

Pulses Domestic Fundamentals:

- **Buyers have taken position in Chana futures and cash market is** expected to improve by Rs 150 to Rs 200 during current week. Stake holders should not wait for any major recovery as fundamental for Chana still remains weak. Selling at higher level is good. Importers would sell Chana at higher level and then again cash market would decrease as it has been seen during last one month.
- **Australia is offering Chana at \$ 750 for Nov,\$745 for Dec & \$740 for Jan delivery at** Nhava Sheva port. Feb del is being offered at &720 per tone. Actually there is no impact of lower crop size in Australia. Stockists in Indian markets are releasing stock as inner tone remains weak. Likely higher acreage in India may put further pressure on Chana market. So selling on slight recovery would be good for stake holders.
- **Australian Red whole Lentils (nipper Type) is being offered at \$505 for tone** for Nov delivery. Nugget type is being offered at \$500 per tone for Dec delivery. Stakeholders should wait for recovery in market.
- **Planting started in Uttar Pradesh and MP. However area coverage is lagging behind** considerably in UP as farmers have decided to shift 20 to 25 % area from Lentils to Chana this year. Overall impact of lower area coverage in UP might reduce all India area by 10 to 15 % this year. If area declines in MP too percentage area coverage may decrease further.
- **Tur market too is waiting for recovery. However, excess stock available in central pool** and continuous selling through auctions has capped market. Demand is weak and standing crop condition is said to be good so far.Import is almosted halted due to import limit. Market is waiting for buying support from millers.For short term sentiments remain weak. But recovery from current level might be seen in coming months. Tur traded at Rs 3800 to Rs 3850 in Delhi market.Stockists have preferred to retain stock.
- **Some export deals have been herd for Moong and if export demand continues, moong** would continue to trade at current level. Arrivals have decreased as farmers have started retaining stock due to lower price realization.Burma offers Mung at \$770 per tonne while it is being traded at rs 4500 to Rs4700 in Indian market.
- **As Chana market is under pressure, there seems no respite for peas too. Australia** is offering Kaspas peas at \$358/359 for Nov/Dec delivery. More pressure is likely to build up on peas as there is ample stock available in the market and the number of sellers are higher than buyers right now.Canadian peas at Mumbai is being offered at Rs 2040 per qtl . right now, and it may dip down further from current level.
- **Urad market has seen some improvement. But there is no buying support** in market. In Mumbai market Urad is being traded at Rs 4200 to Rs 4400 per qtl. SQ in Chennai is being traded at Rs 5200 per qtl. Overall sentiment remains weak.
- **There is a rumour in the market that govt may trim buffer stock size as central pool is** saddled with huge stock(1.8 million tonne) and procurement for rabi is yet to start.As per market sources ‘-A committee under Ramesh Chand, member, Niti Ayog, has been set up to review the buffer stock limit. There could be a downward revision to the existing limit of 20 lakh tonnes. Besides, bilateral agreement with Mozambique, signed during July, 2016 might be reviewed.

Pulses International Fundamental:

- **Global pea markets traded almost steady with weak bias likely to continue due** to reduced export demand for new crop. Importers in India may start buying peas once again because of fear that Indian govt. will end the exemption from import duties or impose import quotas for Chana ,Red Lentils and peas. It has already placed it for Moong, Tur and Urad. So importers would increase import despite sufficient stock available in domestic market.
- **Global lentil markets traded weak during the past week as supplies exceeds demand** for export. Harvesting in Canada is over now. Lentil quality is excellent, increasing competition for demand from markets which insist on good No 1 and No 2 grade product. Export movement is likely to remain sluggish in coming week. Right now Indian buying is restricted.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas** for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 to 16,000 tonne against 16,000 tonne last year.
- **Dry bean production in US has been estimated sharply up by 23 % to 1.6 million tonne.** Yield has been estimated at 1737 pound per acre. US farmers have planted 2.11 million acres in 2017. It was up by 27 % from 2016. In Michigan harvest began in the third week of September as favorable weather aided in drying down the crop. As October got underway, 57% of the beans were harvested.
- **Production of Chickpeas in Queensland in Australia is likely to be lower by** previous estimate of 0.65 Million tonne as weather is not very congenial to the standing crop. Yield is expected to decline by 38 % from previous year. In 2017-18 area covered under Chickpeas was 5% higher than previous year to 5.6 lakh ha. The other major Chickpeas state is New South Wales where 4.78 lakh ha has been covered and production has been estimated 4.78 lakh tonne. It may be reduced further.
- **As per the latest report from Canada Grain Commission Canada has loaded 94,900 MT field peas** for export through licensed terminal and primary elevators in the month of August. Export volume is down by 67 % from 2.92 lakh tonne shipped during same period last year. Demand from India has decreased due to higher availability in domestic market.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Overall Outlook: - Pulses market may trade range bound to weak.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
