

Pulses Domestic Fundamentals:

- **Govt can impose import duty on peas by 15 percent to check its declining prices in domestic market.** Agriculture ministry has sent a proposal to concerned ministry to impose 15 % import duty on yellow peas. Govt. is trying to support pulses prices and it had limit the quantity of import for Tur, Urad and Moong for the current MY. After this move it opened export. But it could not support pulses prices. As India import the higher quantity of matar, it intends to restrict import of matar now. The recent proposal of imposing duty on matar is the further step to support domestic market pulses price.
- **Chana continues to trade lower and pressure is likely to continue. It has decreased more than Rs 1000 per qtl. in last one month.** Import flow, stockists selling and increasing possibility of high acreage due to MSP hike would continue to restrict market to get firmer. Futures too decline below 5000 level. As vessel from Australia is expected to hit 29th October, recovery in futures and cash market is expected on Monday. Importers would try to sell imported Chana at higher price. Once they sell out, cash market would decrease again.
- **Govt. may allow Urad and Moong import beyond 3 lakh tonne limit for the current MY** if importers have made payments before 21st August. Importers will have to provide purchase invoice and payment details certified by banks at a time of registration. DGFT has asked to such traders to register their moong and Urad dal deals with regional offices by 31st October-2017.
- **Moong market to reels under pressure in Akola as arrival is increasing. Arrival of Moong** has reached at 3000 bags and is being traded in the range of Rs 4350 to 4700 per qtl. depending upon quality of the crop. Demand is weak and govt's procurement drive is running in limited area. Overall sentiment is weak.
- **As per market sources govt. has accepted CACP recommendation regarding MSP of Chana and Tur** for Rabi marketing season 2018-19. The CACP has recommended Rs 200 increase in Chana & Lentils MSP. Chana MSP has been fixed at Rs 4200 and For Lentils at Rs 4125. For 2017-18 it were 4000 for Chana & Rs 3950 for Lentils including bonus of Rs 200 per qtl. Chana price is ruling above MSP right now while Lentils is trading below MSP.
- **Area under Lentils is bound to decrease by 20 to 25 percent this year as** farmers have not started sowing as yet. Lower price is a discouraging factor this year. MP and UP farmers have left their Lentils field unplanted and they intend to sow Chana in this field. Importers of Lentils too have restricted import forward deals by 30 to 40 percent this year. So Lentils prices are expected to recover from current level. Current prevailing price may be the lower level for the year.
- **Tur stock at Mumbai port is declining now. In August Tur stock at Mumbai port** was around 60,000 tonne. Now it has decreased to 30,000 tonne and by the end of this month more 10,000 is likely to be lifted. This means November would start with 20,000 T imported Tur stock in Mumbai. Out of this African origin Tur stock is around 5000 tonne. Import is unlikely by the end of this marketing year. Accumulated stock is depleting slowly.
- **Australian Desi Chickpeas Jimbour was offered at Nhava Sheva port at \$745 per tonne** for Nov/Dec delivery. It is \$750 for Jan delivery. Australian Desi Chickpeas Kybra type is being offered at \$765 per tonne at Nhava Sheva/Kolkatta & Mundra port for Dec delivery. Australian pure Chana dal is being offered at \$1035 per tonne for Nov/Dec delivery. In INR term it comes to Rs 68000 per tonne.
- **Australian whole red lentils new crop is being offered at \$545 per tonne on FoB basis** for Nov/Dec delivery. In INR terms it comes to Rs 35100 per tonne. Nugget type is being offered at same rate for same month delivery. As there is a improvement in demand and market expects seed demand to come prices are likely to recover from current level in coming weeks.

Pulses International Fundamental:-

- **Global pea markets traded almost steady with weak bias likely to continue due** to reduced export demand for new crop. Importers in India may start buying peas once again because of fear that Indian govt. will end the exemption from import duties or impose import quotas for Chana ,Red Lentils and peas. It has already placed it for Moong, Tur and Urad. So importers would increase import despite sufficient stock available in domestic market.
- **Global lentil markets traded weak during the past week as supplies exceeds demand** for export. Harvesting in Canada is over now. Lentil quality is excellent, increasing competition for demand from markets which insist on good No 1 and No 2 grade product. Export movement is likely to remain sluggish in coming week. Right now Indian buying is restricted.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas** for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 to 16,000 tonne last year.
- **Dry bean production in US has been estimated sharply up by 23 % to 1.6 million tonne.** Yield has been estimated at 1737 pound per acre. US farmers have planted 2.11 million acres in 2017. It was up by 27 % from 2016. In Michigan harvest began in the third week of September as favorable weather aided in drying down the crop. As October got underway, 57% of the beans were harvested.
- **Production of Chickpeas in Queensland in Australia is likely to be lower by** previous estimate of 0.65 Million tonne as weather is not very congenial to the standing crop. Yield is expected to decline by 38 % from previous year. In 2017-18 area covered under Chickpeas was 5% higher than previous year to 5.6 lakh ha. The other major Chickpeas state is New South Wales where 4.78 lakh ha has been covered and production has been estimated 4.78 lakh tonne. It may be reduced further.
- **As per the latest report from Canada Grain Commission Canada has loaded 94,900 MT field peas** for export through licensed terminal and primary elevators in the month of August. Export volume is down by 67 % from 2.92 lakh tonne shipped during same period last year. Demand from India has decreased due to higher availability in domestic market.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Overall Outlook: - Pulses market may trade range bound to weak.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
