

Pulses Domestic Fundamentals:

- **Kharif pulses sowings are almost over now. Indian farmers have covered 142.70 lakh ha as on 06.10.2017 against 147.95 lakh ha last year and year's normal of 105.58 lakh ha.** Area coverage is 3.55 % lower than last year. Almost all pulses area, except Urad and Kulthi has declined this year in kharif season. Tur area declined by 18.38 % to 43 .59 lakh ha(53.40 last year) against normal of 39.24 lakh ha. Moong area declined by 8.01 % to 31.82 lakh ha(34.59 last year) against normal of 23.41 lakh ha. Kulthi area increased by 74.86 % to 1.26 lakh ha against normal of 2.40 lakh ha. However, Urad performed well against all expectation. Its area increased by 19.69 % to 43.08 lakh ha(35.99 lakh ha)against normal of 24.79 lakh ha.If we see overall decline, it is minor decline as total area is higher by 35.16% from normal area.
- **Urad market is likely to trade steady to slightly firm in the near term despite** some quality issue and yield loss due to recent flooding and heavy rains in Maharashtra, M.P. & Rajasthan. As import quantity remains restricted and Nafed is likely to intervene into the market from next week anytime might be seen.
- **Burma offers FAQ Urad at \$470 per tonne on CnF basis at Chennai and it remained** unchanged from last one week. As import demand is lower, CnF quotes in Burma is unlikely to change in the near term.
- **Tur market is likely to trade steady to slightly firm as buyers are expected to return** into market to fulfill their immediate supply obligations to mills at current price which is ruling lower by Rs 1450 per qtl. in Delhi market. It is ruling at Rs 3850 per qtl.MSP for Tur is Rs5450 per qtl. including bonus of Rs 200.
- **Burma is offering Tur lemon at \$ 380 on CnF basis at Nhava Sheva port.As** supply side is ample with continuous auctions by FCI, Nafed, supply –demand side is expected to be balanced. Importers are unwilling to import due to quantity restriction at 1.5 lakh tonne in current MY till March-2018.
- **Moong market is likely to trade under pressure this week due to new arrivals and** weak demand from millers. Stockiest remains sidelined as arrival pressure is yet to build up. Quality issue and yield loss (around 10 to 20 % in some parts of Maharashtra, Rajasthan & MP) would not impact much until procurement starts.
- **In Jaipur market Moong traded steady at Rs 4600 .More dip is likely** with new arrivals expected from 15th Oct. Pressure would build up further from new arrival.
- **Central govt has decided to sell0.55 million tonne pulses from its buffer stock** at lower rate to 5 states and for central welfare scheme. Notably, govt had decided to create a buffer stock of 2.million tonne pulses to ensure MSP for farmers and augment supply in the open market if and when supply crashes and prices firms up.
- **UP state govt. has decided to procure Moong and Urad from 15th Oct to 15th Dec-2017.** Beyond this date line farmers would not be able to sell their crops to govt.'s agencies.Tur procurement in UP would start from 15th January-2018. Maharashtra govt. too is gearing up for commencing Moong and Urad Procuremnt from next week. As prices are ruling lower than MSP,higher procurement is expected this year too.
- **Already over 3 lakh tonne Chana deals have been struck from old and new crop** and its scheduled delivery is due in Oct, Nov & Dec-2017.Mundra port will receive 50,000 tonne imported Chana from Australia by Oct. end.Around 54000 MT in Nov at same port. Besides, one lakh tonne will hit at Mumbai port in Nov. For Dec and Jan delivery almost one lakh tonne is expected on both ports.
- **DES (Directorate of Economics & Statistics, Govt of India) has published 1st adv** estimates of food-grains for 2017-18 on 22.09.2017.It has estimated Tur Production at 3.99 MMT against the set target of 4.25 MMT. It was 4.78 MMT (4th Adv .estimate) for 2016-17.DES has fixed target of Chana production at 9.75 MMT. Govt. estimated 9.33MMT Chana production for 2016-17 in the 4th Adv estimate. Kharif Urad

production has been estimated at 2.53 MMT for 2017-18 against target of 1.85 MMT. In 2016-17 India had produced 2.17 MMT kharif Urad.

Pulses International Fundamental:

- **Production of Chickpeas in Queensland in Australia is likely to be lower by** previous estimate of 0.65 Million tonne as weather is not very congenial to the standing crop. Yield is expected to decline by 38 % from previous year. In 2017-18 area covered under Chickpeas was 5% higher than previous year to 5.6 lakh ha. The other major Chickpeas state is New South Wales where 4.78 lakh ha has been covered and production has been estimated 4.78 lakh tonne. It may be reduced further.
- **As per the latest report from Canada Grain Commission Canada has loaded** 94,900 MT field peas for export through licensed terminal and primary elevators in the month of August. Export volume is down by 67 % from 2.92 lakh tonne shipped during same period last year. Demand from India has decreased due to higher availability in domestic market.
- **As per latest update by USDA Peas production in USA would decrease by 45%** to 697,043 tonne. Rough weather condition has impacted yield of all pulses. Besides, hot and dry weather lower area coverage (17%) to 1.15 million acres contributed to lower overall crop size. Average yield has decreased by 703 pounds per acres to 1383 pounds per acre. It would be the lowest yield after 1996. Harvesting is almost over now in Montana and North Dakota. Crop faced extreme moisture stress from growth/flowering stage to harvesting stages.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canada dry pea area is expected to decline by 3.44 % to 16.56 lakh ha in 2017-18.** Yield is expected to decrease by 14.63 % to 2.45 T per ha. Thus total production is expected to decline from 48 lakh tonne to 40 lakh tonne in 2017-18. As production is bound to decline, export volume too is expected to decrease from 38 to 32 lakh tonne in 2017-18. Total supply in Canada is likely to decrease from 50 lakh t to 41.50 lakh Tonne. Price of pea may rule in the range of \$280 to \$310 per T in 2017-18.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Canada would decline slightly from 1.10 to 1.05 lakh tonne** in 2017-18. Average price of Chana is expected to decline from \$1000 to \$960-\$980 per T. Prices would decrease due to higher supply side in global market and bumper crop production in India last year. India is a major buyer of Masur from Canada and it imported around 6 lakh tonne masur last year. As availability is higher this year in India import would decline.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Overall Outlook: - Pulses market may trade steady to weak.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
