

Pulses Domestic Fundamentals:

- **Kharif pulses area declined by 3.82% to 137.61 lakh ha as on 1st Sept-2017.** Indian farmers had covered 143.08 lakh ha last year. Tur area declined by 18.24 percent to 42.31 lakh ha. However, it is higher than normal area of 39.24 lakh ha. Moong area too has declined to 31.25 lakh ha from 33.84 lakh ha last year. Kulthi and other pulses area too have declined to 38.01 and 2.94 percent from last year. However, Urad has been good performer and area under urad has increased by 21.63 percent from 34.36 to 41.80 lakh ha.
- **In case of Tur major decline has been seen in AP, Gujarat, Karnataka, Maharashtra, Telangana and Uttar Pradesh.** In case of Urad major increase was seen in Chattishgarh, Madhya Pradesh, Maharashtra, Rajasthan and Madhya Pradesh. Moong area declined in Karnataka and Maharashtra.
- **Chana market is bound to move up once again as fundamental remains strong. Stockists are active.** Sellers are unwilling to sell at current level. Stock is in strong hands while Australian crop size may be lower than normal expectation due to current rough weather conditions. Australian desi chickpeas quoted at \$900 Sept Contract.
- **Moong and Tur may trade under pressure this week despite report of lower area coverage.** Selling from central pool stock continues. New crop of moong is coming into the mandis. So pressure might be felt. Even Tur seems under pressure. Tur may stay steady to slightly weak despite massive decline in area coverage. Market may start recovering by the end of this month once again.
- **India relaxes import quota of Tur fixed at 2 lakh tonne right now for which payment has been made before 5th August-2017.** For availing the benefit of this relaxation Indian traders have to submit relevant documents. The documents include contract papers, proforma invoices authorized by the government and copies of SWIFT documents authenticated by the relevant banks. It will serve the purpose of traders who have made payments in advance. This relaxation has been given considering the special relation with India and Myanmar.
- **Lentil market would continue to trade firm as stock has decreased in Sagar Bhopal, Ganjvasoda and Mungawali line.** There is a report that considerable quantity of Masur stock in Bihar has damaged due to flooding. Australia and Canada are quoting higher price for Masur. So uptrend is likely to continue. Current downward correction is a temporary phenomenon due to demand factor. Overall outlook remains firm.
- **Tur market is likely to stay steady to slightly firm. There is plenty of Tur stock in market.** Stock limit, expectation of lower production size (28/29 lakh tonne) this year and govt's intention to drag market up to the level of MSP would continue to support Tur market. It may trade in price band of Rs 4100 to Rs 4300 this week. Selling through central pool would restrict market to move like Chana. Buy and sell would be good strategy for Tur.
- **Moong market may trade firm once again as crop size in Bihar and UP is below normal expectation.** Quality of Rajasthani Moong too is of below average quality. It may support market once again. Pressure may be felt from next week. Urad too may trade down as crop size is higher and demand is not up to the mark. Profit booking at current level may continue.
- **Govt. released 4th Adv estimate of production of foodgrains for on 16.08.2017.** Total pulses production has been pegged at 22.95 MMT against the set target of 20.75 MMT. India had produced 16.35 MMT pulses last year. Tur production estimate has been increased to 4.78 MMT against the target of 3.62 MMT. It had produced 2.56 MMT last year. Chana production has been increased to 9.3 MMT against the set target of 9.60 MMT. It had produced 7.06 MMT last year. It has pegged kharif Moong production at 2.17 against target of 1.45 and for Rabi 0.63 against 0.70 MMT. Last year India had produced 1.25 and 0.70 MMT in kharif and Rabi season. Total production of Urad has been estimated at 2.8 MMT against 1.95 MMT last year against

target of 2.15 MMT. Moong production estimate too has been revised up to 2.16 against target of 1.87 MMT. India had produced 1.59 MMT last year.

Pulses International Fundamental:

- **Market sources says that production of Peas, Lentils and Chickpeas are likely to decline in Canada** from normal expectation this year. Latest report of Agriculture and Agri-foods Canada' hits peas production would decline by 17.3 percent to 40 lakh tonne in 2017-18 (Aug- to July) due to lower coverage area and below normal yield. Lower production size would drag down supply side to 42 lakh tonne which is almost 18 % lower than last year. As carryout is expected to decline average price for peas has been revised up to \$208 to \$310 for the year. It is up by \$5 per T from July projected price.
- **Masur production in Canada is likely to decline by 1.2 MMT to 27.3 MMT in 2017-18.** Canada had produced 32.5 lakh tonne masur in 2016-17. Average price of masur was hovering at \$725-\$750 in July. It is higher by \$175 from last year. It was \$575 per T last year. As crop size is lower, carryout is expected to decline from 3.25 to 2 lakh tonne this year.
- **Chickpeas production in Canada would decline slightly from 1.10 to 1.05 lakh tonne in 2017-18.** Average price of Chana is expected to decline from \$1000 to \$960-\$980 per T. Prices would decrease due to higher supply side in global market and bumper crop production in India last year. India is a major buyer of Masur from Canada and imported around 6 lakh tonne masur last year. As availability is higher this year in India import would decline.
- **Dry and hot weather in US and Canada would continue to affect yield of standing crop of Lentils.** Increasing fear of yield loss is being reflected on price and it has improved in last two weeks. Firmness may continue. However, quality is believed to be good. Harvesting may end early than normal time schedule. Local farmers have restricted selling and it may boost up prices in coming weeks.
- **Chickpeas area in Australia has been forecast up by 2.99 % from previous year to 1101 thousand ha for 2017-18 crop.** It was 1069 thousand ha last year. However, production estimate has been decreased by 23.62 % to 14.16 lakh tonne against 18.54 lakh tonne last year. The main reason behind lower production forecast is mainly attributed to bad weather for planting. Australia had achieved highest yield last year due to favorable weather condition throughout the season.
- **Lentils area in Australia is expected to increase by 26 % to 385 Thousand Ha in 2017-18.** However, production size has been revised down to 5.30 lakh tonne. Australia had produced 830 lakh tonne Lentils last year. Bad weather is bound to affect lentils yield in Australia in 2017-18. Weather condition is still alarming and reduction in yield seems very much in sight.
- **Field Peas Area in Australia has been forecast down by 4.85 % to 219 thousand Ha for 2017-18 crop** due to lower price realization and bad weather condition in producing states. Peas production estimate has been reduced from 415 to 257 thousand T. Australia had realized better yield due to congenial weather throughout the season. Canada's dominance in peas export at cheaper price and ample availability in India have affected global price of peas. So bad weather and weak demand/price encouraged farmers to lower peas area.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, its export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18 as bumper production seems very much on the card.** Ukraine produced 7.45 lakh tonne peas last year.

- As per latest update By Canadian Market experts Chickpeas production in Canada in MY 2017-18 may increase from 82,000 MT to 1.45 lakh tonne in 2017-18. Area coverage under Chickpeas too is likely to increase from 68,000 ha to 75,000 ha.

Overall Outlook: - Pulses market may trade steady to firm. Profit booking is expected.

Canada Lentils Production Estimate
