

Pulses Domestic Fundamentals:

- **Commodity exchange will hold a muhurt trading session for Diwali between 6.30 to 7.30** on 19 Oct-2017 as per released circular by NCDEX & NMCE. Pre-open session on the NCDEX & NMCE will start at 6 pm while on the MCX, a special session will start 6.15 pm. Client code modification on the NCDEX & MCX will be allowed from 6.30 to 7.45 pm and on the MNCE at 6.30 to 7.35 pm.
- **Nafed will start procuring Moong & Urad in Maharashtra from 9th October.** The target has been fixed at 70,000 metric tonne. Notably, govt has fixed MSP for Moong at Rs 5575 and for Urad at Rs 5400 per quintal (including bonus of Rs 200 for each. Procurement in Rajasthan begins in a restricted way, 200 metric tonne per day, likely to increase soon. Procurement agencies in Madhya Pradesh and UP are gearing up for procurement and it will begin from 15th October-2017. It would support market at current level.
- **Burma offers FAQ Urad at \$470 per tonne on CnF basis at Chennai and it remained unchanged** from last one week. As import demand is lower, CnF quotes in Burma is unlikely to change in the near term.
- **Tur prices are likely to stay steady as plants in Delhi, MP & UP have started buying** to cover their short position at lower level. It may drive price slightly up just ahead of new crop. As cash market is already ruling lower by Rs 1500/1550 from MSP in Delhi market, more downward movement is unlikely despite food ministry intension to offload around 1MMT pulses from central pool before procurement starts. Crop is in good condition so far.
- **Burma is offering Tur lemon at \$ 380 on CnF basis at Nhava Sheva port.** As supply side is ample with continuous auctions by FCI, Nafed, supply –demand side is expected to be balanced. Importers are unwilling to import due to quantity restriction at 1.5 lakh tonne in current MY till March-2018.
- **Kharif pulses sowings are almost over now. Indian farmers have covered 142.70 lakh ha** as on 06.10.2017 against 147.95 lakh ha last year and year's normal of 105.58 lakh ha. Area coverage is 3.55 % lower than last year.
- **Demand at lower level helped Chana market to recover by Rs 50 from previous close** of Rs 5500 in Delhi market. Demand for seed and lower estimates for Australian Chickpeas production (From 1MMT to 0.65 MMT) may restrict chana price to fall further. Imported Chana is being offered at Rs 5250/5300 in Mumbai so downward move seems restricted. It may trade in the range of Rs 5400 to Rs 5700 in Delhi market despite expected vessels of 0.01 MMT in Nov and Dec each. As Chana price is ruling above MSP, area is bound to increase by 5 to 7 % as per market sources.
- **UP state govt. has decided to procure Moong and Urad from 15th Oct to 15th Dec-2017.** Beyond this date line farmers would not be able to sell their crops to govt.'s agencies. Tur procurement in UP would start from 15th January-2018. Maharashtra govt. too is gearing up for commencing Moong and Urad Procurement from next week. As prices are ruling lower than MSP, higher procurement is expected this year too.
- **Already over 3 lakh tonne Chana deals have been struck from old and new crop** and its scheduled delivery is due in Oct, Nov & Dec-2017. Mundra port will receive 50,000 tonne imported Chana from Australia by Oct. end. Around 54000 MT in Nov at same port. Besides, one lakh tonne will hit at Mumbai port in Nov. For Dec and Jan delivery almost one lakh tonne is expected on both ports.
- **DES (Directorate of Economics & Statistics, Govt of India) has published 1st adv estimates** of food-grains for 2017-18 on 22.09.2017. It has estimated Tur Production at 3.99 MMT against the set target of 4.25 MMT. It was 4.78 MMT (4th Adv .estimate) for 2016-17. DES has fixed target of Chana production at 9.75 MMT.

Pulses International Fundamental:

- **Production of Chickpeas in Queensland in Australia is likely to be lower** by previous estimate of 0.65 Million tonne as weather is not very congenial to the standing crop. Yield is expected to decline by 38 % from previous year. In 2017-18 area covered under Chickpeas was 5% higher than previous year to 5.6 lakh ha. The other major Chickpeas state is New South Wales where 4.78 lakh ha has been covered and production has been estimated 4.78 lakh tonne. It may be reduced further.
- **As per the latest report from Canada Grain Commission Canada has loaded** 94,900 MT field peas for export through licensed terminal and primary elevators in the month of August. Export volume is down by 67 % from 2.92 lakh tonne shipped during same period last year. Demand from India has decreased due to higher availability in domestic market.
- **As per latest update by USDA Peas production in USA would decrease by 45%** to 697,043 tonne. Rough weather condition has impacted yield of all pulses. Besides, hot and dry weather lower area coverage (17%) to 1.15 million acres contributed to lower overall crop size. Average yield has decreased by 703 pounds per acres to 1383 pounds per acre. It would be the lowest yield after 1996. Harvesting is almost over now in Montana and North Dakota. Crop faced extreme moisture stress from growth/flowering stage to harvesting stages.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canada dry pea area is expected to decline by 3.44 % to 16.56 lakh ha in 2017-18.** Yield is expected to decrease by 14.63 % to 2.45 T per ha. Thus total production is expected to decline from 48 lakh tonne to 40 lakh tonne in 2017-18. As production is bound to decline, export volume too is expected to decrease from 38 to 32 lakh tonne in 2017-18. Total supply in Canada is likely to decrease from 50 lakh t to 41.50 lakh Tonne. Price of pea may rule in the range of \$280 to \$310 per T in 2017-18.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Canada would decline slightly from 1.10 to 1.05 lakh tonne** in 2017-18. Average price of Chana is expected to decline from \$1000 to \$960-\$980 per T. Prices would decrease due to higher supply side in global market and bumper crop production in India last year. India is a major buyer of Masur from Canada and it imported around 6 lakh tonne masur last year. As availability is higher this year in India import would decline.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Overall Outlook: - Pulses market may trade steady to weak.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
