

Pulses Domestic Fundamentals:

- **Rabi pulses area is running ahead by 47 percent to 42.01 lakh ha so far.**Chana,Masur,Matar,Kulthi Urad & Lathyrus area coverage is higher by 47.39,131.19,21.87,15.71 & 6.79 % higher so far.Just opposite to it area under Moong is Moong & Lathyrus lagging behind by 19.66 and 40.15 % so far. Overall sowing progress seems normal to good.
- **Area coverage under Chana is lower in states like Rajasthan, Telangana, AP & Odisha** by 44.8,18.2,13.5 & 45.3 % so far. However, higher coverage in MP, Maharashtra, Karnataka and Uttar Pradesh by 301,134.9,13.1 & 23.2 % respectively has negated the impact of lower coverage area in some particular states.Overall area coverage is bound to increase by 10 to 15 % this year. After slight recovery Chana is bound to decrease once again.
- **The Government has decided to develop a formula to increase/decrease import duty** on Agriculture commodities. A benchmark price would be fixed under this formula. According to market sources, if prices go down below MSP by 20 %, import will be restricted, export would continue. Similarly, if prices go above MSP by 20 %, export will be restricted, and import would continue.
- **New Tur arrives in Sholapur and around 50 bags were traded at Rs 4500/4600 per qtl.** Reports are circulating in mandis that no of grains are 3 to 4 instead of 5 to 6 this year in Sholapur region.Increasing fear of fungus infestation in other region may support Tur this week to a certain extent.Tur market is likely to move up further by Rs 100 to Rs 150 in the near term before new arrivals increase.
- **A vessel having 24535.50 tonne yellow peas and 33964.49 tonne lentil is expected** to reach Mumbai on 6th Nov-2017.Total quantity in question is around 58500 metric tonnes.Despite bearish trend and lower price in domestic market import flow continues.It will put further pressure on already distorted market in coming weeks.
- **Mozambique pigeon pea (red) and white were offered at \$190 and \$210 per tonne basis CnF Nhava Sheva.**Australia quoted chickpeas Jimbour type at \$730 FoB for Nov and Dec delivery.Myanmar Lemon Tur is being offered at \$305 per tone basis Kolkatta.Faq & SQ Urad from same origin is being offered at \$410 & \$555 per tone basis Kolkatta.
- **Australia Desi Chickpeas Jimbour type is being offered at \$735 for Nov delivery.**December and January delivery is being offered at \$725 & \$740 per tonne.Australian Red whole Lentil is being offered at \$480 for Nov/dec delivery,for nipper type it is being offered at \$475 per tone.Australian Kaspera peas is being offered at \$350per tone for December delivery.
- **There is a rumour in the market that govt may trim buffer stock size as central pool is saddled with huge stock(1.8 million tonne) and procurement for rabi is yet to start.**As per market sources ‘-A committee under Ramesh Chand, member, Niti Ayog, has been set up to review the buffer stock limit. There could be a downward revision to the existing limit of 20 lakh tonnes. Besides, bilateral agreement with Mozambique, signed during July, 2016 might be reviewed.
- **Some export deals (around 10,000 tone) have been herd for Moong and if export demand continues, moong** would continue to trade at current level. Arrivals have decreased as farmers have started retaining stock due to lower price realization.Burma offers Mung at \$770 per tonne while it is being traded at rs 4500 to Rs4700 in Indian market.

Pulses International Fundamental:

- **Global chickpeas market traded almost unchanged during the week under review despite** a tight supply demand side in spot markets. At current market assessment scenario longer term supply side seems good. India and Turkey are trying to increase its pulses production. So demand from India is bound to decline. Carryout stock in India is at comfortable position. The biggest change will be in desi chickpea output. Australia is now harvesting its crop. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas. Now it is assumed that crop size would be lower than 1 MMT.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for** Chickpeas for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81,000 tonne against 82,000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 tonne against 16,000 tonne last year.
- **Dry bean production in US has been estimated sharply up by 23 % to 1.6 million tonne.** Yield has been estimated at 1737 pound per acre. US farmers have planted 2.11 million acres in 2017. It was up by 27 % from 2016. In Michigan, harvest began in the third week of September as favorable weather aided in drying down the crop. As October got underway, 57% of the beans were harvested.
- **Lentils area in Canada is Bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17. Local farmers may opt for other lucrative crops if prices continue to hover at lower level.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade range bound in the near term.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
