

### Pulses Domestic Fundamentals

- **Chana Futures recovered smartly as expected. It may continue to trade in the range of Rs 5250 to 5350 per qtl.** Inner tone remains firm. Buying around Rs 5225/30 in October contract seems ideal level at this point of time. Mostly markets traded steady to slightly firm despite other pulses trading weak.
- **Lentils market is likely to trade steady to slightly weak as there is a plenty of stock in importing countries.** Lower crop size projection in exporting countries would not make much difference in the near to medium term. It will take time to consume large stock available in consuming countries.
- **Direction in global Chickpeas market depends on next Indian crop to be sowed after Oct. and monsoon rains.** Experts say that India and Pakistan would import less quantity from last year in current MY. In short, there is not much scope for Chana in the near term, while in medium term price would improve. In the long term price prospects seem good.
- **Pulses procurement agencies had performed well in Kharif pulses but they could not maintain same pace in ongoing Rabi procurement season.** Target for Rabi season is 5 lakh tonne (\$ lakh tonne Chana & 1 lakh tonne Masur). But procurement status shows that Nafed has procured only 19779 T Masur and 51,059 Tonne Chana against the set target of 5 lakh tonne. It is lower by 86 % from the target. In latter stage Rabi procurement target has been reduced to 4 lakh tonne. As govt has extended procurement time for three weeks, the size of Procured quantity is bound to go up. The three agencies (FCI, Nafed and SFAC) have procured 1.47 MMT against the target of 9.5 lakh tonne. Nafed itself has brought 665,000 tonnes pulses.
- **Food Corporation of India had procured 258268.51 lakh tonne pulses in Kharif Season 2016-17 till 21st June -2017.** Out of total procurement Tur Quantity was 175297.51, Urad quantity was 18234 and Moong quantity was 64737 tonne. Despite sales effort through e-auction the balance stock with FCI till 21st June - 2017 was 175297.51 for Tur, 18234 T for Urad and 60558.063 t for Moong. Sales effort continues through weekly auctions.
- **Progressive planting of Pulses is running ahead of last year, except Tur and Kulthi,** on the back of good monsoon rains in major producing States. Indian farmers have covered 74.61 lakh ha under kharif pulses till 14<sup>th</sup> July-2017. Till date, it is higher by 23.77 % (60.28 lakh ha last year) than area covered last year till date. Normal area under kharif pulses is 105.58 lakh ha.
- **Ukraine Whole Green Peas was offered at \$318 at Tuticorin port on CnF basis, for Kolkatta** it was offered at \$327 per tonne for July /August shipment. Yellow peas from same source and destination were offered at \$295 & \$300 per tonne. Myanmar offered FAQ Back Mapte at Nhava Shewa port at \$667 per tonne while SQ was offered at \$787 per tonne. For Kolkatta it was offered at \$674 & \$ 794 per tonne. Burma is offering Lemon Tur at Nhava Shewa port at \$517 for July and \$523 for Kolkatta port. Lower quotes by Burma have pressurized local Indian market. Sentiments in Burma Tur and Urad Markets Remain weak. Australian Chana prompt delivery was quoted at \$800 per tonne.
- **The Center govt. has hiked the MSP of pulses for the 2017-18 crop year and instructed states to procure it on MSP so that farmers could be able to receive minimum support price.** The maximum hike in the MSP is fixed for pulses. The MSP of Tur (arhar) is increased from Rs 5,050 per quintal (including bonus) in 2016-17 to Rs 5,450 per quintal (including Rs 200 bonus) in 2017-18 -- a hike of 400 per quintal. Similarly, the support price of Urad increased from Rs 5,000 (including bonus) per quintal in 2016-17 to Rs 5,400 (including bonus) per quintal in 2017-18. In case of Moong, it is increased from Rs 5,225 (including bonus) per quintal in 2016-17 to Rs 5,575 (including bonus) in 2017-18.

**Pulses International Fundamental:**

- **Marketing season In Canada is coming to an end now and shipments pace is decreasing as expected.** Field Peas stock is still ample. According to Canadian Grain Commission around 500 MT field peas has been exported from the country during 3rd to 9th July 2017. Total peas export 33,29,600 tonne so far against 2,355,100 MT during corresponding time last year. Farmers in Canada has supplied 3,875,100 MT so far. It was 2,355,100 MT last year.
- **Lentils growing area in Canada is facing hot and dry condition and there is a growing fear that crop yield may suffer if the prevailing weather condition persists.** The impact of grower's bids remains unchanged as of now. But new crop indicative price has started showing improvement so that new crop price starts matching with spot price. Exporters are not willing to sell new crop's Lentils. It may support Lentils price in global market.
- **Agriculture Food Canada has projected 24 lakh tonne Lentils export in crop year 2016-17.** It is up by 1 lakh tonne from previous estimate. Premium large green lentil bids have decreased slightly about 42 cents per pound. New crop bids range from about 31 to 40 cents per pound. Red lentil bids range from about 23 to 26.5 cents per pound. Overall sentiment remains weak due to weakening of demand.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year to 1101 thousand ha for 2017-18 crop.** It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha in 2017-18.** However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area In Australia has been forecast down by 4.85 % to 219 thousand Ha for 2017-18 crop** due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Experts differ on Canadian pulses acreage for the crop year 2017-18.** Notably, Canada had produced record Peas and Lentils last year on the back of record area coverage. Survey based estimates of statistics Canada see Lentils area may vary from 3.9 to 6.1 million acres against 5.9 million acres covered last year. In case of Peas area estimate varies from 3.6 to 4.8 million acres against last year coverage of 4.2 Million acres.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year. Area coverage has increased from 2.39 lakh ha to 2.9 lakh ha and with expected 3.16 tonne per ha yield production may touch 9 lakh tonne this year. It has exported around 3 lakh tonne peas in first eight months of 2016-17. Higher acreage would compensate likely acreage loss in Canada.
- **As per latest update By Canadian Market experts Chickpeas production in Canada in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18.** Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

- Matar production in Canada has been estimated at 48.35 lakh tonne for 2016-17.** It had produced 32.01 lakh tonne in 2015-16. the season started with 1.76 lakh tonne as opening stock while it was 6.84 lakh tonne in 2015-16. Import too have increased from 16 to 29 thousand tonne in 2016-17. Thus total supply has been pegged at 50.40 lakh tonne against 39.01 lakh tonne last year. Total demand for this year has been pegged at 41.60 lakh tonne against 37.24 lakh tonne last year. The season may end with 8.8 lakh tonne peas that hints ample supply to continue throughout the year. Prices are ruling at \$260 to 290 per tonne, depending on quality.

**Canada Lentil Production Estimate**

	2014-2015	2015-2016[f]	2016-2017[f]
<b>Area seeded (kha)</b>	1,263	1,597	2,080
