

Pulses Domestic Fundamentals:

- **All pulses market traded almost steady on news circulating in the market that government may impose 50% import duty on Chana and 30% duty on Masur soon to support Pulses market. Trades are in wait and watch mode now.**
- **Rabi pulses sowing area is running ahead by 34.36 % to 81.24 lakh ha as on 17th November-2017.** Chana area was registered at 60.69 against 43.91 lakh ha. Masur area was registered at 7.96 against 5.03 lakh ha, peas area was recorded at 4.38 against 3.70 lakh ha. Even Urad and Moong area was recorded at 1.59 against 1.11 & 0.39 against 0.44 lakh ha. Other pulses area was recorded at 1.76 against 1.54 lakh ha. Overall sowing progress is running good. Bumper area coverage is on the card once again.
- **Around 44,000 tone Australian Chana is expected to hit Indian port on 24 Nov 2017** amid rumor in the market that govt may impose duty on Chana import. Chana market is likely to reel under pressure in coming weeks. Buyers have started avoiding bulk purchasing amid higher acreage
- **Tur including some other pulses import from Mozambique is now on restricted list.** Now its restricted quantity will be 1.25 lakh ton for 2017-18. A MoU between both countries has been signed last week (18 Nov-2017). Out of total 1.25 lakh ton around 40,000 has already been imported. The rest 85,000 would be imported further with conditions like requirement of NOC from Mozambique authority and offloading at 5 selected ports like Mumbai Tuticorin, Chennai, Kolkata & Hazira.
- **Australian Red Whole lentils is being offered at \$490 per ton basis CiF at Kolkata port for Nov/Dec delivery.** 10 FCI nipper type is being offered at \$485 per ton basis cif at Kolkata port for Dec delivery. Pressure continues on price as Indian demand has decreased considerably. Australian Desi Chickpeas is being quoted at \$695 per ton basis ciF for Dec delivery at Kolkata port.
- **NCDEX has demanded lifting of a ban on tur and Urad futures trading and welcomed the government's move to remove export curbs on all kinds of pulses.** Encouraging pulses export is a "path breaking" move at a time when their prices are ruling below the minimum support price (MSP) says exchange in its statement. As per Exchange it is the most suitable time for re-launching futures trading in pulses like tur and Urad.
- **Pulses importers from Mumbai have imported 292 containers of pulses at Nhava Sheva port.** M.V Northern Prelude having 292 containers is scheduled to arrive on 16th Nov-2017. Out of total 292 containers Chana/Chana dal share is 145 containers, followed by Yellow Peas-65 containers, Black Eyebeans-44 containers, Pigeon peas-19 containers and Lentil -14 containers. There is no containers of Moong, Urad and Moth.
- **NAFED procured around 1lakh tone Moong in four states like Rajasthan, Telangana, Karnataka and Maharashtra till 13 Nov 2017.** It has been procured from kharif season crop at MSP under price support scheme.
- **Moong market is likely to improve from current level as dal miller's enquiry has increased at current level.** New arrival from Bihar, Jharkhand & UP would not start before mid-May While MP crop is expected in the beginning of May. Current arrival from Shekhavti, Merta and Kishangarh line has started declining.
- **Urad may trade stable to slightly weak as there is plenty of stock lying in the market.** In UP supply from Chandausi line continues and new crop is almost ready to be harvested. Besides, Black Masur from Kota line is available at lower price. So pressure on Urad may continue.

Pulses International Fundamental:

- **Recent rains in Australia have nullified impact of frost on Chickpeas. Notably Australian Chickpeas** belt was facing frost like condition in early Nov. Recent 80 millimeters rains have given chance of re-flowering of Chickpeas. Some improvement in yield is expected now. So Australian Chickpeas production may be revised slightly up.
- **Imposition of import duty on all peas by 50 % has started impacting export** volume from Canada According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT(2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price sare hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **As per the latest update by Board of Public Association “Community of Pulse Producers and Customers of Ukraine” (SPPBU), Ukraine is likely to increase pulses area by 30% in 2018.** It was 5.02 lakh ha in 2017. Out of this peas area was 4.01 lakh ha. Ukraine has witnessed 2.5 times area increase under pulses in recent three years. Ukraine had produces 8 lakh tonne in 2016 and 13 lakh tonne in 2017. If area increases by 30 % in 2018, production would touch to 15 /16 lakh tonne under normal condition.
- **Global chickpeas market traded almost unchanged during the week under review despite** a tight supply demand side in spot markets. At current market assessment scenario longer term supply side seems good. India and Turkey are trying to increase its pulses production. So demand from India is bound to decline. Carryout stock in India is at comfortable position. The biggest change will be in desi chickpea output. Australia is now harvesting its crop. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas. Now it is assumed that crop size would be lower than 1 MMT.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas** for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 to 16,000 tonne against 16,000 tonne last year.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.

- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.**

Weekly Outlook: -Pulses are likely to trade range bound to slightly firm in the near term.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
