

Pulses Domestic Fundamentals:

- **Govt. is trying to support market by taking various steps like imposition of import duty, quantity restriction and procurement through price support schemes.** Despite govt.'s attempt to arrest declining prices cash market continues to reel under pressure due to excess stock, import flow and likely bumper Rabi crop. Tur may trade range bound at current level while Moong may trade up due to increased procurement activities and declining arrivals. Urad would continue to trade under pressure due to demand factor and higher imported old stock. Chana may trade firm on the back of 25 % proposed duty. In the medium term fundamental for Chana remains weak.
- **Rabi pulses sowing area is running ahead by 13.96 % to 101.43 lakh ha as on 23rd November-2017.** Chana area was registered at 72.96 against 62.83 lakh ha. Masur area was registered at 11.73 against 9.72 lakh ha, peas area was recorded at 6.45 against 6.39 lakh ha. Even Urad and Moong area was recorded at 1.90 against 2.4 & 0.58 against 0.77 lakh ha. Other pulses area was recorded at 2.56 against 2.33 lakh ha. Overall sowing progress is running good. Bumper area coverage is on the card once again.
- **According Market participants are waiting for notification regarding proposed import duty of 25 to 30% on Chana, which is expected soon.** Imposition of 25% duty would escalate chana price by Rs.200-250 per qtl. Chana in cash market has already moved up by Rs 150 to Rs 175 per quintal and may trade further up.
- **Moong market may continue to improve as arrival flow has started declining** on restricted selling by stockists. New crop from UP, Bihar and Karnataka would not arrive before April. Jaipur Moong market moved up by Rs 100 to Rs 4700 per quintal.
- **Uptrend in Chana and Moong has lent some support to Tur market too.** It may trade steady to slightly up from current level of Rs 3900-3950 in Delhi market.
- **Tur including some other pulses import from Mozambique is now on restricted list.** Now its restricted quantity will be 1.25 lakh ton for 2017-18. A MoU between both countries has been signed last week (18 Nov-2017). Out of total 1.25 lakh ton around 40,000 has already been imported. The rest 85,000 would be imported further with conditions like requirement of NOC from Mozambique authority and offloading at 5 selected ports like Mumbai Tuticorin, Chennai, Kolkata & Hazira.
- **Australian Red Whole lentils is being offered at \$490 per ton basis CiF at Kolkata port for Nov/Dec delivery.** 10 FCI nipper type is being offered at \$485 per ton basis cif at Kolkata port for Dec delivery. Pressure continues on price as Indian demand has decreased considerably. Australian Desi Chickpeas is being quoted at \$695 per ton basis ciF for Dec delivery at Kolkata port.
- **Pulses importers from Mumbai have imported 292 containers of pulses at Nhava Sheva port.** M.V Northern Prelude having 292 containers is scheduled to arrive on 16th Nov-2017. Out of total 292 containers Chana/Chana dal share is 145 containers, followed by Yellow Peas-65 containers, Black Eyebeans-44 containers, Pigeon peas-19 containers and Lentil -14 containers. There is no containers of Moong, Urad and Moth.
- **NAFED procured around 1.1 lakh tone Moong in four states like Rajasthan, Telangana, Karnataka and Maharashtra till 13 Nov 2017.** It has been procured from kharif season crop at MSP under price support scheme.

Pulses International Fundamental:

- **Recent rains in Australia have nullified impact of frost on Chickpeas.** Notably Australian Chickpeas belt was facing frost like condition in early Nov. Recent 80 millimeters rains have given chance of re-flowering of Chickpeas. Some improvement in yield is expected now. So Australian Chickpeas production may be revised slightly up.
- **Imposition of import duty on all peas by 50 % has started impacting export volume from Canada** According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT(2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price sare hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **As per the latest update by Board of Public Association “Community of Pulse Producers and Customers of Ukraine” (SPPBU),** Ukraine is likely to increase pulses area by 30% in 2018. It was 5.02 lakh ha in 2017. Out of this peas area was 4.01 lakh ha. Ukraine has witnessed 2.5 times area increase under pulses in recent three years. Ukraine had produces 8 lakh tonne in 2016 and 13 lakh tonne in 2017. If area increases by 30 % in 2018, production would touch to 15 /16 lakh tonne under normal condition.
- **Global chickpeas market traded almost unchanged during the week under review despite** a tight supply demand side in spot markets. At current market assessment scenario longer term supply side seems good. India and Turkey are trying to increase its pulses production. So demand from India is bound to decline. Carryout stock in India is at comfortable position. The biggest change will be in desi chickpea output. Australia is now harvesting its crop. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas. Now it is assumed that crop size would be lower than 1 MMT.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for Chickpeas for marketing year 2017-18.** According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 toone against 16,000 tonne last year.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne for 2017-18.** In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.

- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.**

Weekly Outlook: -Pulses are likely to trade range bound to slightly firm in the near term.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
Area seeded (kha)	1,633	2,372	1,783
