

### Pulses Domestic Fundamentals:

- **South Indian mills imported 361 containers pulses during 16 to 29 Nov-2017 against 792 containers during 1st to 15th- Nov-2017.** Major decline was seen in lentil import that decreased from 577 to 149 containers under review period. Chickpeas import increased from 51 to 116 containers. Urad import increased from 10 to 17 containers. With imposition of duty green peas import decreased from 49 to 23 containers, yellow peas decreased from 54 to 10 containers, white peas decreased from 6 to 4 containers. Tur white decreased from 11 to 5 containers. Pea bean cow peas import increased to 3 & 4 containers during the period.
- **Tur lemon in Burma moved up by \$15 to \$310 per tonne. However likely traded steady at \$315 per tonne that in Rs term comes to Rs 20475 per tonne.** Urad FAQ is being quoted at \$420 and SQ at Rs 540 per tonne that comes to Rs 27300 and 35100 per tonne. Moong Pakaku & Taunghwa are being offered at Rs 49400 and 48750 per tonne, almost similar at Indian market prevailing prices. This means opportunity for export is increasing for Moong.
- **New Tur started hitting Gulbarga market. Around 100 bags arrival was reported Tuesday** and traded at Rs 4000 to Rs 4100 per qtl. Quality of crop is normal to good. Traders & millers are expected to be active once the arrival increases and prices get stabilized..
- **Pulses market continued to reel under pressure, especially Chana. There is no respite for Chana as production size is expected to cross 10 MMT against 9.1 MMT last year.** Old stock is ample and new arrival is due in Karnataka from mid Jan-2018. Chana southward journey would continue and it may trade below Rs 4000 in March & April. Delhi chana is trading at Rs 4700 per qtl.
- **Rabi pulses sowing area is running ahead by 7.81 % to 117.83 lakh ha as on 1<sup>st</sup> Dec-2017.** Chana area was registered at 84.37 against 78.26 lakh ha. Masur area was registered at 13.55 against 12.62 lakh ha, peas area was recorded at 7.19 against 7.63 lakh ha. Even Urad and Moong area was recorded at 2.54 against 2.45 & 0.89 against 1.02 lakh ha. Other pulses area was recorded at 3.31 against 2.43 lakh ha. Overall sowing progress is running good. Bumper area coverage is on the card once again.
- **New Tur strats in Latur and quality is said to be fair to good. Around 45 bags new Tur arrived in Latur mandi on Saturday and was trade at Rs 3950 to 4150 per qtl.** In Ahmednagar around 1500 bags new Urad was reported and it traded in the range of Rs 3000 to Rs 4200 per qtl. depending on quality of crop. As new crop has started and pressure is likely to build up in next 20 days ,prices of both commodities might be seen under pressure in coming weeks.
- **Higher carryout for Urad (8.77 lakh tone) and good crop size expected to be around 24.97 lakh tone** would not allow market to retain its current higher level. Total availability is around 35 lakh tonne against AW projected consumption fig. of 25.5 lakh tone for MY 2017-18.
- **As new Tur arrivals increase, firmness in prices is unlikely.** Allocation of nearly 5 lakh tonne from central pool stock to various central welfare schemes would hamper demand from cash markets. Selling continues through weekly auctions by NAFED & FCI. Even MMTC is trying to sell 1 lakh tonne imported old Tur stock.
- **Govt. has decided to reduce import of Tur from 3lakh tonne, as agreed** upon two years back from African origin to 1.24 lakh in 2017-18 on G2G basis. It does not include private import restricted to 2 lakh tone. As private import quota is complete, import is not possible till March2018. As new crop started, steady to weak tone may prevail.

**Pulses International Fundamental:**

- **Likely storm and 250mm rainfall forecast in parts of eastern Victoria may disturb** harvesting activities in Australia. Chickpeas and lentil harvesting are expected to get affected from this storm and heavy rainfall. In US pulses area is increasing rapidly. Over 80 per cent of pulses grown in the United States come from either North Dakota or Montana.
- **Statistic Canada would release pulses production estimate this week. It had earlier predicted** 3.7 to 4.2 million tonne peas production for 2017-18. Market is awaited new estimates. As demand from India has decreased considerably, farmers and trade community is concerned about price and smooth marketing in new year.
- **After import restriction of pulses from Myanmar by India exporters from Myanmar** have focused their eyes on other countries like Bangladesh, Sri Lanka, Pakistan and Nepal in recent months. Notably, Indian had restricted import volume quota of black matpe, mung beans and pigeon peas from Myanmar in the 2017-18 fiscal year in August-2018.
- **Demand from neighboring countries is increasing now and import volume from** these countries has doubled so far. Current demand from other markets helped Myanmar pulses market to stand once again. Media report says that Myanmar is exporting around 30,000 pulses per month in four countries now. Pigeon pea price declined from Rs 28000 to Rs18800 per tone in three months in Myanmar. Moong bean price has declined from Rs 29610 to Rs 16200 per tonne.
- **Imposition of import duty on all peas by50 % has started impacting export** volume from Canada. According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price sare hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada has updated its production estimate for** Chickpeas for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000(old estimate) to 81000 tonne against 82000 tonne produced last year. Export has been pegged at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 toone against 16,000 tonne last year.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Peas import from Ukraine to India is bound to increase over 50 % to6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

**Weekly Outlook:** -Pulses are likely to trade range bound to slightly firm in the near term except Chana,Urad & Tur.

**Canada Lentils Production Estimate**

Canada Lentils( Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
