

Pulses Domestic Fundamentals:

- **Chana may recover from current level as plants remain active despite** expected shipment from Australia in first week of Oct. Sellers too are unwilling to sell at lower level. Australian crop size may decrease from 11.88 lakh tonne to below 10 lakh tonne due to prevailing bad weather condition. 3 vessels , having 72000 MT Chana are expected to land at Indian ports in the first week of October. Forward deals from Australia crossed 3 lakh tonne from new crop, expected delivery is Dec-17 & Jan-2018
- **DES (Directorate of Economics & Statistics, Govt of India) has published 1st adv** estimates of food-grains for 2017-18 on 22.09.2017. It has estimated Tur Production at 3.99 MMT against the set target of 4.25 MMT. It was 4.78 MMT (4th Adv .estimate) for 2016-17. DES has fixed target of Chana production at 9.75 MMT. Govt. estimated 9.33MMT Chana production for 2016-17 in the 4th Adv estimate. Kharif Urad production has been estimated at 2.53 MMT for 2017-18 against target of 1.85 MMT. In 2016-17 India had produced 2.17 MMT kahrif Urad.
- **Kharif Moong Production by DES for 2017-18 has been pegged at 1.32 MMT against** target of 1.65 MMT. India had Produced 1.62 MMT Moong in Kharif season 2016-17. Other kharif Pulses production has been pegged at 0.86 MMT against target of 1 MMT. It was 0.86 MMT last year. Total Kharif pulses production has been pegged at 8.71 MMT against target of 8.75 MMT. It was 9.42 MMT in 2016-17.।
- **harif pulses sowings are almost over now. Indian farmers have covered** 141.18 lakh ha as on 22.09.2017 against 146.26 lakh ha last year and year's normal of 105.58 lakh ha. Area coverage is 3.47 % lower than last year. Almost all pulses area, except Urad has declined this year in kharif season. Tur area declined by 18.03 % to 43.26 lakh ha(52.77 last year) against normal of 39.24 lakh ha. Moong area declined by 8.02 % to 31.73 lakh ha(34.50 last year) against normal of 23.41 lakh ha. Kulthi area declined by 6.24 % to 0.70 lakh ha against normal of 2.40 lakh ha. However, Urad performed well against all expectation. Its area increased by 21.61 % to 42.88 lakh ha(35.26 lakh ha)against normal of 24.79 lakh ha. If we see overall decline,it is minor decline as total area is higher by 33.72 % from normal area.
- **Despite opening up export of Tur, Moong and Urad dal from India Pulses prices** reel under pressure as buyers for Indian dal are absent. Disparity between Indian and Myanmar including Tanzania and other markets makes it difficult for Indian exporters to find buyers for Indian dals at this point of time. Impact of current decision regarding dal export would be felt by the end of this year or early next year. By then exporters would be able to build up their network in needy nations.
- **Currently Myanmar is offering Tur at Rs 24500 per Qtl.(\$370 per Tonne) on** Indian port. Urad FAQ is being offered at \$475(30850 per T). Urad SQ is being Offered at \$ 600(Rs39000)per T. Pedisheva Moong is being offered at \$1200(Rs78000 per tonne). Pakako is offered at Indian port at \$820(Rs53,300 per T). Against it Tur price in Mumbai is Rs 38500 per tonne, Urad is being traded at Rs 44000 per tonne and Moong at Rs 45000 per tonne. In Chennai Tur is being traded at Rs39000 and Urad FAQ at Rs44500 and SQ at Rs 58500 per tonne. Huge price difference remains a problem for Indian dal exporters right now.
- **Pulses import at south Indian ports (Chennai & Krishnapatnam) decreased by 44 %** from 1298 to 724 containers during 1st to 18th Sept-2017. Black Mapte import decreased from 886 to 409 containers and whole Tur import decreased from 186 to 31 containers. However, Chick Peas import increased from 118 to 135 containers in comparison to 2nd fortnight of August. Green Moong Bean import decreased from 41 to 27 containers during 1st fortnight of Sept .Lentils import increased from nil to 26 containers. Yellow Peas import too increased from 18 to 48 containers. White Peas import registered from Nil to 5 containers. Brown eye bean import too decreased from 64 to 25 containers. Actually, pressure on market continues despite lower volume of import.

Pulses International Fundamental:

- **As per latest update by USDA Peas production in USA would decrease by 45% to 697,043 tonne.**
Rough weather condition has impacted yield of all pulses. Besides, hot and dry weather lower area coverage (17%) to 1.15 million acres contributed to lower overall crop size. Average yield has decreased by 703 pounds per acres to 1383 pounds per acre. It would be the lowest yield after 1996. Harvesting is almost over now in Montana and North Dakota. Crop faced extreme moisture stress from growth/flowering stage to harvesting stages.
- **Rough weather in the US has affected Lentils yields too. The latest estimate shows that Lentils production may decrease by 41 % to 3.38 lakh tonne against 5.75 lakh tonne in 2016.** Despite 19% higher area coverage (1.11 million acres) from last year, yield is bound to decrease to 733 pounds per acre. Major loss has been seen in North Dakota and United States. Harvesting is almost over now in Monatona. It is still on in North Dakota. Due to rough weather condition yield has decreased to record level not seen since 1998.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canada dry pea area is expected to decline by 3.44 % to 16.56 lakh ha in 2017-18.** Yield is expected to decrease by 14.63 % to 2.45 T per ha. Thus total production is expected to decline from 48 lakh tonne to 40 lakh tonne in 2017-18. As production is bound to decline, export volume too is expected to decrease from 38 to 32 lakh tonne in 2017-18. Total supply in Canada is likely to decrease from 50 lakh t to 41.50 lakh Tonne. Price of pea may rule in the range of \$280 to \$310 per T in 2017-18.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Canada would decline slightly from 1.10 to 1.05 lakh tonne in 2017-18.** Average price of Chana is expected to decline from \$1000 to \$960-\$980 per T. Prices would decrease due to higher supply side in global market and bumper crop production in India last year. India is a major buyer of Masur from Canada and it imported around 6 lakh tonnes masur last year. As availability is higher this year in India import would decline.
- **Pulses season (crop year) in Canada starts in August. Before starting the season.** Canada has revised down lentils production estimate from 31 lakh tonne to 28 lakh tonne now for 2017-18 season. According to the latest update by AAFC Canada has produced 32.48 lakh tonne Lentils in 2016-17. As production was at higher side, it export figure in current MY is expected to touch at 23 lakh tonne. India as usual emerged as major buyer for Canadian Lentils.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18 as bumper production seems very much on the card.** Ukraine produced 7.45 lakh tonne peas last year.

Overall Outlook: - Pulses market may trade steady to weak.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
