

Pulses Domestic Fundamentals:

- **Pulses market could not sustain at higher level despite govt.'s attempts** to arrest the falling prices through imposition of duty, quantity restriction, procurement drive. Actually, demand at higher level decreases and it remains unsupportive to cash market. Private buying at higher level remains restricted and whenever prices moves up by Rs 300/400 per qtl. profit bookings comes .It would continue for next two months as there is plenty of availability. Full-fledged private buying is yet awaited.
- **The central government, in consultation with states, proposes to launch a new price support scheme** for farmers to prevent distress sales at prices below the minimum support price (MSP).Under market assurance scheme the Centre will compensate any losses due to procurement, capped at 30% of the procurement cost. For hill states and those in the north east, the ratio of compensation is proposed at 40%.
- **All India Rabi pulses Area is running ahead by 9.05% to 146.06 lakh ha.** From last year so far. Chana area is 13.88 % up to 99.89 lakh ha.,Urad area is up by 2.87 % to 5.77 lakh ha &Moong area is 22.56 % down to 2.31 lakh ha.
- **Increasing fog and lower temperature at night have started affecting Tur and Chana crops.** Flowers are falling from Tur crop while there is a danger of spread of Elli infestation in Chanacrop.Moong and Urad stayed steady to slightly weak due to slack demand at higher level.Market expects fresh demand from the second week of Jan-2018.
- **Decision on imposing 30 %import duty on Chana & Masur is considered to** be delayed step but in right direction just ahead of bumper incoming crop of Chana and normal to good production of Lentil in 2018.It would help market to recover at lower level. Currently pea attracts 50 % duty,Chana attracts 30 % duty and Tur attracts 10% duty. Besides, import quantity restriction on Moong and Urad is 1.5 lakh tonne each & on Tur 2.0 lakh tonne, applicable till March-2018.Under emerging scenario govt.is likely to extend it for another six months to ensure better price for farmers.
- **Imposition of 30% import duty on Masur would help cash market to recover at least by 10 to 12 % from current level.** Masur market may move up by Rs 300 to Rs 350 per qtl from current level. As new crop is 2 months away, market is expected to recover from Rs 3550 to Rs 3750 in various markets. Import costing would increase and impose flow would be affected in weeks ahead.
- **Karnataka govt. had purchased 2.4 lakh tonne Tur last year. This year purchased** target has been fixed at 1.65 lakh tonne. State govt. has purposed to give bonus of Rs 500 per qtl. over& above MSP. This means farmers would get Rs 5950 per qtl. for their Tur. Karnataka govt. would procure 20 qtl. from each farmers. It would support market to a certain extent at current level. Tur MSP is Rs 5450 including bonus of Rs 200.It would restrict downward trend despite new arrivals.
- **Procurement drive, lower crop size(31.19 lakh tonne) &Agriwatch revised carryout for 2017-18(5.61 lakh tonne),** much lower than 10.67 lakh tonne in 2016-17 crop year may support cash Tur market in the second half of the new year. As new crop started hitting the market, prices are likely to stay steady to slightly weak in the weeks ahead despite buyers increased buying activities. It is trading at Rs 4400 per qtl. inGulberga. It will trade in the range of Rs4150 to Rs 4300 in the short term.
- **Nafed has procured around 196830.57 lakh tonnemoong from kharif 2017 crop at MSP of Rs 5575 till 1st week of Dec.** Procurement period in Karnataka ended on 24th N ov-2017 while it has just completed in Telangana.Rajasthan contributed maximum quantity of 166266.08 tonne, Karnataka contributed 21902.13 tonne, Maharashtra 4163.04, Telangana -3329.25 and AP- 1170.05 tonne so far. Procurement in Rajasthan,Maharashtra and AP is still on.

Pulses International Fundamental:

- **Global lentil markets ended with a mixed tone. Prices of red traded range bound** on the week, while the spread between U.S. and Canadian green lentils widened to some extent. There is a concern in global market that India could impose an import duty on the product given the risk that seeded area in India could match or exceed last year. Though the pace of seeding has slowed compared to last year, farmers in that country have sown 1.553 million hectares as of December 15, compared to 1.526 million at this time during the previous rabi season.
- **Kabuli chickpea markets finished the week's trading on an uncertain note, with markets** for small caliber product destabilized by an increase in the number of Argentine farmers bypassing traditional exporters. Markets for large caliber product were unchanged on the week, with Mexico virtually sold out of product and Indian exporters holding firm on prices for 10mm and larger caliber kabuli chickpeas.
- **As per latest US dry pea and lentil council dry pea export from US declined** around 75% lower than last year in Sept-2016. Indian demand has decreased considerably due to bumper crop size. Even China too has brought less quantity of peas. China has brought 2890 MT followed by India 2005MT and Mexico 1740 MT. Export data for pea from US for Oct is awaited.
- **Likely storm and 300 mm rainfall forecast in parts of eastern Victoria may disturb** harvesting activities in Australia. Chickpeas and lentil harvesting are expected to get affected from this storm and heavy rainfall. In US pulses area is increasing rapidly. Over 80 per cent of pulses grown in the United States come from either North Dakota or Montana.
- **Demand from neighboring countries is increasing now and import volume from** these countries has doubled so far. Current demand from other markets helped Myanmar pulses market to stand once again. Media report says that Myanmar is exporting around 30,000 pulses per month in four countries now. Pigeon pea price declined from Rs 28000 to Rs 18800 per tonne in three months in Myanmar. Moong bean price has declined from Rs 29610 to Rs 16200 per tonne.
- **Imposition of import duty on all peas by 50 % has started impacting export** volume from Canada. According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT(2016-17) to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas price are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease by 35.92 % to 11.88 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **AAFC (Canada) has revised down peas production estimated from 42.50 to 41.50 lakh tonne** for 2017-18. In last one month production estimate has been revised down by 1.50 lakh tonne for next season crop due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne** in 2017-18 as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade range bound to slightly weak in the near term.

Canada Lentils Production Estimate

Canada Lentils(Crop year is August-July.)	2015-2016	2016-2017[f]	2017-2018[f]
