

Pulses Domestic Fundamentals:

- **Chana and Masur would be firmer as crop condition in Canada and Australia is not good.** Masur production in Canada would decrease by 1.2 MMT to 27.3 MMT. It was 32.5 lakh T last year. Peas production too would decline 17.3 percent to 40 lakh tonne. Supply side would decline by 18 % to 42 lakh T. Chana production too would decline to 1.05 lakh tonne in Canada and Australian crop is feared to be lower from last year. All these developments would push pulses market in India.
- **Recent flooding in Bihar, Assam and Bengal has badly affected standing kharif crops and it will impact the crop size including pulses.** Flooding in these states and deficient rainfall in Karnataka, Maharashtra, AP and Tamil Nadu hint toward below average production year despite govt.'s positive hope for kharif production front. Markets have started reacting on price front. With restriction on Tur, Moong and Urad import (2 lakh Tonne for Tur & 3 lakh Tonne for Urad and Moong) for current financial year too have lent support to cash pulses market fundamentals. Actually prices of pulses, barring Chana, were ruling below MSP and pressure was building up on govt to drag market out of bearish phase.
- **Three incidents altogether (flooding, deficient rainfall & Restriction on import) have helped market to recover.** Govt. wants to ensure MSP for farmers and intends to increase production to reduce dependence of import. If prices rule above MSP, pressure of procurement on MSP would reduce on govt as it has ample stock procured from last year crop. Govt too seems in favour of higher price to prevail (above MSP) as there are elections in three states next year. So Agriwatch expects good opportunity in pulses trade now. However, if prices firms up unexpectedly, govt has stock to curb it any time having option to remove import restriction.
- **As now Moong is hitting the market, Agriwatch expects correction at this level.** However, import restriction, up to the level of three lakh tonne (Urad and Moong) amid quality damage would drive moong price up once again. As soon as arrival pressure releases, it would trade firm. Buying quality Moong would pay as market would stabilize near MSP of Rs 5575 including bonus of Rs 200.
- **Lentils too would trade firm as stockiest are unwilling to release stock at current price.** Australian and Canadian quotes have gone up. In Mumbai Australian and Canadian Lentils are being offered at Rs 3850 to Rs 4050 per qtl. As moisture stress has affected crop in Canada and Australia, forward quotes may move up. There is good demand of Lentils in domestic market. Overall outlook remains firm.
- **After restriction on import of Urad and Moong cash market in India traded up considerably.** Urad and Moong price up by 200 to Rs 600 per qtl in one day. As export opportunity from Myanmar has got affected, Cif quotes in Myanmar declined by \$10 to \$15 per tonne in a day. In Chennai Urad FAQ price moved up by Rs 1000 to Rs 5500. Market is expected to move further up. There are limited sellers in the market. Major portion of stock is in strong hands. So steady to firm tone may prevail until profit booking starts.
- **Total Kharif pulses area declined to 3.5 percent from last year till date (18th August) to 130.68 against 135.42 lakh ha.** Except Urad all Kharif pulses area declined this year. Tur area declined by 18.24 % from 49.91 to 40.81 lakh ha so far. Moong area declined by 6.46 % from 32.60 to 30.50 lakh ha. Major set-back has been seen in Kulthi area. It declined by 52.54 percent to 0.23 lakh ha. Other pulses area declined by 2.41 percent to 19.70 lakh ha. The good performer is Urad this year. Its area increased by 22.39% from 32.23 to 39.44 lakh ha.
- **Chana market traded steady to slightly weak on steady forward quotes to \$840 per tonne in Australia for Sept shipment.** Buyers are interested to fulfill only their immediate demand. Profit booking at higher level is expected and it may drive market down by Rs 100 to Rs 150 per qtl. Delhi Chana traded steady at Rs 5900 per tonne. Overall tone in Chana remains firm in the medium term. As Jan -Feb shipment from Australia is being traded at \$740 & \$ 750 per tonne, it may restrict Chana market beyond 6000 level in the near term. Stock is ample and is in strong hand. Demand for dal and Besan is good.
- **Lentils traded steady to slightly firm due to buying support from millers end and increasing hope for opening up export.** Canadian Masur in Mumbai is being offered at Rs 3750 to 3900 per qtl. As demand is good, market is likely to move up to Rs 4200 level. Stock is ample in Bihar, MP and Maharashtra. Farmers are not selling it in anticipation of higher price. Agriwatch expects Masur to trade firm after slight downward correction. In Kolkata it is being traded at Rs 4000/4100 per qtl. Red Lentils whole is being offered at \$575 for Sept delivery.
- **Govt. released 4th Adv estimate of production of foodgrains for on 16.08.2017.** Total pulses production has been pegged at 22.95 MMT against the set target of 20.75 MMT. India had produced 16.35 MMT pulses

last year. Tur production estimate has been increased to 4.78 MMT against the target of 3.62 MMT. It had produced 2.56 MMT last year. Chana production has been increased to 9.3 MMT against the set target of 9.60 MMT. It had produced 7.06 MMT last year. It has pegged kharif Moong production at 2.17 against target of 1.45 and for Rabi 0.63 against 0.70 MMT. Last year India had produced 1.25 and 0.70 MMT in kharif and Rabi season. Total production of Urad has been estimated at 2.8 MMT against 1.95 MMT last year against target of 2.15 MMT. Moong production estimate too has been revised up to 2.16 against target of 1.87 MMT. India had produced 1.59 MMT last year.

Pulses International Fundamental:

- **Market sources says that production of Peas, Lentils and Chickpeas are likely to decline in Canada** from normal expectation this year. Latest report of Agriculture and Agri-foods Canada' hits peas production would decline by 17.3 percent to 40 lakh tonne in 2017-18 (Aug- to July) due to lower coverage area and below normal yield. Lower production size would drag down supply side to 42 lakh tonne which is almost 18 % lower than last year. As carryout is expected to decline average price for peas has been revised up to \$208 to \$310 for the year. It is up by \$5 per T from July projected price.
- **Masur production in Canada is likely to decline by 1.2 MMT to 27.3 MMT in 2017-18.** Canada had produced 32.5 lakh tonne masur in 2016-17. Average price of masur was hovering at \$725-\$750 in July. It is higher by \$175 from last year. It was \$575 per T last year. As crop size is lower, carryout is expected to decline from 3.25 to 2 lakh tonne this year.
- **Chickpeas production in Canada would decline slightly from 1.10 to 1.05 lakh tonne in 2017-18.** Average price of Chana is expected to decline from \$1000 to \$960-\$980 per T. Prices would decrease due to higher supply side in global market and bumper crop production in India last year. India is a major buyer of Masur from Canada and it imported around 6 lakh tonne masur last year. As availability is higher this year in India import would decline.
- **Dry and hot weather in US and Canada would continue to affect yield of standing crop of Lentils.** Increasing fear of yield loss is being reflected on price and it has improved in last two weeks. Firmness may continue. However, quality is believed to be good. Harvesting may end early than normal time schedule. Local farmers have restricted selling and it may boost up prices in coming weeks.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year to 1101 thousand ha for 2017-18 crop.** It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % to 385 Thousand Ha in 2017-18.** However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area in Australia has been forecast down by 4.85 % to 219 thousand Ha for 2017-18 crop** due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh

tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.

- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.
- **As per latest update By Canadian Market experts Chickpeas production in Canada in MY 2017-18** may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

Overall Outlook: - Pulses market may trade steady to firm. Profit booking is expected.
