

Pulses Domestic Fundamentals:

- **Pulses market is likely to trade firm on improved demand from retail markets, higher forward quotes, restriction on Tur import and fear of crop damage in US and Canada.** Besides, flooding in central India and dry spell in southern states have increased fear of local crop loss. Pulses market may continue to move up this week too.
- **Trades can Import only 2 lakh T Tur Per Year India has restricted import of Tur up to 2 lakh tonne.** In MY (April to March) traders would not be able to import more than 2 lakh tonne Tur. It will help local price to improve. Restriction would help to recover Lentils price too in domestic market. India had imported 703540 T Tur in MY 2016-17, ended March-2017. India had produced around 4.4MMT Tur last year. Due to lower price Tur area this year has decreased by 20 % to 37.5 lakh ha so far. Its a positive step but delayed one. This restriction will impact countries like Myanmar, Mozambique, Tanzania and Malawi.
- **The pace of kharif pulses planting pace decreased in comparison to previous week** from 6.92 % to 3.70 % due to excessive rains, flooding and uneven rains in major producing regions. Indian farmers have covered 121.28 lakh ha under kharif pulses till 4th August-2017. Till date, it is higher by 3.70 % (116.95 lakh ha last year) than area covered in corresponding period last year. Normal area under kharif pulses is 105.58 lakh ha. However, area under Tur has declined by 16.99 % to 37.51 lakh ha (last year 45.19 lakh ha) so far. Normal area under Tur is 39.24 lakh ha. Urad area is running ahead by 27.75 % to 36.14 lakh ha (last year 28.29 lakh ha). Moong area coverage has increased by 2.05 % to 28.89 lakh ha. against 28.31 lakh ha. last year till date. Kulthi area is lagging behind by 47.45 % to 0.20 lakh ha so far.
- **Australian Desi Chick Peas was quoted at \$790 for Aug shipment and \$788 for Sept shipment.** For Oct/Nov Delivery it was quoted at \$750 per T. Australian Red Whole Lentils was quoted at \$580 per T on CiF Basis for main Indian ports. Canadian Green Peas was quoted at \$ 380 for sept delivery at Nhava Shewa port and \$385 for Tuti corin port. Ukraine yellow pea was quoted at \$302 per tonne for Aug shipment Tuticorin. Myanmar Lemon Tur was quoted at \$513 per tonne for Aug delivery at Nhava Shewa port It was \$523 for Kolkata port.
- **South Indian importers imported 1063 containers pulses at Chennai and Krishnapatnam ports during 10th to 18th July-2017.** It is higher by 436 containers from previous week(1st to 9th July). Out of total import of 1067 containers, Black Mapte and Lentils contributed 381 and 286 containers respectively, higher by 124 and 212 containers from previous week. Chickpeas, Tur whole and green peas contributed 127,50 and 77 containers respectively against 129,35 & 51 containers previous week. The rest were other pulses. Yellow peas import declined by 19 containers to 5 containers.
- **Australian forward quotes may move up if Indian farmers decide to reduce Chana area.** However, it would be too early to project lower acreage in India at this point of time. Sowing in India starts in Oct. Good rainfall and likely higher MSP may encourage farmers to maintain similar area coverage seen in last year. Pressure on price continues as Australia is offering Desi Chana December delivery at \$705 per Tonne. If rains occur in next 15 days in Australia, pressure on price would build up again.
- **Australian Red Whole Lentils (nugget) Are being offered at \$590 per T at Nhava Shewa,** Nipper at \$575 per t and flash Aug at 4590 per tonne. burma offers lemon tur at \$485 per tonne. It offered Urad FAQ at \$590, SQ at \$700 per tonne. Moong Pedisheva is being offered at \$1150 per tonne at India ports.
- **Food Corporation of India had procured 258268.51 lakh tonne pulses in Kharif Season 2016-17 till 21st June -2017.** Out of total procurement Tur Quantity was 175297.51, Urad quantity was 18234 and Moong quantity was 64737 tonne. Despite sales effort through e-auction the balance stock with FCI till 21st June - 2017 was 175297.51 for Tur, 18234 T for Urad and 60558.063 t for Moong. Sells effort continues through weekly auctions.

Pulses International Fundamental:

- **Dry and hot weather in US and Canada would continue to affect yield of standing crop** of Lentils. Increasing fear of yield loss is being reflected on price and it has improved in last two weeks. Firmness may continue. However, quality is believed to be good. harvesting may end early than normal time schedule. Local farmers have restricted selling and it may boost up prices in coming weeks.
- **Global Peas market moved up despite negative cash market fundamental. Demand** from India has slowed down in recent weeks. France has shipped 43500 tonne peas to India this week. China's buying is likely to continue. Lower demand from India and higher demand from China would offset the overall impact on demand. Buying recovery from India is expected next year. Lower yield too would nullify the impact of decreased demand. Harvesting in US begins now.
- **Marketing season In Canada is coming to an end now and shipments pace is** decreasing as expected. Field Peas stock is still ample. According to Canadian Grain Commission around 500 MT field peas has been exported from the country during 3rd to 9th July 2017. Total peas export 33,29,600 tonne so far against 2,355,100 MT during corresponding time last year. Farmers in Canada have supplied 3,875,100 MT so far. It was 2,355,100 MT last year.
- **Agriculture Food Canada has projected 24 lakh tonne Lentils export in crop** year 2016-17. It is up by 1 lakh tonne from previous estimate. Premium large green lentil bids have decreased slightly about 42 cents per pound. New crop bids range from about 31 to 40 cents per pound. Red Lentil bids range from about 23 to 26.5 cents per pound. Overall sentiment remains weak due to weakening of demand.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous** year to 1101 thousand ha for 2017-18 crop. It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha** in 2017-18. However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area In Australia has been forecast down by 4.85 % to 219 thousand Ha** for 2017-18 crop due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.
- **As per latest update By Canadian Market experts Chickpeas production in Canada** in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

Overall Outlook: - Pulses market may trade range bound to firm.
