

Pulses Domestic Fundamentals:

- **Total Kharif pulses area declined to 3.5 percent from last year till date(18th August) to 130.68** against 135.42 lakh ha. Except Urad all kharif pulses area declined this year. Tur area declined by 18.24 % from 49.91 to 40.81 lakh ha so far. Moong area declined by 6.46 % from 32.60 to 30.50 lakh ha. Major set-back has been seen in Kulthi area. It declined by 52.54 percent to 0.23 lakh ha. Other pulses area declined by 2.41 percent to 19.70 lakh ha. The good performer is Urad this year. Its area increased by 22.39% from 32.23 to 39.44 lakh ha.
- **Farmers have reduced Tur area this year due to lower price realization, cheaper import** and scattered rainsfall in growing region specially in south India. Tur area in major growing states like Maharashtra, Madhya Pradesh, Gujarat ,A.P., Telangana and Karnataka has decreased by 15.16,4.55,16.27,33.33,41.63& 28.77 percent to 12.57,6.51,2.63,1.56,2.37 & 8.17 lakh ha. Recent rainsfall is considered to be beneficial to Tur crop. However, dry spell in Karnataka and AP may hamper growth of Tur plant. As area is lower crop size is bound to decrease. Import limitation at 2 lakh T and govt.'s strategy to buy at MSP declared at Rs 5450 including bonus of Rs 200 may support Tur market fundamental in coming month. Right now some profit booking and govt.'s selling strategy may restrict uptrend. So its better to buy Tur after correction. Medium term outlook remains firm.
- **Chana market traded steady to slightly weak on steady forward quotes to \$820** per tonne in Australia for Sept shipment. Buyers are interested to fulfill only their immediate demand. Profit booking at higher level is expected and it may drive market down by Rs 100 to Rs 150 per qtl. Delhi Chana traded steady at Rs 5700 per tonne. Overall tone in Chana remains firm in the medium term. As Jan -Feb shipment from Australia is being traded at \$740 & \$ 750 per tonne, it may restrict Chana market beyond 6000 level in the near term. Stock is ample and is in strong hand. Demand for dal and Besan is good.
- **Lentils traded steady to slightly firm due to buying support from millers end and** increasing hope for opening up export. Canadian Masur in Mumbai is being offered at Rs Rs 3750 to 3900 per qtl. As demand is good, market is likely to move up to Rs 4200 level. Stock is ample in Bihar, MP and Maharashtra. Farmers are not selling it in anticipation of higher price. Agriwatch expects Masur to trade firm after slight downward correction. In Kolkata it is being traded at Rs 4000/4100 per qtl. Red Lentils whole is being offered at \$575 for Sept delivery.
- **New Moong started in Maharashtra and AP. Pressure is likely to build up by the end of this month.** Slight downward pressure is expected in Moong market. It is being traded in the range of Rs 4800 to Rs 5000. Buying at lower level is good as it is still ruling lower than MSP of Rs 5575 per qtl. including bonus of Rs 200. Govt too is willing to ensure MSP for farmers and good demand would push up market to move up once new crop pressure comes to an end.
- **Despite new crop commencement and higher coverage area Urad may trade firm** as stockiest are unwilling to release stock at this point of time. Govt would procure Urad at MSP (Rs 5400). Besides, Myanmar has increased its CiF quotes to \$655 for FAQ variety. SQ is being quoted at \$843 per tonne for Nhava shewa port. Old Stock in Myanmar too has decreased. Good demand in domestic market may support Urad fundamental.
- **Govt. released 4th Adv estimate of production of foodgrains for on 16.08.2017.** Total pulses production has been pegged at 22.95 MMT against the set target of 20.75 MMT. India had produced 16.35 MMT pulses last year. Tur production estimate has been increased to 4.78 MMT against the target of 3.62 MMT. It had produced 2.56 MMT last year. Chana production has been increased to 9.3 MMT against the set target of 9.60 MMT. It had produced 7.06 MMT last year. It has pegged kharif Moong production at 2.17 against target of 1.45 and for Rabi 0.63 against 0.70 MMT. Last year India had produced 1.25 and 0.70 MMT in kharif and Rabi season. Total production of Urad has been estimated at 2.8 MMT against 1.95 MMT last year against target of 2.15 MMT. Moong production estimate too has been revised up to 2.16 against target of 1.87 MMT. India had produced 1.59 MMT last year.
- **Trades can Import only 2 lakh T Tur Per Year India has restricted import of Tur up to 2 lakh tonne.** In MY (April to March) traders would not be able to import more than 2 lakh tonne Tur. It will help local price to improve. Restriction would help to recover Lentils price too in domestic market. India had imported 703540 T Tur in MY 2016-17, ended March-2017. India had produced around 4.4 MMT Tur last year. Due to lower price Tur area this year has decreased by 20 % to 37.5 lakh ha so far. Its a positive step but delayed one. This restriction will impact countries like Myanmar, Mozambique, Tanzania and Malawi.

Pulses International Fundamental:

- **Dry and hot weather in US and Canada would continue to affect yield of standing crop of Lentils.** Increasing fear of yield loss is being reflected on price and it has improved in last two weeks. Firmness may continue. However, quality is believed to be good. harvesting may end early than normal time schedule. Local farmers have restricted selling and it may boost up prices in coming weeks.
- **Global Peas market moved up despite negative cash market fundamental. Demand from India has slowed down in recent weeks.** France has shipped 43500 tonne peas to India this week. China's buying is likely to continue. Lower demand from India and higher demand from China would offset the overall impact on demand. Buying recovery from India is expected next year. Lower yield too would nullify the impact of decreased demand. Harvesting in US begins now.
- **Marketing season In Canada is coming to an end now and shipments pace is decreasing as expected.** Field Peas stock is still ample. According to Canadian Grain Commission around 500 MT field peas has been exported from the country during 3rd to 9th July 2017. Total peas export 33,29,600 tonne so far against 2,355,100 MT during corresponding time last year. Farmers in Canada have supplied 3,875,100 MT so far. It was 2,355,100 MT last year.
- **Agriculture Food Canada has projected 24 lakh tonne Lentils export in crop year 2016-17.** It is up by 1 lakh tonne from previous estimate. Premium large green lentil bids have decreased slightly about 42 cents per pound. New crop bids range from about 31 to 40 cents per pound. Red Lentil bids range from about 23 to 26.5 cents per pound. Overall sentiment remains weak due to weakening of demand.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year to 1101 thousand ha for 2017-18 crop.** It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % To 385 Thousand Ha in 2017-18.** However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area In Australia has been forecast down by 4.85 % to 219 thousand Ha for 2017-18 crop** due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18 as bumper production seems very much on the card.** Ukraine produced 7.45 lakh tonne peas last year.
- **As per latest update By Canadian Market experts Chickpeas production in Canada in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18.** Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

Overall Outlook: - Pulses market may trade steady to weak. Profit booking is expected to continue.
