

Pulses Domestic Fundamentals

- **India imported 828 containers pulses at JNPT port as on 22nd July-2017.** Out of total major share was of chickpea. Around 184 containers of chickpea landed at JNPT. Black Mapte contribution was registered at 80 containers. Besides, pigeon pea, Lentils, Green Moong and green pea contribution were registered at 269, 123, 48 and 102 containers respectively. There was no import of yellow peas.
- **Pulses market may continue to trade under pressure as supply from overseas market continues unabatedly.** Tur, Urad, Masoor and Moong are unable to get support from demand. Exporters are at hurry to offload their marketable surplus as soon as possible as they are well aware of the fact that India is going to harvest bumper kharif crop once again as weather remains favorable throughout the growing regions. New African Tur, Moong crops would start hitting market by Sept end. Myanmar has ample stock of Urad and Tur. So there is no scope for Pulses to move up except Chana in the near term.
- **Lemon Tur in Burma was quoted at \$500 per tonne CnF for Indian ports.** It was quoted almost unchanged for last three days. Urad FaQ was quoted at \$620 per tonne and SQ at \$ 735 per tonne. It was also quoted unchanged. Moong Pediseva was quoted at \$1150 per tonne. Desi Chickpeas Ethiopian origin was quoted at \$ 940 (Shewa type), Gonder type at \$1070 per tonne, Kabuli at \$1070 and RSKB at \$810 on FoB basis per tonne. Argentina chickpeas split was traded at \$800 per tonne CnF Nhava Shewa. Ukraine origin yellow peas was quoted at \$295 per T CnF Tuticorin.
- **Haryana Govt. will distribute 4820 tonne pulses to poor families in the state** at subsidized rate of Rs 2.5 per KG. The nos. of poor families are around 11.28 lakh. Each card holder will get 5 KG Masur Sabut per month. This step has been taken to make protein rich pulses available to all poor families- according to a spokesman of Food, Civil Supplies and Consumer Affairs Department.
- **Direction in global Chickpeas market depends on next Indian crop to be sowed** after Oct. and monsoon rains. Experts say that India and Pakistan would import less quantity from last year in current MY. In short, there is not much scope for Chana in the near term, while in medium term price would improve. In the long term price prospects seem good.
- **Pulses procurement agencies had performed well in Kharif pulses but they** could not maintain same pace in ongoing Rabi procurement season. Target for Rabi season is 5 lakh tonne (\$ lakh tonne Chana & 1 lakh tonne Masur). But procurement status shows that Nafed has procured only 19779 T Masur and 51,059 Tonne Chana against the set target of 5 lakh tonne. It is lower by 86 % from the target. In latter stage Rabi procurement target has been reduced to 4 lakh tonne. As govt has extended procurement time for three weeks, the size of Procured quantity is bound to go up. The three agencies (FCI, Nafed and SFAC) have procured 1.47 MMT against the target of 9.5 lakh tonne. Nafed itself has brought 665,000 tonnes pulses .
- **Food Corporation of India had procured 258268.51 lakh tonne pulses in Kharif Season 2016-17 till 21st June -2017.** Out of total procurement Tur Quantity was 175297.51, Urad quantity was 18234 and Moong quantity was 64737 tonne. Despite sales effort through e-auction the balance stock with FCI till 21st June - 2017 was 175297.51 for Tur, 18234 T for Urad and 60558.063 t for Moong. Sells effort continues through weekly auctions.
- **Progressive planting of Pulses is running ahead of last year, except Tur and Kulthi,** on the back of good monsoon rains in major producing States. Indian farmers have covered 74.61 lakh ha under kharif pulses till 14th July-2017. Till date, it is higher by 23.77 % (60.28 lakh ha last year) than area covered last year till date. Normal area under kharif pulses is 105.58 lakh ha.

Pulses International Fundamental:

- **Marketing season In Canada is coming to an end now and shipments pace is decreasing as expected.** Field Peas stock is still ample. According to Canadian Grain Commission around 500 MT field peas has been exported from the country during 3rd to 9th July 2017. Total peas export 33,29,600 tonne so far against 2,355,100 MT during corresponding time last year. Farmers in Canada has supplied 3,875,100 MT so far. It was 2,355,100 MT last year.
- **Lentils growing area in Canada is facing hot and dry condition and there is a growing fear that crop yield may suffer if the prevailing weather condition persists.** The impact of grower's bids remains unchanged as of now. But new crop indicative price has started showing improvement so that new crop price starts matching with spot price. Exporters are not willing to sell new crop's Lentils. It may support Lentils price in global market.
- **Agriculture Food Canada has projected 24 lakh tonne Lentils export in crop year 2016-17.** It is up by 1 lakh tonne from previous estimate. Premium large green lentil bids have decreased slightly about 42 cents per pound. New crop bids range from about 31 to 40 cents per pound. Red lentil bids range from about 23 to 26.5 cents per pound. Overall sentiment remains weak due to weakening of demand.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year to 1101 thousand ha for 2017-18 crop.** It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha in 2017-18.** However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area In Australia has been forecast down by 4.85 % to 219 thousand Ha for 2017-18 crop** due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year. Area coverage has increased from 2.39 lakh ha to 2.9 lakh ha and with expected 3.16 tonne per ha yield production may touch 9 lakh tonne this year. It has exported around 3 lakh tonne peas in first eight months of 2016-17. Higher acreage would compensate likely acreage loss in Canada.
- **As per latest update By Canadian Market experts Chickpeas production in Canada in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18.** Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

Canada Lentil Production Estimate
