly about 42 cents per pound. New crop bids range from about 31 to 40 cents per pound. Red lentil bids range from about 23 to 26.5 cents per pound. Overall sentiment remains weak due to weakening of demand.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year** to 1101 thousand ha for 2017-18 crop. It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha** in 2017-18. However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area In Australia has been forecast down by 4.85 % to 219 thousand Ha** for 2017-18 crop due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Experts differ on Canadian pulses acreage for the crop year 2017-18. Notably, Canada** had produced record Peas and Lentils last year on the back of record area coverage. Survey based estimates of statistics Canada see Lentils area may vary from 3.9 to 6.1 million acres against 5.9 million acres covered last year. In case of Peas area estimate varies from 3.6 to 4.8 million acres against last year coverage of 4.2 Million acres.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year. Area coverage has increased from 2.39 lakh ha to 2.9 lakh ha and with expected 3.16 tonne per ha yield production may touch 9 lakh tonne this year. It has exported around 3 lakh tonne peas in first eight months of 2016-17. Higher acreage would compensate likely acreage loss in Canada.
- **As per latest update By Canadian Market experts Chickpeas production in Canada** in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

- **Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

Canada Lentil Production Estimate

	2014-2015	2015-2016[f]	2016-2017[f]
Area seeded (kha)	1,263	1,597	2,080
