

Pulses Domestic Fundamentals:

- ***Slight recovery in Chana and Lentils market was seen on Wednesday due to hike in MSP. However it seems a temporary phenomenon. Firmness is unlikely as demand remains slackened. Sowing of Chana started in Maharashtra and around 15 % early crop has been planted till 24th October. Sowing might get delayed in south India by 15 days. It will pick up in MP and Rajasthan from November. Farmers in Rajasthan may reduce barley and mustard area and use it for Chana. Chana area would increase by 7 to 10 % this year.***
- ***Moong market to reels under pressure in Akola as arrival is increasing. Arrival of Moong has reached at 3000 bags and is being traded in the range of Rs 4350 to 4700 per qtl. depending upon quality of the crop. Demand is weak and govt.'s procurement drive is running in limited area. Overall sentiment is weak.***
- ***As per market sources govt. has accepted CACP recommendation regarding MSP of Chana and Tur for Rabi marketing season 2018-19. The CACP has recommended Rs 200 increase in Chana & Lentils MSP. Chana MSP has been fixed at Rs 4200 and For Lentils at Rs 4125. For 2017-18 it was 4000 for Chana & Rs 3950 for Lentils including bonus of Rs 200 per qtl. Chana price is ruling above MSP right now while Lentils is trading below MSP.***
- ***Area under Lentils is bound to decrease by 20 to 25 percent this year as farmers have not started sowing as yet. Lower price is a discouraging factor this year. MP and UP farmers have left their Lentils field unplanted and they intend to sow Chana in this field. Importers of Lentils too have restricted import forward deals by 30 to 40 percent this year. So Lentils prices are expected to recover from current level. Current prevailing price may be the lower level for the year.***
- ***Tur stock at Mumbai port is declining now. In August Tur stock at Mumbai port was around 60,000 tonne. Now it has decreased to 30,000 tonne and by the end of this month more 10,000 is likely to be lifted. This means November would start with 20,000 T imported Tur stock in Mumbai. Out of this African origin Tur stock is around 5000 tonne. Import is unlikely by the end of this marketing year. Accumulated stock is depleting slowly.***
- ***Crop loss has been reported from AP, Karnataka, Madhya Pradesh & Karnataka. There is a fear in the market that arrival will start late by a fortnight. Area is almost lower by 18 percent. So crop size is lower at least by 10 to 12 lakh tonne from last year. Besides, Procurement by govt.'s agencies may support market to recover from current lower level. Procurement is expected from mid Dec-2017.***
- ***Australian Desi Chickpeas Jimbour was offered at Nhava Sheva port at \$765 per tonne for Nov delivery. It is \$760 for Dec delivery, Jan-18 for \$765 per tonne. Australian Desi Chickpeas Kybra type is being offered at \$785 per tonne at Nhava Sheva/Kolkatta & Mundra port for Dec delivery. Australian pure Chana dal is being offered at \$1035 per tonne for Nov/Dec delivery. In INR term it comes to Rs 68000 per tonne.***
- ***Australian whole red lentils new crop is being offered at \$545 per tonne on FoB basis for Nov/Dec delivery. In INR terms it comes to Rs 35100 per tonne. Nugget type is being offered at same rate for same month delivery. As there is an improvement in demand and market expects seed demand to come prices are likely to recover from current level in coming weeks.***
- ***Kharif pulses sowings are almost over now. Indian farmers have covered 142.70 lakh ha as on 13.10.2017 against 147.95 lakh ha last year and year's normal of 105.58 lakh ha. Area coverage is 3.55 % lower than last year. It is the final update for ongoing kharif season.***

Pulses International Fundamental:

- **Global pea markets traded almost steady with weak bias likely to continue due** to reduced export demand for new crop. Importers in India may start buying peas once again because of fear that Indian govt. will end the exemption from import duties or impose import quotas for Chana ,Red Lentils and peas. It has already placed it for Moong, Tur and Urad. So importers would increase import despite sufficient stock available in domestic market.
- **Global lentil markets traded weak during the past week as supplies exceeds demand** for export. Harvesting in Canada is over now. Lentil quality is excellent, increasing competition for demand from markets which insist on good No 1 and No 2 grade product. Export movement is likely to remain sluggish in coming week. Right now Indian buying is restricted.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas** for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 to 16,000 tonne against 16,000 tonne last year.
- **Dry bean production in US has been estimated sharply up by 23 % to 1.6 million tonne.** Yield has been estimated at 1737 pound per acre. US farmers have planted 2.11 million acres in 2017. It was up by 27 % from 2016. In Michigan harvest began in the third week of September as favorable weather aided in drying down the crop. As October got underway, 57% of the beans were harvested.
- **Production of Chickpeas in Queensland in Australia is likely to be lower by** previous estimate of 0.65 Million tonne as weather is not very congenial to the standing crop. Yield is expected to decline by 38 % from previous year. In 2017-18 area covered under Chickpeas was 5% higher than previous year to 5.6 lakh ha. The other major Chickpeas state is New South Wales where 4.78 lakh ha has been covered and production has been estimated 4.78 lakh tonne. It may be reduced further.
- **As per the latest report from Canada Grain Commission Canada has loaded 94,900 MT field peas** for export through licensed terminal and primary elevators in the month of August. Export volume is down by 67 % from 2.92 lakh tonne shipped during same period last year. Demand from India has decreased due to higher availability in domestic market.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Overall Outlook: - Pulses market may trade range bound to weak.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
